

### PRESS RELEASE

July 2021

### Preparations for Chillventa 2022 start with new website

Following the Chillventa eSpecial 2020, and after four years without an in-person gathering, the world's leading exhibition for refrigeration, which also covers AC, ventilation and heat pump technology, is being planned to again bring together experts from all around the world face-to-face at Exhibition Centre Nuremberg from 11 to 13 October 2022. As usual, the high-calibre Chillventa CONGRESS is planned to take place the day before the exhibition, on 10 October 2022. Exhibitors can register for the event now. The new Chillventa website offers an improved user experience and provides even more focused information.

At long last you will be able to network in person again, marvel at innovations in live demonstrations, and take advantage of the opportunity for professional development. Chillventa will offer all this and more, thanks to its unique product display covering the entire spectrum of refrigeration, AC, ventilation and heat pump technology. In the trade forums, Chillventa CONGRESS and extensive supporting programme the spotlight will be on trending issues like energy performance, contributing to the energy revolution, combined cooling and heating, and the cooling of data centres. The event will also look at topics like the circular economy and the cold chain in the pharmaceutical sector. With its extensive range of exhibits, Chillventa presents the entire supply chain for the industry with components, systems and applications as well as innovations and services for refrigeration, AC, ventilation and heat pumps.

"We are preparing to finally see our exhibition halls back in action again and to welcoming the international refrigeration, AC, ventilation and heat pump community in person to Nuremberg. We are sure that the kind of platform offered by Chillventa is now more in demand than ever and are confident that it will build on its successful 2018 round," says Daniela Heinkel, Director of Chillventa at NürnbergMesse.
