

Anesthesia Billing Changes HealthRules Payer

Attention Providers:

As Partnership HealthPlan of California prepares for our transition to our new claims system, HealthRules Payer (HRP), we want to remind our network of current regulatory requirements regarding anesthesia billing.

Providers billing for anesthesia services (CPT codes 00100 through 01999) will be required to submit time in **minutes** in box 24G on the CMS-1500 claim form and in the electronic equivalent, 837P file.

In addition, start and stop times will no longer be required. Anesthesia time units should no longer be billed units for 15-minute increments of anesthesia time.

Failure to bill per these regulatory requirements may result in denials or rejections of your claims.

If you have any questions related to our new claims system, please reach out to the Provider Relations Department at PartnershipProviderEducation@partnershiphp.org.
