

Converting meets Packaging

FACHPACK is the European trade fair for packaging, technology and processes and is therefore an important guide for the packaging industry and its customers. At FACHPACK, the focus is on forward-looking solutions along the entire value chain: from materials and machines to innovative packaging solutions.

With the new joint stand **Converting meets Packaging**, a central element will take centre stage: the close connection between the converting sector and the packaging industry. Converting meets Packaging creates a thematically curated platform for companies working at this interface: for example in the areas of finishing, coating, printing, laminating, adhesive technology or flexible packaging development.

The stand is co-organised by FACHPACK and its partner M2N Media, which provides additional input with its deep industry involvement.

Be there, get to know our exhibition and take the opportunity to present your company to an interested professional audience.

Exemplary representations, no legal claim.
