Am I eligible to work with NYPA on electrification projects?

Eligible organizations include government entities, businesses, and not-for-profits in New York State. These include local governments, municipalities, state agencies, hospitals, K-12 schools, and universities. We can work with your business on electrification projects if you are a power supply customer (such as a customer of WNY, ReCharge NY, or Preservation Power).

What type of electrification projects does NYPA do?

NYPA provides services ranging from geothermal, thermal networks, heat pumps, boiler/chiller electrification, load reduction and concurrent heating and cooling, and steam conversion. We provide turnkey expert support ranging from strategic planning and advisory to site audits and installation.

Why should I work with NYPA instead of another organization?

With NYPA, you get an objective turnkey solution supported by NYPA's strong technical experts. We are a true partner - working on your behalf to identify and implement the best solution for your specific needs.

Can NYPA help me plan electrification projects that have no upfront costs?

Yes. We structure each project to meet your financial needs. We have capital investment structures with no upfront cost, and opportunities to provide on-bill financing. We are up to date on State and Federal incentives and grants to help you develop your clean energy project with full financial transparency. NYPA continuously searches for opportunities to achieve savings for you.

Contact energysolutions@nypa.gov for more information

Can you help me identify State and Federal grants and incentives for my project?

NYPA offers grants to eligible businesses. Learn more about our [Grant Services & Programs](#).

I own a business in New York State. Can you help me with electrification projects at my location? How large or small are the projects that NYPA supports?

Yes. NYPA can provide electrification support for business if you are currently purchasing power from NYPA through any of our hydropower programs (WNY, ReCharge NY, or Preservation Power). NYPA generally works on projects that are over \$500,000 where the technical expertise of NYPA, makes a difference.

Can you help me meet Climate Leadership and Community Protection Act (CLCPA) or BuildSmart 2025 goals?

Yes. State Agencies in New York State are moving towards BuildSmart 2025 goals. For these state agencies, we can identify and implement the projects that will provide the most impactful energy savings that qualify towards BuildSmart 2025.

How can I learn more about your services?

Contact us to learn more about electrification services or send an email to energysolutions@nypa.gov.
