

MOD6+ Prime Distribution Board

Scalable, standards-compliant &
built for your next project

OFFICIAL ACCREDITED PARTNER OF NHP

MOD6+ PRIME

Industry-leading distribution boards
built for performance and flexibility

Meet the trusted custom-built distribution board solution, designed to meet your project's exact requirements. Fully tested and compliant with AS/NZS 61439, MOD6+ Prime delivers reliable, flexible, and high-quality performance for a wide range of applications.

Flexible design for side-by-side and multi-tier builds

IP56 protection

AS/NZS 61439 compliant and fully tested

Smart cable entry that simplifies installation

Secure doors with sealed and hinged protection

MOD6+ Prime distribution boards are available exclusively through NHP's **Accredited Partners** across New Zealand. Talk to your local accredited expert today.

Why MOD6+ is the smart choice

Build exactly what your project needs	A flexible system that scales from small installations to larger multi-board assemblies
Confidence in all conditions	IP56 protection and AS/NZS compliance ensure reliable indoor and outdoor performance
Safe, secure access	Continuous door seal and hinged masking panel improve safety and simplify maintenance
Dedicated cable way	Smart internal layout with side cable entry, aluminium gland plate, and optional earth and neutral bars reduces congestion and improves cable organisation
Ready for the right functionality	Accepts MOD6+ & DIN-T MCB's, with options like metering, emergency/security lighting control, surge protection, and extra DIN rail capacity when needed

Tailored for your projects needs

STANDARD INCLUSIONS	POPULAR ADD-ONS & OPTIONS
