

CHILLVENTA 2026 – NEW HALL CONCEPT OFFERS MORE SPACE AND OPPORTUNITIES

Chillventa remains fully committed to focusing on refrigeration, air conditioning, ventilation and heat pumps.

It has expanded the exhibition area to include an additional hall and the event now offers even more opportunities for exhibitors.

Benefits of the additional hall

- + More space and potential for existing and new exhibitors
- + Continued focus on key industry themes
- + Improved visitor flow thanks to the optimised hall concept
- + Expanded exhibition space enables long-term growth opportunities for exhibitors in their respective sectors

NEW HALL CONCEPT

Refrigeration

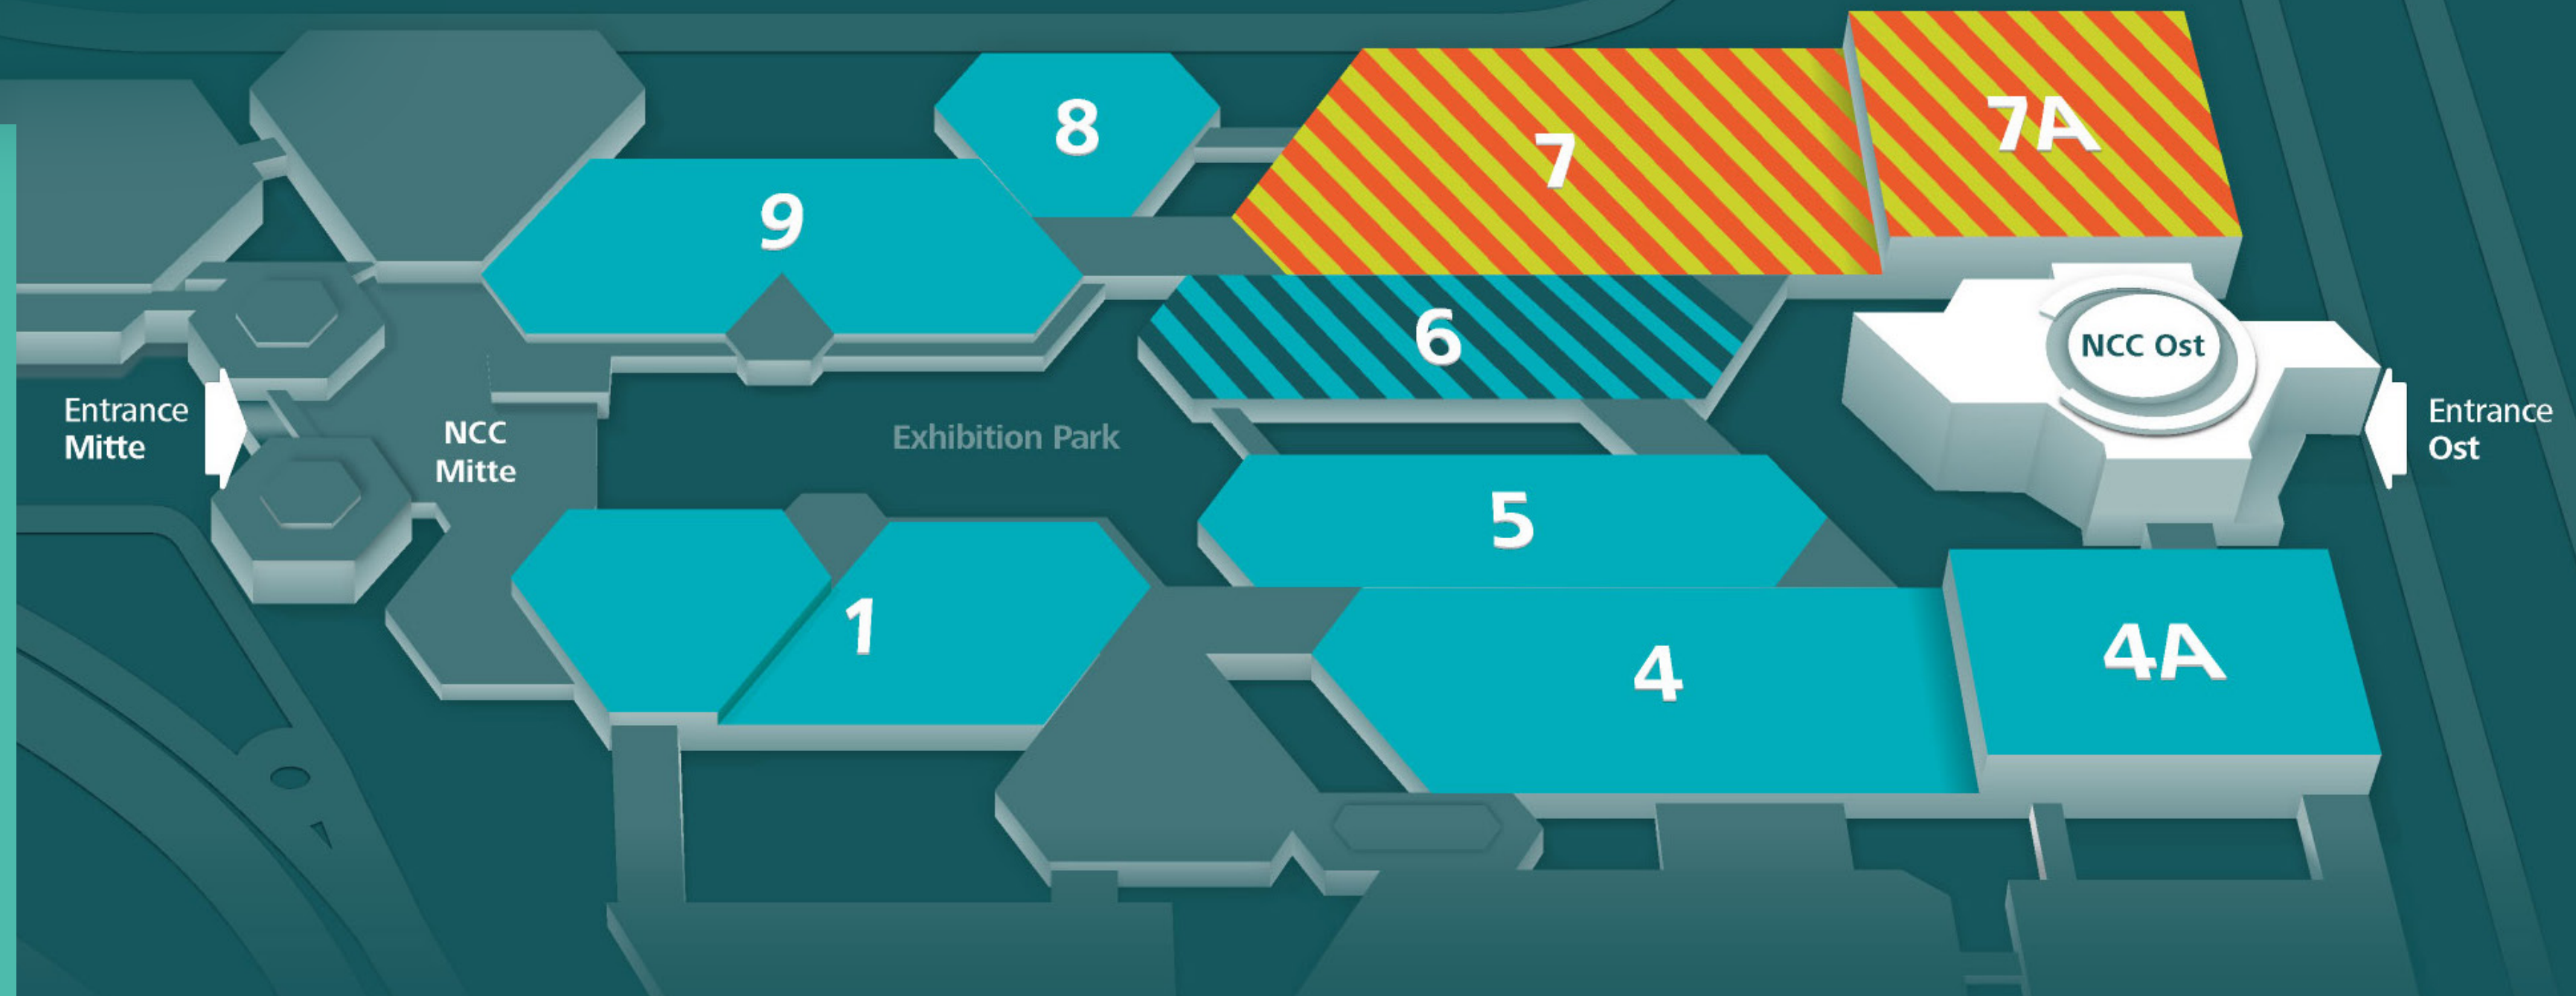

- The exhibition space has been expanded to include Hall 1. Exhibitors previously in Hall 7 will now present their portfolio in Halls 1 and 4, **creating even more growth opportunities for refrigeration technology.**
- Most of the refrigeration sector from Hall 7A will be relocated to Hall 4A.
- The key refrigeration areas in Halls 8 and 9 will remain unchanged for the most part.

Air conditioning, ventilation and heat pumps

- Halls 4 and 4A will be mirrored in Halls 7 and 7A.

Instrumentation, control and automation (ICA)

- The main portfolios showcased in Halls 5 and 6 will be swapped over, so that ICA technology will now be presented in Hall 6.
