Current Responsibility

Amritpal Khangura is a consulting actuary with the Life Technology Solutions (LTS) Practice of Milliman. He joined the firm in 2011.

He is responsible for the global LTS Data and Reporting team, focusing on building data management and reporting solutions for life insurers.

Professional Work Experience

Amritpal has over a decade of experience within the life insurance industry. His area of expertise is in implementing actuarial modelling solutions, covering model architecture, change management, data modelling, and reporting.

Amritpal has successfully designed and implemented large-scale strategic reporting initiatives, delivering cost-reduction, faster reporting timescales and greater quality and consistency of financial results.

Amritpal is also co-leading the development and implementation of Milliman's IFRS 17 modelling solution, focusing on the end-to-end process, reporting, and integration.

Prior to joining Milliman, Amritpal worked at a life insurer for several years in a range of teams, including the shareholder reporting function and unit pricing and unit-linked investment teams.
