

# Exposing inefficiencies in legal billing

Uncover costly patterns hidden in plain sight with Datalytics-Defense.

3,166

RECORDED INSTANCES  
IN THE PAST YEAR

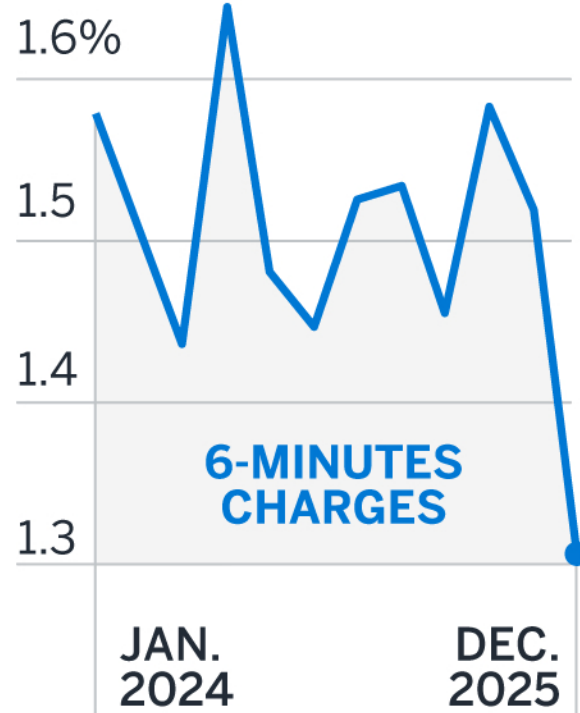

Are small charges adding up to big costs?

In the past year, there were 3,166 instances of timekeepers billing 10+ six-minute increments in a single day. These seemingly minor fees can drive up litigation costs without insurers even realizing it.

Datalytics-Defense helps uncover these patterns, giving claims teams the data they need to take action.

Are you tracking attorney billing trends?

How Datalytics-Defense helped a client change this trend:

Can attorneys truly bill 12+ hours in a day?

Our data shows 1,880 instances of timekeepers logging more than 12 hours in a single day. This raises concerns about accuracy, efficiency, and potential overbilling.

With Datalytics-Defense, insurers gain visibility into these trends to better manage legal spend and defense strategies.

How are you keeping track of attorney performance?

How Datalytics-Defense helped a client change this trend:

RECORDED INSTANCES  
IN THE PAST YEAR

Are attorneys handling too many claims per day?

This could mean inefficiencies or a lack of focus on complex cases.

Datalytics-Defense helps insurers identify these trends early to ensure claims get the attention they deserve.

Is your litigation strategy as cost-effective as it should be?

How Datalytics-Defense helped a client change this trend:
