CLOSED

Certificate Discovery - Full Transparency!

- ✓ A Systematic scanning for unknown certificates.
- ✓ All company public and private TLS/SSL certificates are identified and added to the certificate inventory.
- ✓ Dangerous outages due to expired certificates or expensive manual handling is consequently avoided.

Automation in Certificate Lifecycle Management

- ✓ Automatically renew and audit the installation of X.509 certificates
- ✓ Automated revocation service using OSCP and / or CRLs

Detailed Monitoring & Reporting!

- ✓ Status of certificates.
- ✓ Notification System

Create & support multiple business domains

The image shows a close-up of a software interface for creating a new policy. The form is titled 'New Policy' and contains several input fields and buttons. The fields are labeled 'Policy Name *', 'Choose End Entity Strategy *', and 'Allowed Valid For Values'. The 'Policy Name' field contains the placeholder text 'Enter Policy Name'. The 'Choose End Entity Strategy' field contains the placeholder text 'Please select an option'. The 'Allowed Valid For Values' field contains the text 'All Allowed'. To the right of the form, there are buttons labeled 'Template Sign', 'Manual E', and 'Dual'. The overall layout is clean and professional, typical of a business application.
