August 24, 2026

Dear Neighbor,

The New York Power Authority (NYPA) is reaching out to share information regarding its Uniondale Hub Substation Upgrade Project. NYPA is upgrading its existing Uniondale Hub Substation to support the interconnection of transmission and facilitate the delivery of energy to address increasing energy reliability concerns.

On August 17, NYPA received approval of its Environmental Management & Construction Plan (EM&CP) from the New York State Public Service Commission. The EM&CP details how the substation upgrade will be constructed safely and responsibly, including environmental protections, vegetation management, traffic considerations, civil construction activities, and restoration in accordance with the existing Certificate and approved Article VII Amendment. Construction at the upgrade site, located at 550 Stewart Avenue, will commence on or about September 8.

What does the upgrade entail?

The substation upgrade entails building additional new infrastructure on approximately 2.5 acres of existing utility-owned property adjacent to the current Uniondale Hub Substation. The new infrastructure will be primarily enclosed, which offers many advantages in terms of visual aesthetics, noise, safety and operations. Most of the work will take place within the fence line of the substation property.

What is the project timeline?

Construction at the site will begin on or about September 8 and is estimated to be completed in Q2 2029.

NYPA looks forward to keeping you informed about this upgrade project through regular updates and information on our website (www.nypa.gov/UniondaleHub). If you have any questions, please contact us using the email or phone number below. Thank you for your patience as we complete this important infrastructure project.

Sincerely,

James Certa
Director, Community Relations for Long Island
New York Power Authority
