

## PRESS RELEASE

December 2023

### A strong tailwind for Chillventa 2024

The international refrigeration, AC, ventilation and heat pump community should be sure not to miss the world's leading fair for refrigeration technology: From 8 to 10 October 2024, Chillventa in Nuremberg will once again showcase the key trends and innovations in refrigeration, AC, ventilation, heat pump and insulation technology and automation. Preparations are in full swing for the exciting and wide-ranging supporting programme including forums, special presentations, and guided tours. The Chillventa CONGRESS on the day before the trade fair is once again set to be a special knowledge highlight.

“Buoyed by the success of the magnificent European Heat Pump Summit 2023, we are now fully focused on the next major reunion at Chillventa in October 2024. Exhibitors from all around the world are looking forward to the standout event in autumn next year. We are almost fully booked, with 95% of stand spots already taken. This fantastic commitment is overwhelming, and we are already looking forward to three exciting trade fair days,” says Daniela Heinkel, Director of Chillventa at NürnbergMesse.

#### Discover exhibitors and products online now

All exhibitors currently registered can be found in the comprehensive and regularly updated exhibitor and product database on the Chillventa website:

### **Extensive supporting programme**

“In 2024, visitors can yet again look forward to a wide-ranging supporting programme that is always developed in line with the latest trends and issues affecting the sector,” says Heinkel.

The four specialist forums deliver excellent knowledge first-hand. In three of the forums, exhibitors present their latest products and solutions to the experts in attendance, covering topics like applications, training and codes of practice, climate, ventilation and heat pumps, and refrigeration technology. The forum A PRACTICAL GUIDE TO DIGITISATION will also be back with advice for skilled trade businesses in 2024. The supporting programme has a whole lot more to offer: With numerous special presentations, guided tours and competitions like the German Championship for Refrigeration Technicians, Chillventa once again offers great added value. The mehrmacher platform presents its innovative “reverse recruiting” approach at the special display area JobMatch: As potential employers, companies at Chillventa can advertise their vacancies for skilled personnel. High-calibre speakers will share their expertise from research, development and industrial practice at the Chillventa CONGRESS, which is held as always on the day before the exhibition.
