Current Responsibility

Chankyu Lee is a principal and consulting actuary with the San Francisco office of Milliman. He joined the firm in 2002.

Professional Work Experience

Chankyu has participated in many projects that draw on his prior healthcare industry experience and academic training. The projects he has completed include the following:

- Developing annual Medicare Advantage bids (non-SNP, dual eligible SNP, and chronic care SNP) for several health plans since 2002
- Developing renewal rates and product design recommendations for student health plans for the past seven years
- Developing bids for state-managed Medicaid contracts on behalf of managed care organizations
- Developing cost and utilization benchmarks for hospital and physician services for commercial, Medicare, and Medicaid lines of business
- Analyzing the financial impact of proposed mandates for the California state legislature
- Performing payer parity validation by evaluating hospital and physician contracts and repricing claim data
- Participating in the development of the Milliman Health Cost Guidelines™

Prior to joining Milliman, Chankyu worked in the healthcare industry and technology sector, where he was responsible for analyzing financial data and creating internal business plans.
