We Secure Your Corporate Identity

Intragen is a market-leading next-generation IAM partner in delivering IGA as-a-Service. Our track record spans over 15 years of protecting medium to large corporate enterprises and public sector organisations, including healthcare and higher education, by securing their digital identities.

Intra1 is Intragen's One Identity-based solution, developed to accelerate project implementation whilst minimising risk and cost. Our European team is based in the UK, Netherlands, Germany, Finland and Sweden.

Assessment of Market

IAM Market Challenges

The current approach to IGA is fundamentally flawed. With the enormous skills shortage and incredibly complex requirements in any deployment, **the market insight shows that 76% of customers are unsatisfied with their IGA solution.**

The market relies on a small number of SI's and a collection of small partners to deliver IGA transformation solutions to greenfield or brownfield sites.

The model is very traditional, with an element of business consulting, professional services and then some post-deployment support. This is generally procured as a T&M or Fixed price service engagement.

As the scope is so varied, **the time to value and return on investment is very difficult to justify** and measure. And in many cases, customers decide to have a tactical solution that acts as a tick box exercise, i.e. AD.

This is inherently flawed as any environment is in a constant state of change, and a low level of internal skill means the **environment degrades over time**. Customers find themselves with a false sense of security in their IGA solution that could lead to a significant breach.

The skills shortage in the market of 3.5m open cyber roles in 2021 means that this traditional approach has been and will no longer deliver value and meaningful client outcomes.

Our Approach

Intragen is the next-gen IAM partner that wishes to fundamentally change how IGA solutions are procured, deployed and managed. **We are here to disrupt the market and lead change**

We have launched our **industry-leading IGA aaS proposition** powered by market-leading software One Identity and Intra1 and managed by industry experts across Europe, ensuring you receive a world-class aaS IGA solution that has a near immediate time to value, exceptionally high standards

Intragen's BC team will work with you to understand your exposure and create a **phased transformation approach** to your IGA aaS Solution by determining the priority order of enabling parts of the business. We use our proven process to roll out to wider parts of the business, ensuring that the work done so far delivers protection and value.

We believe that our Intra1 platform that powers our managed service **reduces the need for Senior consultants to manage an environment by up to 70%**; when combined with our innovative 'deployment card' methodology, we can demonstrate incredible ROI while addressing the skills shortage in the market.

Our approach focuses solely on an outcome and allows you to get your IGA requirement running as quickly as is reasonably possible.

Investment vs value

Role model automation
Privileged user automation
New application automation (JML)
Access Control Request & Approval
Identity information visible for employees
Access Control Token registration and revocation
External attribute automation for target system
Self-service
Guest user automation

What is Next Generation IAM ?

Our vision: "To be Europe's next-gen IAM partner for the modern enterprise"

Legacy

Complex sales process

- Customers find IAM hard to understand: "We don't know our use cases. What should we buy?"
- RFI, and RFP processes are long and complex, leading to frustration for both buyer and seller
- Client unease often leads to lengthy contract negotiations.

Legacy delivery model

- Selling *people* and *time*, not **outcomes**
- Long and challenging requirements capture phases
- Methods for building, sharing and updating deliverables (technical artefacts, documentation) are inefficient.

Moving target

- Complex projects are subject to continual change
- Time is lost managing scope creep, change requests and contract variations – rather than focusing on the quality of delivery.

Next gen

'Wow-effect' from sales to delivery

- Easy-to-buy – through clearly defined, best-practice offerings.
- Timely, clear and concise engagement with stakeholders at all stages
- Digital collaboration – covering templates, governance, deliverables, and documentation (via wiki / Jira)

Standardised and fixed-fee solutions

- Intragen Deployment Cards deliver best-practice results
- Solution delivery is more efficient for all (flexible resourcing, faster delivery, quality assurance)

IGA aaS

- As-a-service models deliver complete functionality
- Promote innovations, edge of technology solutions
- Trusted advisor relationship adds value across the customer's business

intra1 Base

- Core package for the base
- intra1 subscription package (right to use)

intra1 Enterprise

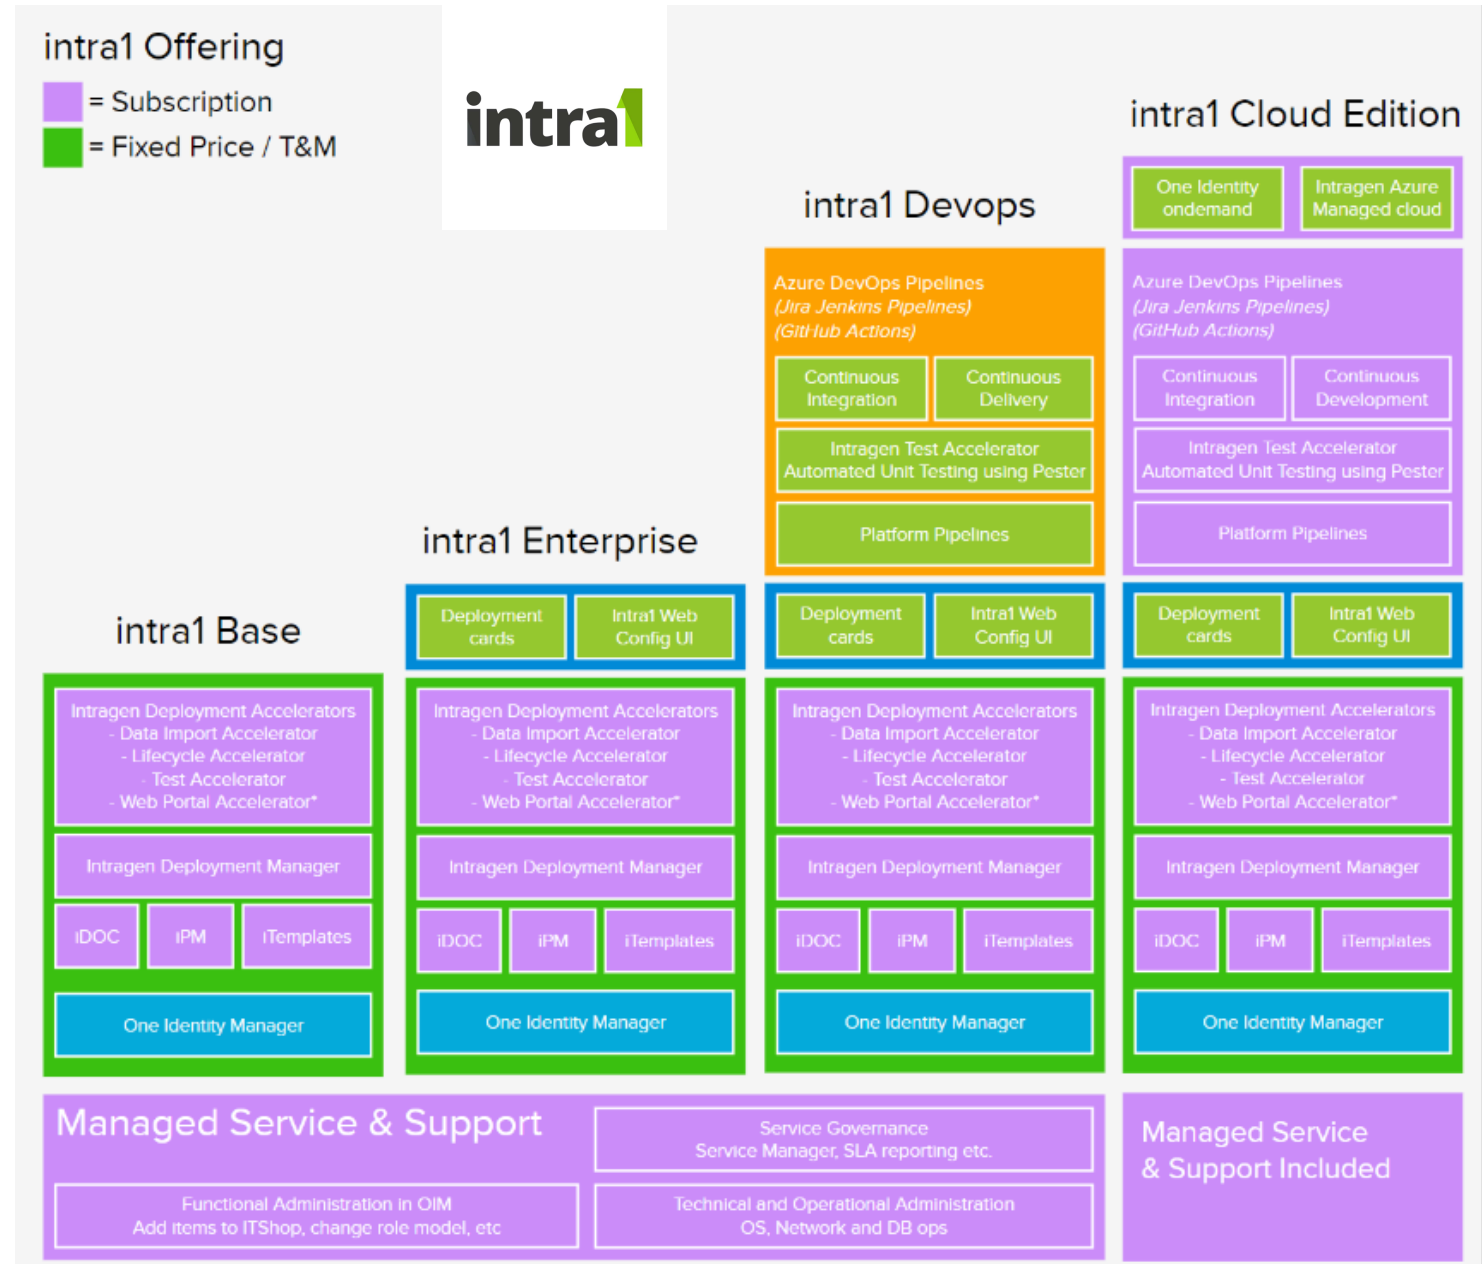

- Fixed fee deployment cards
- Easy to use admin tool for quick implementation

intra1 DevOps

- Inragen DevOps methodologies and tools (Atlassian or Microsoft)

intra1 Cloud Edition

- Managed on-premise or hybrid offering

Intra 1 Webinterface – Live Demo on our Stand!

Account provisioning

Here you can set up how various properties of accounts are set, for instance account names (logins) and email addresses.

Account name format

LastNamFir#

Between seven and five letters of FirstName followed by

Internal display name format

LastName, FirstName (Account)

LastName, FirstName (Account)

Joiner policy

In the Joiner Policy, you can control when a new joiner needs their account(s) to be created.

First Manager Notification

First Service Desk Notification

Second Manager Notification

Second Service Desk Notification

Mover policy

When a person moves within the organisation you can decide what happens to any access they had requested. You need to decide what changes to a person's access you want to make.

Triggers

Choose one or more of the following to control

☒ Department
 ☒ Location
 ☐ Cost Centre
 ☒ Identity Type

Action

User lifecycle

Intra1 will give appropriate access when a person joins, adjusts that access as they move through the organisation and remove it when they leave. You can inform managers, service desk personnel and people themselves about changes through email. You can also control when accounts are created, activated, de-activated and deleted.

Leaver policy

Here you can set when email notifications are sent when a person is due to leave and when their account(s) are de-activated and deleted.

 <p>First Leaver Notification</p>	1 month before leaving date	Edit
 <p>Second Leaver Notification</p>	2 weeks before leaving date	Edit

Closing Remarks

We use One Identity as the IGA platform as an industry leader as we believe it can meet almost any requirement a customer may have now or in the future.

Our approach is based on Kaizen. As a business, we make small but meaningful progress daily and ensure our customers get excellent service.

The 16 years of experience we have in delivering hundreds of solutions in over 10 European countries enables us to simplify the whole engagement and align with customer needs.

All our solutions are hybrid cloud-enabled.

Our approach focuses solely on an outcome and allows you to get your IGA Operational in 12 weeks!

We are here to disrupt the market and lead change in something that is fundamentally not working.

We understand that this is very forward-thinking, but we can still deliver in a traditional format, but you choose a partner that is thinking of the future!
