

# IND EX<sup>®</sup> Explosion Safety Forum 2025

coinciding with

**POWTECH**   
**TECHNOPHARM**

Wednesday, 24 September 2025  
Venue: Messezentrum  
90471 Nuremberg, Germany

At this year's POWTECH in Nuremberg, our association will once again be proudly represented. We will be hosting a half-day IND EX<sup>®</sup> Explosion Safety Forum on September 24, 2025.

This event offers a unique opportunity to engage with leading professionals in the field, gain insights from real-life experiences, and discuss current challenges and solutions. Expand your expertise, benefit from the know-how of others, and grow your professional network through valuable new connections.

# Program

Wednesday, 24 September 2025

13:00 | **Welcome and introduction** by Dr. Johannes Lottermann, Aleksandar Agatonović IND EX® e. V.

13:30 | **Lessons learned from recent dust explosions and incidents** by Dr. Kees van Wingerden, IND EX® e. V.

Why does it still go wrong? Do we never learn or could these accidents not have been prevented?

14:00 | **Difference of Explosion Isolation of gases and dusts** by Alexander Heuberger, PROTEGO Jürgen Kern, RICO Sicherheitstechnik AG

14:30 | **Real process conditions in laboratory scale – latest adoptions to 20l sphere and MIKE 3** by Roland Bunse, REMBE® Research+Technology Center GmbH

15:00 | *Break*

15:30 | **Ignition prevention in dryers: self-ignition of dusts** by Dr. Mark Scheid, FireEx Consultant GmbH

The probability and possibility of self-ignition in the light of prevailing process conditions and dust properties. Introduction of TSTools.

16:00 | **Functional Safety in Explosion Protection Approaches** by Andreas Brandl, IEP Technologies GmbH

16:30 | **Effect of the shape of vent openings on the efficiency of venting devices** by Marius Bloching, REMBE® GmbH Safety+Control

Experimental research demonstrates a strong improvement of the efficiency of venting devices for rectangular shaped venting devices

16:45 | **Close day** by Dr. Kees van Wingerden, IND EX® e. V.
