---

### **Can the NY Power Authority tell me the status of my System Reliability Impact Study (SRIS)?**

SRIS status is available in your NYISO Portal account. The NY Power Authority does not have additional information beyond what is provided in the NYISO portal and cannot influence progress.

---

### **We have our own engineers. Why should I hire a New York State interconnection / NYISO-experienced firm?**

Hiring an engineering firm that is experienced with New York State load interconnections will help to navigate the NYISO process more seamlessly. They know what information is required, can identify major risks and fatal flaws, provide guidance on long lead time equipment, and can mitigate potential delays in construction.

---

### **Who is responsible for the interconnection costs?**

The customer is responsible for all costs associated with the new load, such as new and/or upgraded equipment required, engineering, materials, land acquisition, Load Serving Entity (LSE), and the NY Power Authority technical support.

---

### **Can the NY Power Authority tell me whether the line I want to interconnect to is capable of serving my load?**

The available capacity/capability of an existing line is determined during the NYISO System Reliability Impact Study (SRIS). If available, the existing capability of the line is provided on a first-come, first-served basis. If not available, then the SRIS will identify upgrades the developer would need to make to serve their load.
