

360 AutoXDR™

Cybersecurity made easy

Cynet's Vision

is to enable lean security teams to put their **cybersecurity on autopilot** and focus their limited resources on managing security rather than operating it.

State of Cybersecurity

The cybersecurity challenges businesses are facing are getting worse:

- Attacks' frequency and complexity are rising
- Costs of breaches are increasing
- Most organizations lack available resources
- IT Security expected to do more with less

The security solutions available to solve these challenges are designed for highly resourced teams:

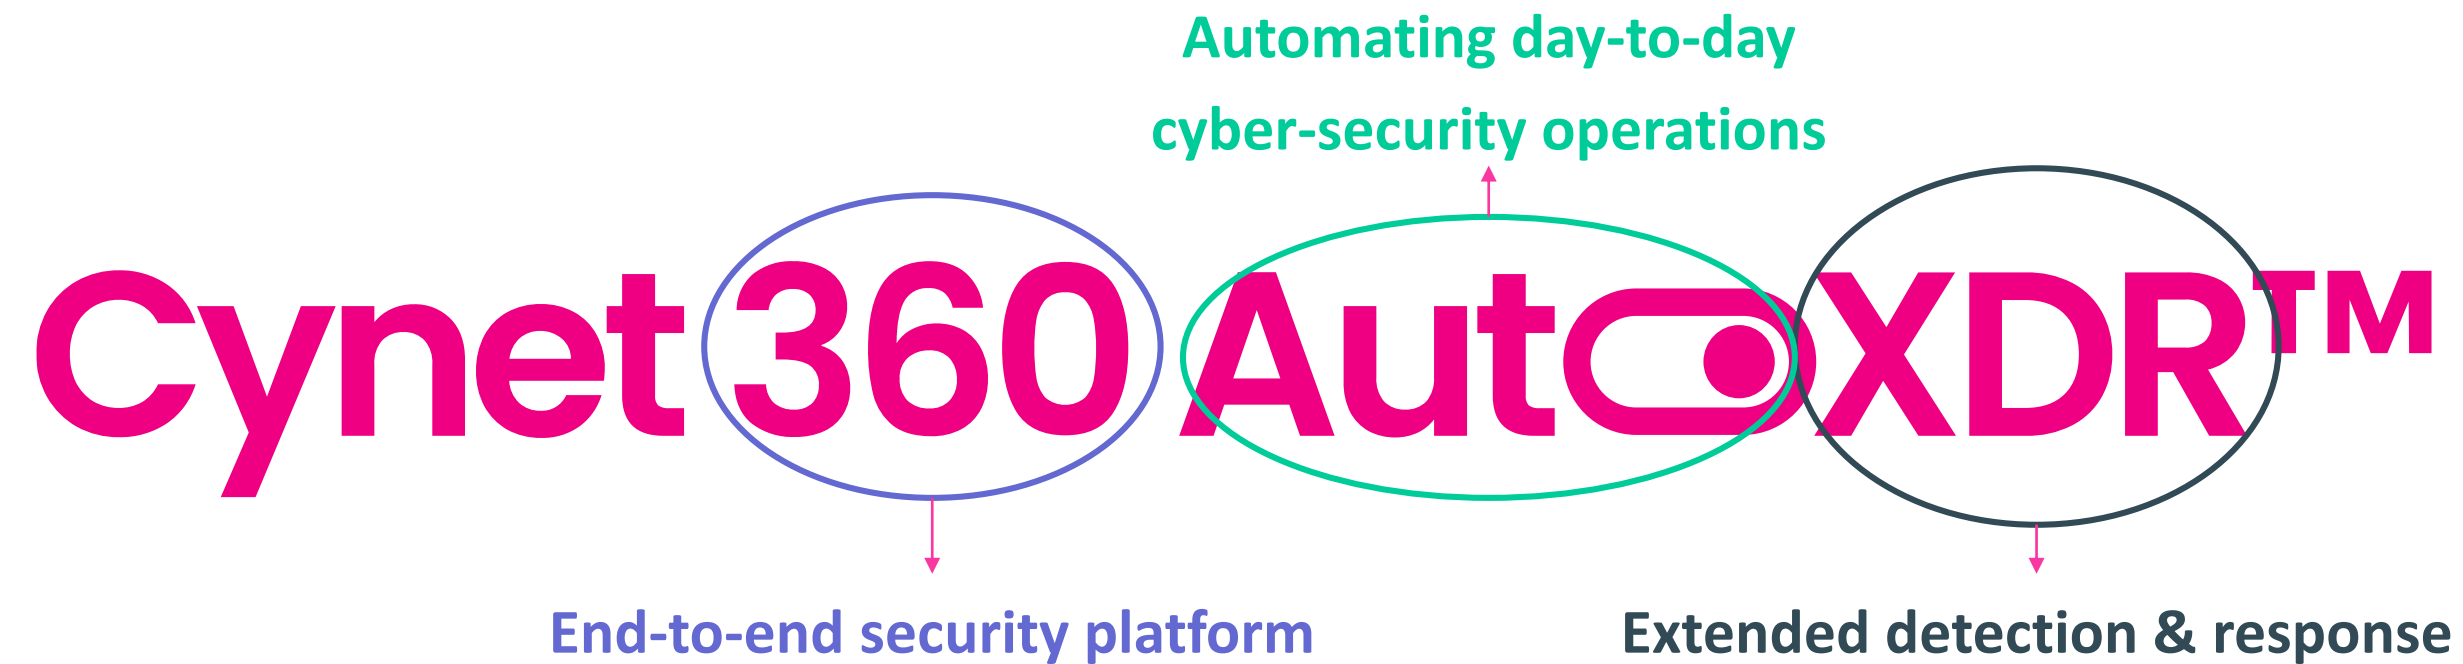

- Many Security Tools, require many integrations
- Complex, Lack of Visibility
- High false positives rate
- manual, time consuming remediation
- Lack 24/7 complementary MDR
- cost intensive

What Is Cynet 360?

A new approach

Purpose-built for lean IT Security teams

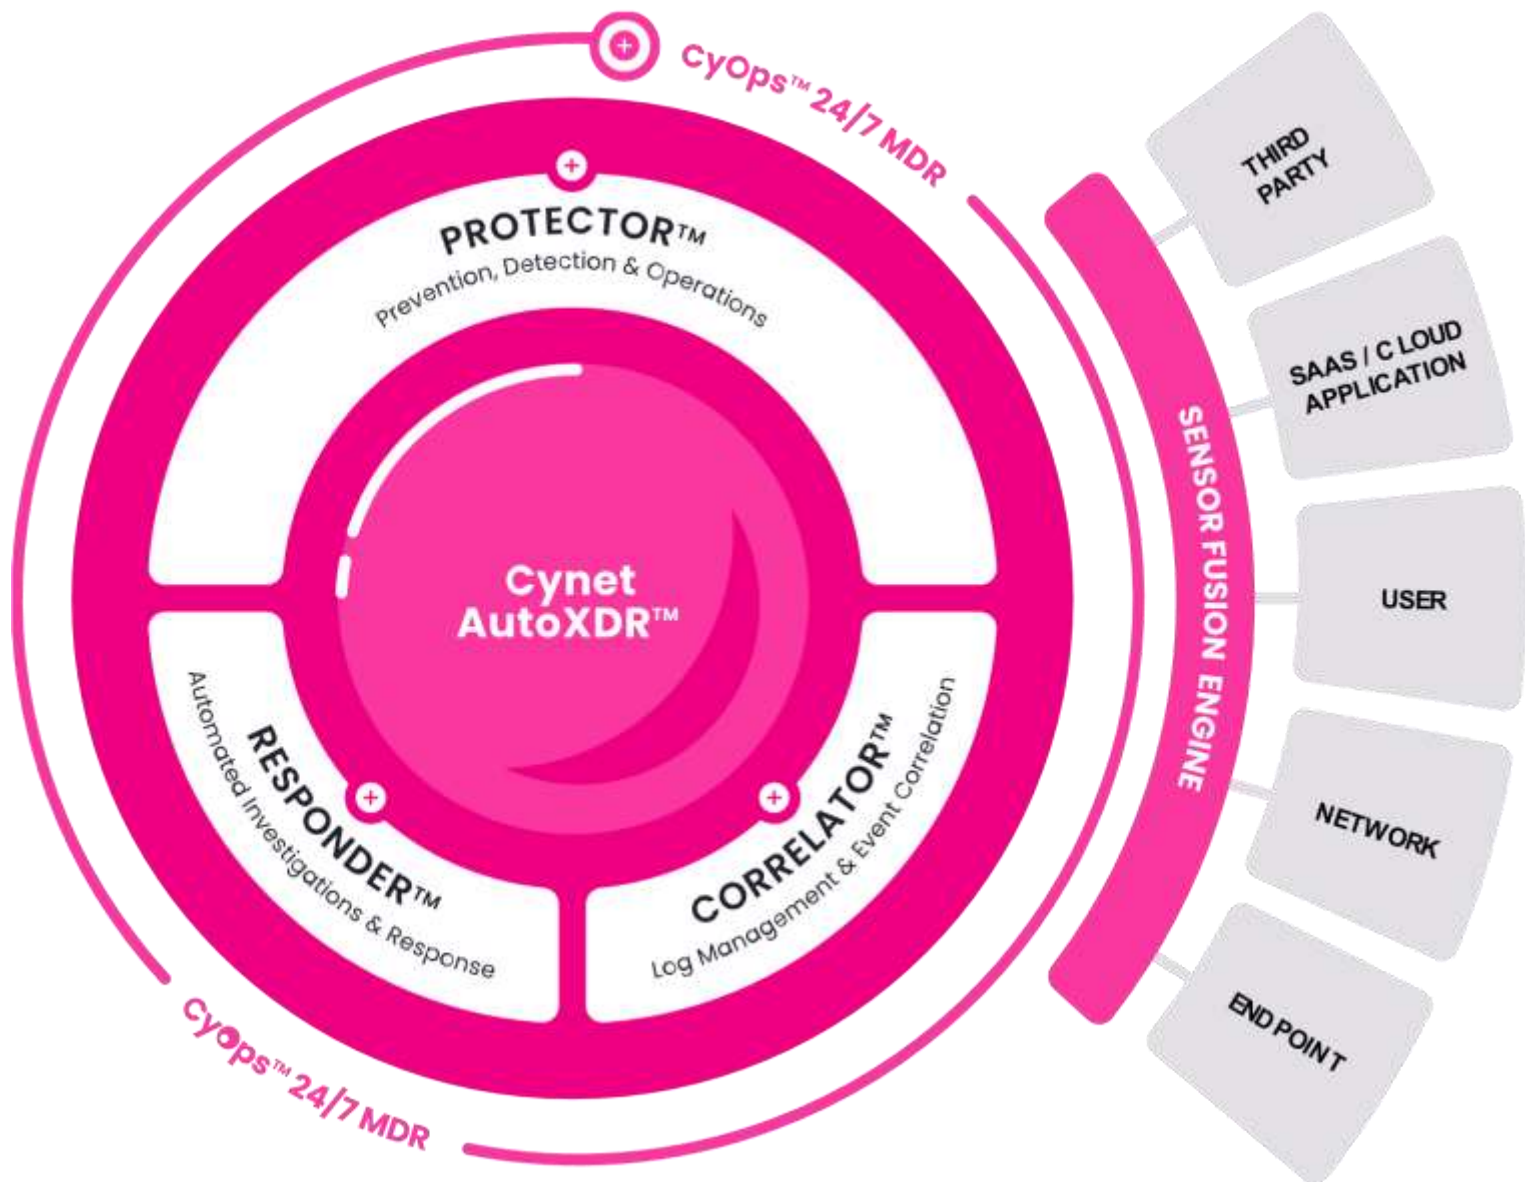

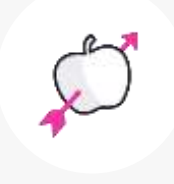

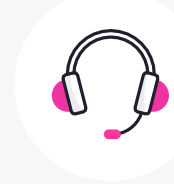

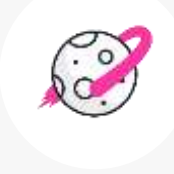

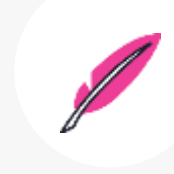

Cynet 360 AutoXDR™

Purpose-built for lean IT Security teams

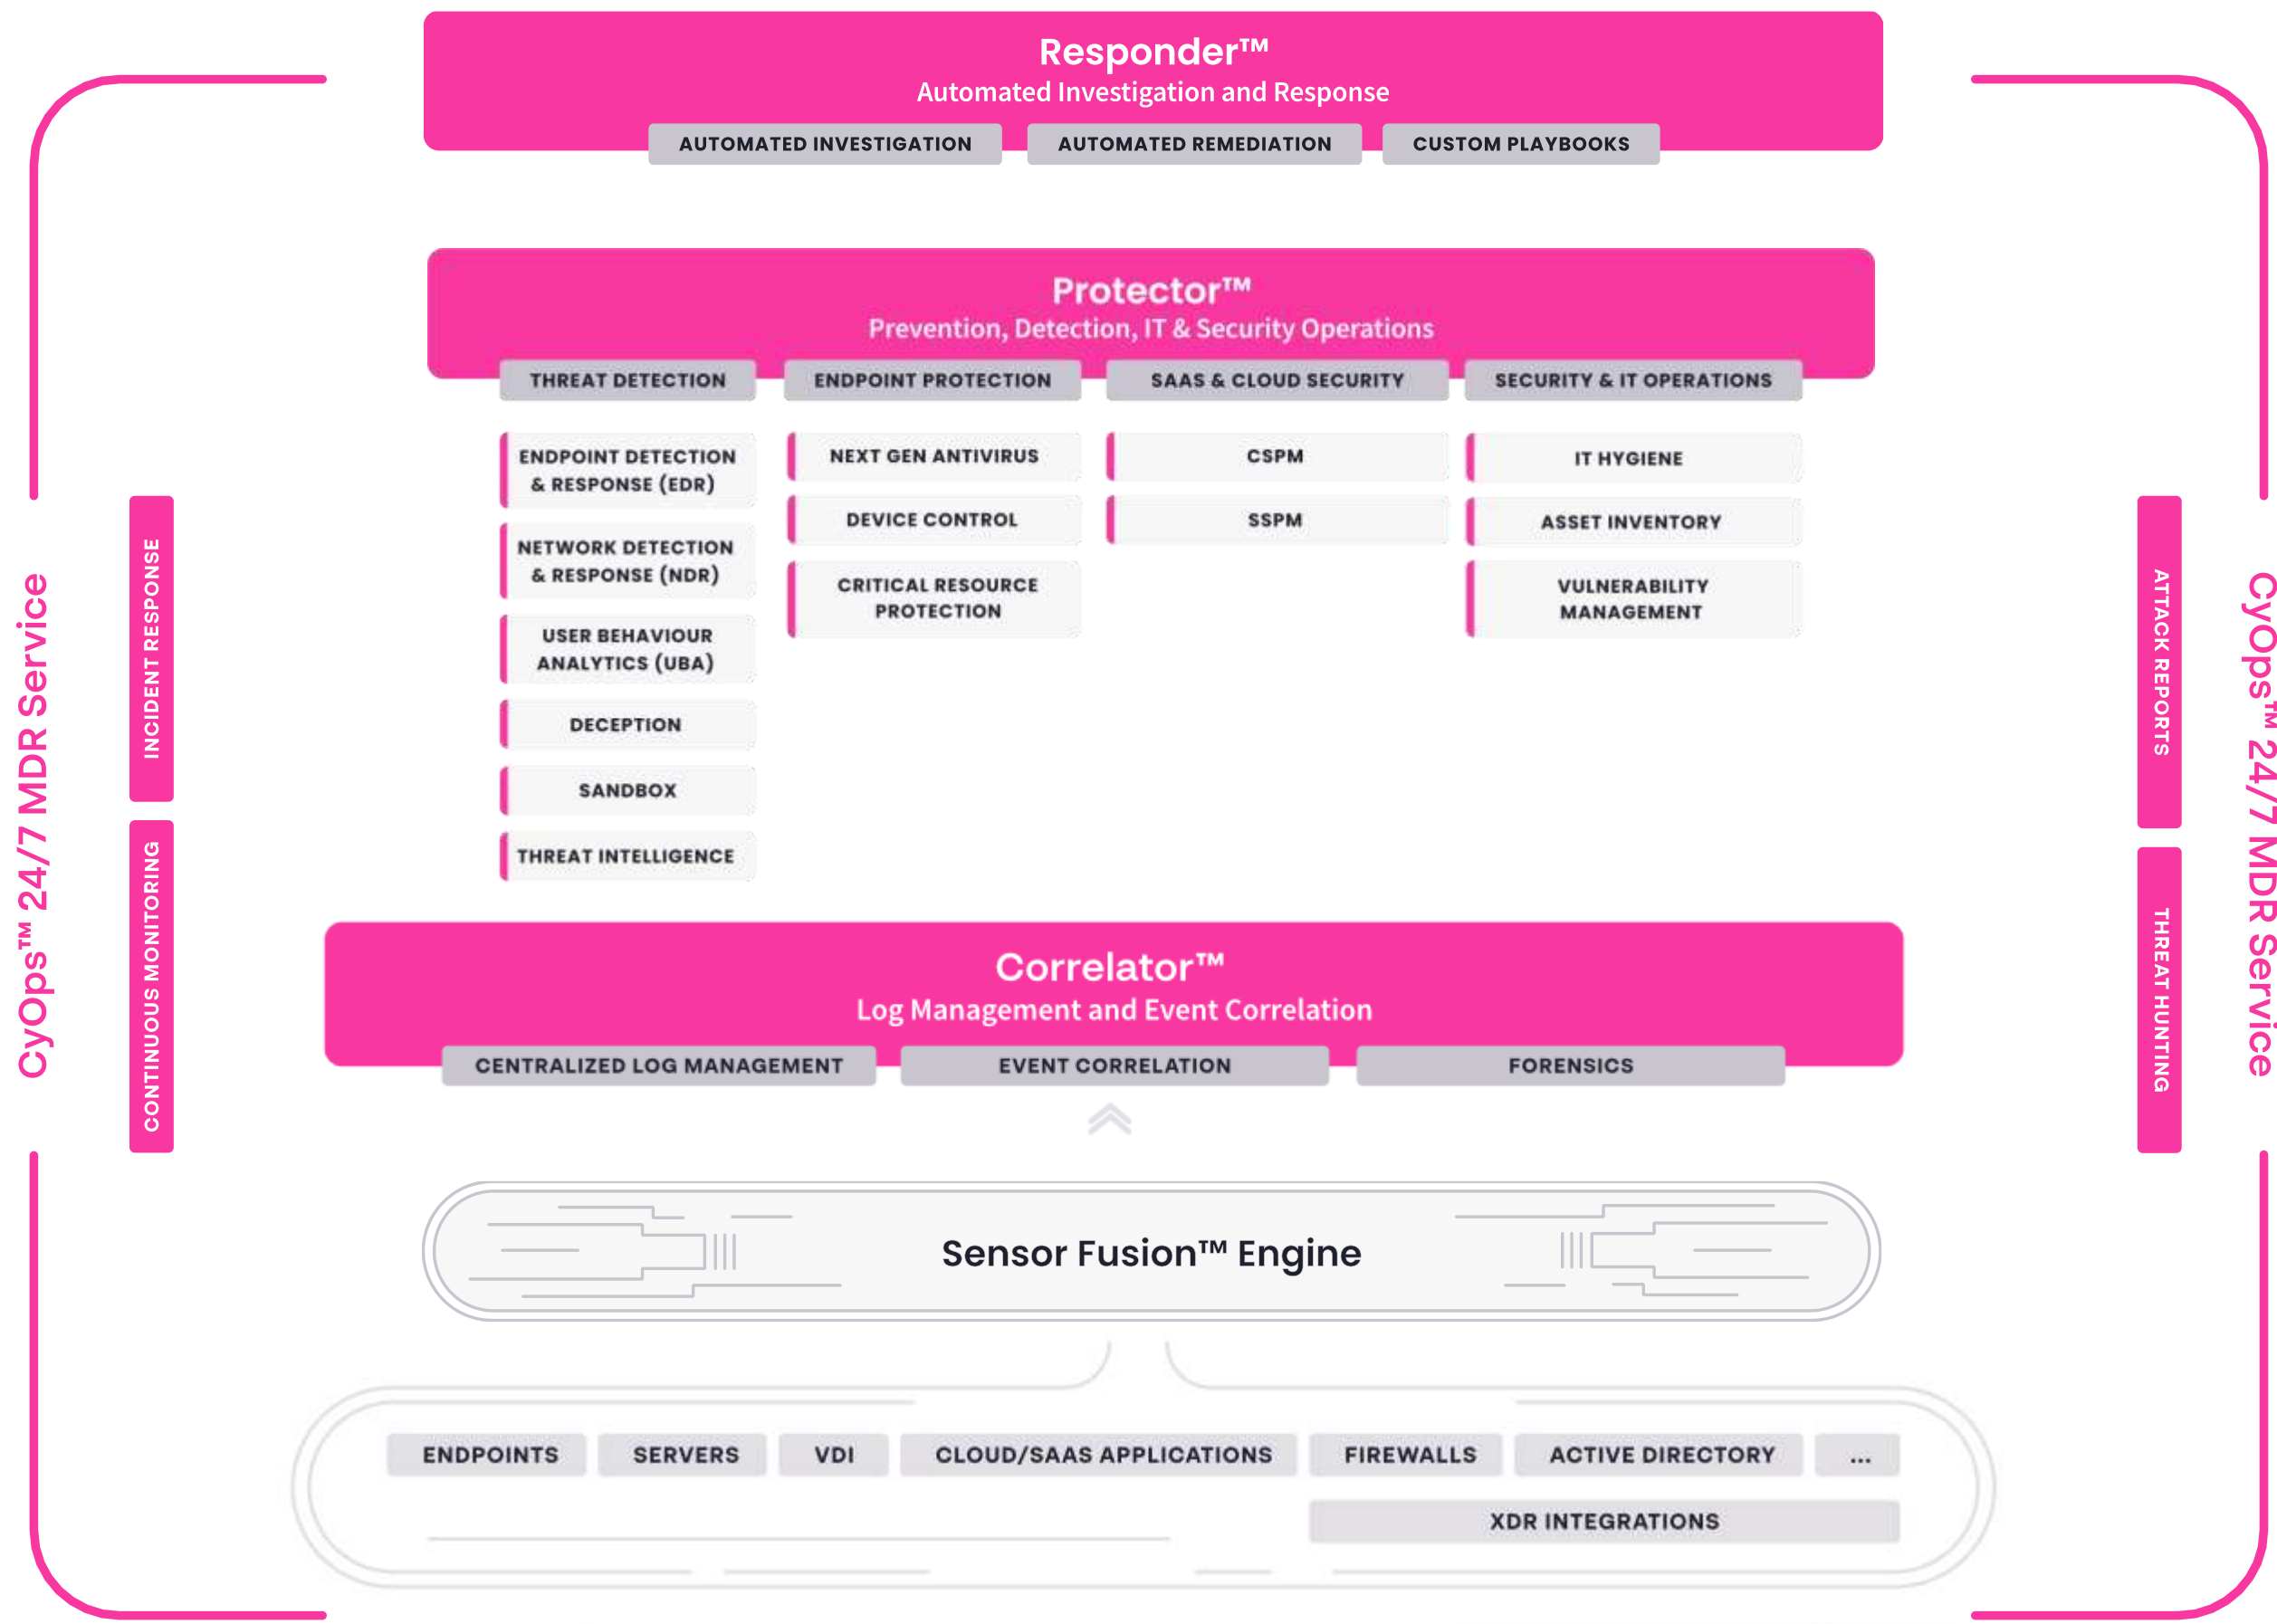

Fully featured, Automated, simple to use platform

Cynet benefits

Loved by customers

With Cynet, we are able to do much more with less on our security side”

David Michel, CISO, Becker

It’s great always knowing that you have a ‘first class’ team of security experts available 24/7”

David Mantock, CISO, SPIE

Cynet is ideal for small IT or Security teams as ours- immediate value and backed by a 24/7 team”

Scott Noles, ISO, Citizens Bank

The First Time a Vendor Has Lived Up to Their Promises

Drew Bjerken,
CISO & CPO, Catalina
