

ANGGI PISCESIA

Senior Consultant

anggi.piscesia@milliman.com

Current Responsibility

Anggi is an actuarial consultant with the Jakarta, Indonesia, office of Milliman, which was formerly Eldridge Consulting.

Professional Work Experience

Anggi began his career in employee benefits consulting in 2006.

His analytical thinking and creative problem-solving skills were showcased in a recent project in which he helped structure, model, and communicate complex financial projections.

He also has an extensive understanding of employee benefits accounting concepts for pension, other postretirement benefits, and equity-based compensation, providing calculation results for accounting standards (PSAK 24, PSAK 53, IAS 19) and funding purposes. Utilizing his strong understanding of actuarial valuation model and software programming, he develops actuarial valuation software that allows the user and other parties to see a detailed, step-by-step procedure for actuarial valuation.

Anggi has excellent interpersonal communication skills that allow him to recognize core consulting issues and establish a basis for delivering advice to clients.

Education

- BS, Mathematics (specializing in stochastic modeling), Bandung Institute of Technology
