

Local Code to National Code Conversion

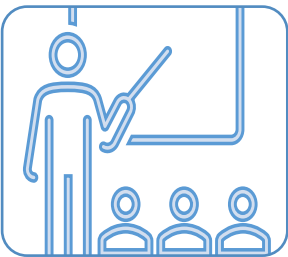

Partnership HealthPlan of California is preparing to transition to a new claims system, HealthRules Payer (HRP). In preparation for this transition, Partnership wanted to inform our network that we will follow Medi-Cal guidelines on local and national codes.

Partnership will follow the Medi-Cal program's phased approach to converting local codes to national code sets.

Partnership will accept both local codes and HIPAA-compliant national codes from providers that have the ability to bill them.

Future updates and educational materials will be shared once the Department of Health Care Services (DHCS) announces effective dates for the conversion of each program or service category.

If you have any questions related to our new claims system, please reach out to the Provider Relations Department at PartnershipProviderEducation@partnershiphp.org.
