

Cyber Collective Defense Consortium

Cybersecurity services to protect New York's energy grid

Protecting New York's Energy Grid Against Cyber Attacks

Join the NYPA Cyber Collective Defense Consortium (CCDC) today for no or low-cost access to **incident response planning services, readiness training, cyber hygiene assessments** and **information about security threats**.

NYPA knows that as municipal-owned utilities and rural cooperative customers, you can find yourselves in a tough spot when it comes to protecting against serious cyber challenges. Between budget constraints, small staff sizes and employees who wear many hats, it can be difficult to protect your computer systems and energy grids from:

- Ransomware
- Phishing
- Denial-of-service attacks
- Vulnerability gaps

With a strength in numbers mindset, the NYPA consortium provides you with a three-pronged approach with NYPA as an advisor and a resource.

Side fact

According to the North American Electric Reliability Corporation (NERC), the electricity industry has faced a security threat landscape that is “unprecedented and relentless.”

The most serious threats have come from:

- Geopolitical events
- New vulnerabilities
- Changes in technologies
- Cybercriminals and hackers
- Evolution of artificial intelligence (AI)

As part of the consortium, you will have access to these services:

- ✓ Review and refinement of your incident response plan
- ✓ Testing of the plan through cyber-threat exercises and drills
- ✓ Guidance and best-practice support
- ✓ Continuous network-monitoring

Here's a closer look of how you benefit by joining CCDC

Incident Response Readiness

NYPA acts as an advisor—reviewing or helping to create your incident response plan, policies and procedures. NYPA can recommend best practices, and can also run your team through cyber-threat drills and scenarios.

Cyber Hygiene Assessments

NYPA offers access to cybersecurity and infrastructure scanning and testing services from organizations including the Cybersecurity and Infrastructure Security Agency (CISA). NYPA offers these automated services at no or low-cost, and can help review the vulnerability reports and alerts.

Collective Defense

NYPA shares best practices, and can make you aware of threat trends. This strengthens your network visibility and provides intelligence to support informed decision-making.

Who's eligible?

NYPA's municipal electric utilities and rural electric cooperative customers are invited to join the Cyber Collective Defense Consortium. Stay informed, and gain access to actionable data that will help you identify vulnerabilities, respond to cyber attacks, and protect your assets.
