Achieving Identity Based Connectivity with Cyolo

Mitigate Risk of Breach

- MFA & SSO to any app and resource
- End-to-end encryption & continuous authorization
- Secrets vault
- Application access instead of network access

Increase Operational Productivity

- Just in time access
- Disaster Recovery
- Integrate with all IdPs, support multiple idPs
- Identity federation
- Local IDP
- Work with any device & BYOD

Seamlessly Adapted by End Users

- Web and native application support
- Agentless
- Fastest ZTNA by design
- Just in time access
- Android, iOS
- Windows, iOS, Linux

Simplify Compliance Reporting

- Supervised Access
- Session recording
- Cloud or Private PoP
- Full audit trail
- Integrate with security tools and SIEMs

What Our Customers are Saying

Dror Hevlin
CISO, Solar Edge
IT Customer

With diverse users, including third parties, we were able to **ensure productivity** and maintain business continuity, **without compromising our security.**"

Guy Shamilov
CISO, Varonis
IT Customer

Cyolo provides user access in the most **flexible and secure** way. All data is stored securely, even the vendor **isn't exposed to our most sensitive information.**"

Shlomo Kamilyan
CISO & CIO, Rapac Energy
OT Customer

No solution gives me so much control and security like Cyolo. **It's everything I need in one solution."**

Stefan Keller
CTO, SASE, Open Systems,
Service Provider

We looked at many zero trust network access vendors and found Cyolo to be both the most **comprehensive** and mature solution, and also the one that **best integrates** with our SASE offering."

Miki Tanaka
Global Service Director, IIJ
Service Provider

We spent a long time looking for a Zero Trust partner for our new secure access service. Cyolo is an ideal partner, with its **cutting-edge technology** that offers real Zero Trust. The Cyolo solution now works as our core service engine, **enabling users to securely access their resources."**

Thank You!

See you at **Halle 7 Stand 243** for a live demo
