

How Autronic Plastics Found the Power to Succeed

Founded in 1953, Long Island's [Autronic Plastics](#) has grown from a small plastic molding company to an industry leading custom injection molder known for its commitment to excellence. When Autronics mapped a new growth plan, the ReCharge NY program from the New York Power Authority (NYPA) was pivotal in securing the firm's future on Long Island. In 2013, Autronics was allocated 436 kW of low-cost ReCharge NY power. That power allocation enabled Autronics to build a new future, including a new \$4M, 100,000 sq. foot facility in Central

Islip and a 20 percent employment increase. Supported by ReCharge NY 's stable 7-year power contracts, controlled costs and team of energy experts, the growth of Autronic Plastics exemplifies how ReCharge NY helps businesses of all size to strengthen operations, add and keep jobs and find the power to succeed.

"The new facility in Central Islip is equipped with cutting-edge infrastructure and equipment which will enable long-term economic success. Our decision to stay on Long Island was greatly influenced by incentives such as ReCharge NY."

Michael Lax, CEO of Autronic Plastics
