Madison Reservoir Drawdown - Notice

This notice is to inform you that Madison Reservoir (Lake Moraine) is currently scheduled to be drawn down by approximately 10 feet (to elevation 1201 BCD) in order to facilitate the safe and efficient completion of New York State Canal Corporation's (NYSCC) upcoming proposed project to rehabilitate the dam. At this time, the drawdown is scheduled to begin in spring 2026 and the reservoir is anticipated to remain drawn down by 10 feet for two years, through 2027. The reservoir level is anticipated to return to typical levels by spring 2028 with the completion of the rehabilitation project. As an adjacent property owner, NYSCC encourages you to consider how you may be impacted and to plan and prepare accordingly for this temporary period.

How can I find out more?

Please visit NYSCC's project website by scanning the **QR code** or by navigating to:
