From Understanding Change to Creating Opportunities

EUROGUSS
Executive Circle

What is the Executive Circle?

The Leadership Forum for the Die Casting Industry

Executive Exchange

An exclusive forum bringing together senior executives and industry leaders from across the die-casting value chain.

Curated Dialogue

Selected participants, moderated discussions and Executive Dialogues create space for honest exchange and practical insights.

Strategic Perspectives

Explore the trends, markets and strategic decisions shaping the future of the die-casting industry.

Forward-Thinking. Transformative. Impactful.

Why Industry Leaders Join the Executive Circle 2027

EUROGUSS Executive Circle

The die-casting industry is entering a new era. Automotive markets are changing, global competition is intensifying, and new opportunities are emerging beyond traditional applications. The challenge is no longer whether the industry will transform, but how companies can successfully shape that transformation.

At the Executive Circle 2027, industry leaders come together to understand change, identify opportunities and define the actions that matter most.

Why join?

Validate Your Strategy
Discuss Europe's competitiveness, global market shifts, and OEM expectations with industry leaders from Europe, the US and China.

Discover New Growth Opportunities
Explore future business areas beyond automotive, including robotics, aerospace, defence and other emerging applications for die-cast components.

Exchange Ideas with the Right People
Join open discussions with CEOs, owners, OEMs and industry experts from across the die-casting value chain.
