Current Responsibility

Chunpu is a quantitative analyst in the Capital Markets and Hedging Group of Milliman's Financial Risk Management practice in Chicago. This group advises clients in banking, insurance, mortgage servicing, and funds management on financial risks, hedging strategies, and trading operations. Chunpu helps support risk management tools and trading analytics and works on special projects.

Professional Work Experience

Prior to joining Milliman, Chunpu worked for a research institute as a programmer analyst in quantitative modeling, programming, and analysis.
