

Child Health and Disability Prevention (CHDP) Program

August 2024

We are excited to announce that Partnership HealthPlan of California is ready to train our medical providers and their staff. Under the CalAIM initiative, the California Department of Health Care Services has transitioned the Child Health and Disability Prevention Program to Partnership. This transition aligns with the desire to streamline our efforts and consolidate care responsibilities, for members 21 years of age and younger.

Trainings are mandatory and will be reviewed during your clinics Site Review and/or upon request. Training topics include Audiometric, Vision, BMI, Dental Fluoride Varnish Application, and Preventative Care, which covers immunizations and blood lead screening.

If you and your staff have any questions or are interested in scheduling a live WebEx training, please reach out to FSR@partnershiphp.org.

If you would like to complete these trainings online, please visit our website at our [Provider Education Training Materials page](#).

CHDP Training Videos

Please complete each training module link below. Once you complete the Attestation Survey link below each video, Partnership will issue a certificate of completion to your provided email address. If you need assistance, please contact us at FSR@partnershiphp.org.
