# Our markets

We support you end-to-end with experts deeply rooted in the industries we serve - leveraging the latest insights and cross-industry intelligence

## } What is the Supply Chain? #

- Hardware
- Software
- IT-Service-Provider (e.g. Cloud)
- Non-IT-Services (e.g. Logistics)

## Possible [ impact of a cyber incident ] in the Supply Chain

- Your data is leaked via your supplier.
- Your public relationship is damaged.
- Your production / service is not available.
- Your are committing a GDPR and other laws violation.

## Supply Chain cyber incident in 2023

- Cloud private-key stolen
  - Data exfiltration.
- Logistic company hacked
  - No goods in and out.
  - Production standstill for several days.
- Software with backdoor
  - Loss of intellectual properties.

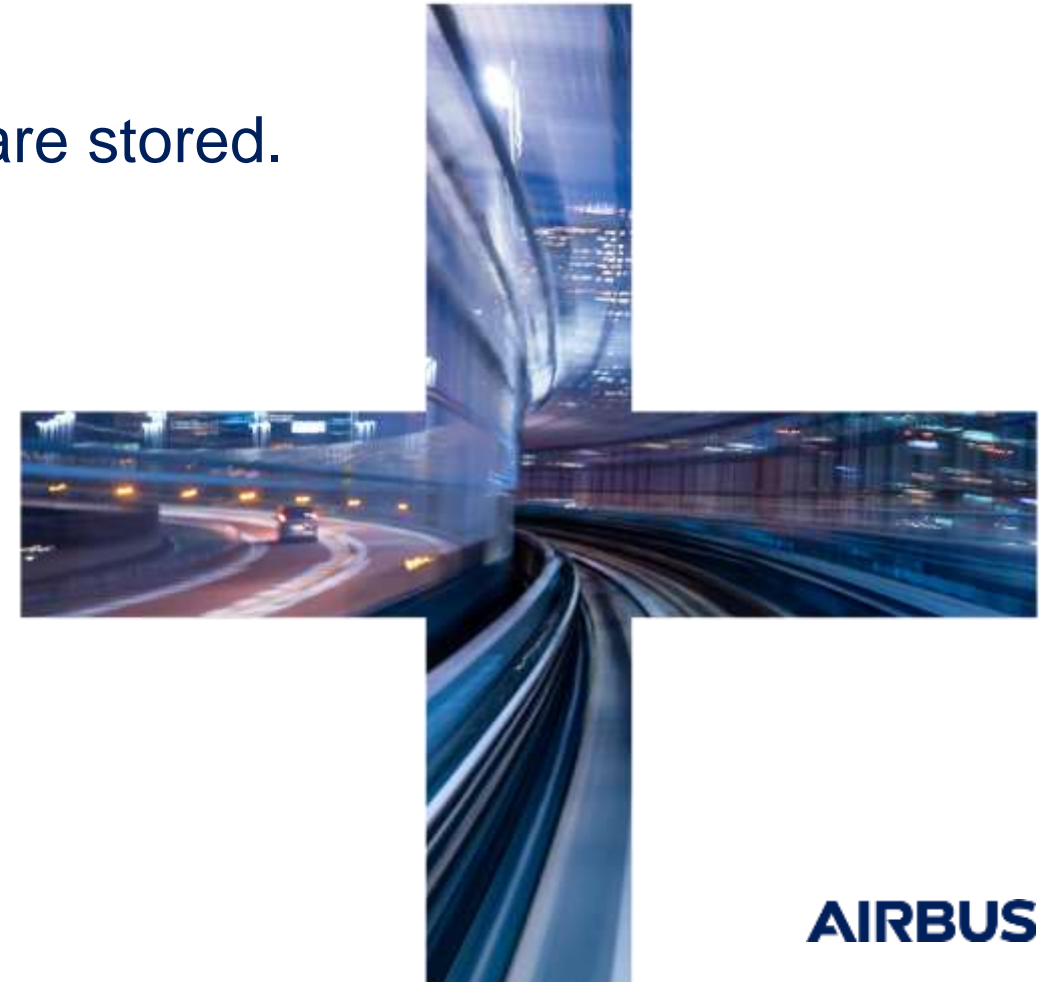

## } How do attackers act? #

They **compromise** the **weakest member** or the one with the **most influence** in your **Supply Chain**.

# : Countermeasures (1/3) /

- Cloud private-key stolen
  - Don't have critical info in the cloud.
  - Check who has which key and how they are stored.
- Logistic company hacked
  - Diversity.
- Software with backdoor
  - Multiple protection levels

## : Countermeasures (2/3) /

- Supply Chain Cyber Security Maturity Check.
  - Controlled Supplier Diversity.
  - More than just ISO-27001 and BSI IT Grundschutz (BSI IT Baseline).
- Hint:**
- Certificates are important, but do not protect completely.

## ■ Countermeasures (3/3) /

- Widely deployed cyber security.
- Challenge Yourself.
- Regular review of processes, people and technology.
- Risk Management
