

FUSTEL SOH NZOKOU

Senior Consultant

fustel.soh-nzokou@milliman.com

Current Responsibility

Fustel Soh Nzokou joined Milliman as a senior consultant in May 2023. His main topics include:

- Portfolio migrations
- Actuarial testing (integration tests for business transactions in insurance, test automation)
- Inventory corrections
- Inventory and data analysis
- System test case conception

Professional Work Experience

Prior to joining Milliman, Fustel Soh Nzokou worked in various departments for insurance companies and consulting firms. His responsibilities included:

- Developing software primarily building (programming) interfaces between the company's insurance management system and its peripheral systems (collection system, provision system, partner system, etc.)
- Programming automated business cases to implement new insurance management software
- Conducting inventory analysis with SAS and inventory corrections
- Working in the risk management department with a main focus on the calibration of credit spreads and the programming of price functions for asset evaluations in an Asset-Liability management study
- Stress-testing estimates for the company and the BaFin.
- Performing general business analyses

Education

- Bachelor of Science (BSc.), Mathematics; with Minor in Computer Science, 2012 - Buea University in Cameroon
- Master of Science (MSc.), Applied Mathematics, 2018 - Freie Universität in Berlin, Germany

Currently Fustel Soh Nzokou follows a qualification program DAV to obtain qualification as Certified Actuary.
