It is that time again!

**Anticipation is growing:
Network with security experts from
around the world at Perimeter Protection.**

Outdoor security in a nutshell. Discover a combination of a comprehensive market overview and practical expertise that is unique anywhere in Europe.

Innovations in mechanics, electrics and electronics come together here in the latest products and solutions to ensure ideal protection for systems, buildings and open areas.

And very topical: The latest draft of the Umbrella Act on Critical Infrastructure (CRITIS) requires operators of critical systems to ensure appropriate physical protection for their premises and systems. Measures include fences, barriers, access controls and detection devices, in addition to instruments and procedures to monitor the surrounding area.

**Come to Perimeter Protection and learn about
innovative applications using sensors, drones
and cameras to protect your systems!**

Find answers to your security questions here.

96%

were satisfied with the range of products and services presented at Perimeter Protection 2023

96%

would recommend the visit to colleagues and business partners

98%

were satisfied with their visit to Perimeter Protection 2023

The meeting place for the key players in the industry.

Expand your network, make new business contacts and discover innovations:

perimeter-protection.de/visit

By professionals for professionals:

The specialist forum at Perimeter Protection 2025 will enable businesses and institutions to present their subject-area expertise and products and services on all aspects of perimeter protection, fencing systems, building security and unmanned technologies to visitors to the exhibition and product presentations. The specialist forum is organized in partnership with the VfS (German Association for Security Technology) and UAV DACH (DACH Association for Unmanned Aviation), so you can be sure of the opportunity to learn about the latest topics from the presentations and pick up the latest sector developments and innovations first-hand.

Highlights of the free lecture programme:

- The requirements of the Umbrella CRITIS Act and the use of drones and drone detection in the context of CRITIS
- New developments and requirements in perimeter security
- Large-scale surveillance and boundary protection from the air
- Efficiency and automation: Filling the skilled labour gap using drones
- Anti-drone defence: Empirical values from major events

U.T.SEC

@Perimeter Protection

Platform for Drones,
Unmanned Technologies
& Security

A quantum leap for official and civil security:

U.T.SEC – Summit for Drones, Unmanned Technologies & Security has been integrated into Perimeter Protection as a Special Exhibition Area since 2023, providing a platform for the future-oriented theme of unmanned vehicles – with a focus on utilization in outdoor security. Until recently, drones and other unmanned technologies were the preserve of a small group of visionaries, but they have since become an essential part of building and site security.

Product range:

Fences and fence systems // gates and gate systems // personnel and vehicle access barriers // electronic alarm systems // exterior lighting // ballistic protected products and systems // drone detection and defence // tools and machines // official agencies, services, associations, publishers

Expand your knowledge!
