Accelerating IT Transformation

Digital Access & Identity Management

Franziska Weiß

11.10.2023

Digitalisation Index

100

2020

Digitalisation Index was created

107,9

2021

Digitalisation boost

108,9

2022

Stagnation

Legal Requirements

NIS2, ISO/IEC 27001, EU GDPR,....

External Threats

~ 137k Cyber Crimes in 2022,
202,7 billion Euro damages

Lack of Resources

high demand for qualified
personnel, not enough graduates

Manual Processes

approval workflows on paper,
implementation by hand

Self Service in

Access & Identity Management

Request

new permissions & identities
changes

1

Automation

technical implementation through software
no manual intervention

3

2

Responsibilities

business departments
team and department leads

4

Traceability

reporting
tracking of changes
reapprovals

Benefits of Self Service

University of Leipzig Medical Center

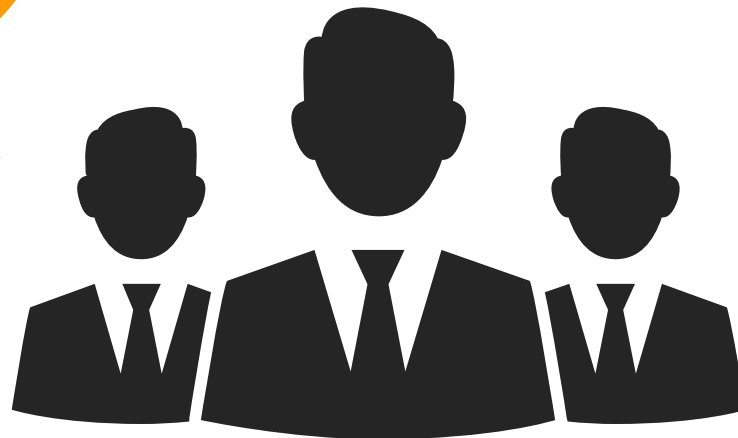

The administrators in the second level support can now contribute their special knowledge to other important topics [...]

Etecture

The option of always having an overview of the current access permissions on one´s own folder [...] was very well received.

City of Cologne

Our project has shown that even in times of tight budgets it is possible to achieve lasting savings through investments.

ACCESS MANAGER

To provide your employees with a true access and identity journey, the Access Manager provides a fully automated solution which standardizes routine tasks of user and access management and supports the provision of IT services.

Not only individual tasks, but entire process chains are thus optimized, resulting in far lower resource usage and error rates than with manual processing.

ACCESS MANAGEMENT

Fully automated access management for file servers, AD, Azure, MS Teams, SharePoint and further target systems

IDENTITY MANAGEMENT

Standardized and automated user provisioning in all circumstances within your organization

PASSWORD RESET

End users reset their forgotten passwords in self service
– 24 hours a day, seven days a week
