# Milliman DEPTH

## Optimize your benefits cost management strategy.

Milliman DEPTH™ is both a data-driven approach and an intuitive, visually dynamic tool for employer health benefit plan leaders. We distill your medical and prescription drug claims data into intelligible and actionable information, provided through a web-based dashboard. DEPTH is specifically designed to be a strategic planning tool for executive leadership. It empowers you to identify key performance drivers and achievable savings opportunities for your health benefits program, all based on deep Milliman data.

## Benefits

### Assess the effectiveness of your cost management strategy

Track changes over time with an easy to read, single source of truth for cost outcomes.

### Prioritize what matters for your population

Identify specific areas with the greatest potential for cost savings.

### Quantify savings opportunities

Measure achievable cost savings for your health benefit program.

### Assess current vendor relationships

Evaluate your carrier/TPA, PBM, disease management vendors, point solutions, and more.

## Features

### Customized cohorts

Discover potential savings for every subset of your population.

### Actionable insights

Use recommendations provided by employee benefits experts through the DEPTH interface.

### Enriched metrics

Add value to your existing data with DEPTH efficiency index and DEPTH opportunity scores.
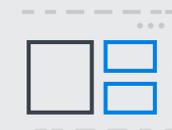

### Interactive and visual design

Discern key conclusions and potential strategies in minutes.
