Partnership 2026 Annual County Data Report

Sonoma County

Executive Summary

Partnership HealthPlan of California services 24 counties to help our members and the communities we serve, be healthy. Partnership supports this mission by providing these Partnership 2026 Annual County Data Reports to county health departments and other stakeholders, with data which they can use to prioritize public health interventions and policies.

Members represented within this report are the most vulnerable population within the communities we serve, those who are most likely to have poor health outcomes and need more resources for intervention planning.

As an adjunct, to support efforts to reduce health disparities, Partnership is launching its first American Indian/Alaskan Native (AIAN) data report in collaboration with the California Rural Indian Health Board (CRIHB) and California Tribal Epidemiology Center (CTEC) in 2026.

The data provided is a piece of the puzzle and should not be used in isolation. Rather, it can be combined with other data sources to make inferences about the healthcare status of our members in all 24 counties.

Additional sources of community data that can be used with this report include:

- Partnership's Community Needs Assessment (CNA)
- Community Health Assessments (CHA) produced by each county
- Community Health Improvement Plans (CHIP) produced by each county
- Partnership Health Plans Population Needs Assessment (PNA)
- US Census
- County Health Rankings & Roadmaps
- California Healthy Places Index
- California Department of Public Health
- California Health Interview Survey (CHIS)

Partnership data report should be analyzed in conjunction with these other data sources to get the most holistic understanding of each county.

This report presents data for key measures and indicators over several years, 2021-2025 (as data permits), to aid with comparison and to easily identify differences across people, area, and time:

- Demographics
- Special Populations
    - Child Welfare
    - Obstetric/maternal demographics and conditions
- Chronic Conditions
- Access to Dental Services
- Substance Use Disorder (SUD)
- Utilization of Services
- Health Disparities
- Supplementary Data

Suggestions for changes to future additions should be submitted through the County Health Officer of each county.

Table of Contents

About Partnership HealthPlan of California

- Partnership HealthPlan of California is a nonprofit community-based organization. Partnership contracts with the state of California to administer Medi-Cal (Medicaid) benefits through local community care providers.
- In 2024, Partnership expanded from 14 to 24 counties, adding Butte, Colusa, Glenn, Nevada, Placer, Plumas, Sierra, Sutter, Tehama, and Yuba.
- As of December 2025, Partnership had about 894,000 members in 24 counties located in the North of California: Butte, Colusa, Del Norte, Glenn, Humboldt, Lake, Lassen, Marin, Mendocino, Modoc, Napa, Nevada, Placer, Plumas, Shasta, Sierra, Siskiyou, Solano, Sonoma, Sutter, Tehama, Trinity, Yolo, and Yuba.
- Partnership is a County Organized Health System (COHS), a Commission of the State of California. Partnership's Board of Commissioners are selected by the County Board of Supervisors of the 24 counties we serve, along with three consumer representatives.
- Within our service area, Partnership contracts with 48 Acute Care Hospitals, 370 Primary Care sites in 126 organizations including Tribal Health Centers, 117 Long Term Care/Skilled Nursing facilities, and over 24,000 specialists in care centers (including tertiary care centers).

Introduction

Introduction
Overview

Partnership operated in 14 counties from 2013 to 2023. In 2024, it expanded to 10 new counties for a total of 24. Where relevant, historical data for the original 14 counties is typically presented from 2021-25. For the 10 expansion counties, only 2024-25 data is available.

Partnership divides 24 counties into six regions, based on the location of its six offices:

Auburn Region:

- Nevada County*
- Placer County*
- Plumas County*
- Sierra County*

Chico Region:

- Butte County*
- Colusa County*
- Glenn County*
- Sutter County*
- Yuba County*

Eureka Region:

- Del Norte County
- Humboldt County
- Lake County
- Mendocino County

Fairfield Region:

- Napa County
- Solano County
- Yolo County

Redding Region:

- Lassen County
- Modoc County
- Shasta County
- Siskiyou County
- Tehama County*
- Trinity County

Santa Rosa Region:

- Marin County
- Sonoma County

** Indicates 2024 expansion counties*

Introduction
Sonoma County Overview

Sonoma County joined Partnership HealthPlan in 2009 and is in Partnership's Santa Rosa office region. With a total of 109,537 members, it currently has the highest enrollment count of all Partnership counties at 12.2% of total membership as of December 31, 2025.

Partnership members in Sonoma County are assigned to about 24 primary care provider (PCP) groups in Sonoma. As of December 31, 2025, 42 out of 71 Sonoma provider sites are open for member assignments and 76.9% of Partnership members in Sonoma have Medi-Cal as a primary form of insurance (Medi-Cal Prime). There are five community hospitals, and one Kaiser Hospital provides acute care service in Sonoma (Source: www.californiacountyoffices.com).

Sonoma has the highest number of Hispanic race and ethnicity among Partnership members at 5.7% (51,133 Hispanic members). Hispanic race and ethnicity are 46.7% of Sonoma Partnership members, while White race is 23.0%. However, 61.1% of Sonoma members selected English as a preferred language, while 37.1% selected Spanish.

Sonoma has the highest rate of uncategorized Partnership members by county, which includes mixed race category. A total of 25.8% of membership race/ethnicity in Sonoma are uncategorized as Other race at 6.3% and Unknown race at 19.2%. Sonoma's age and sex demographics are similar to regional and plan-wide.

Special populations

Partnership special populations include pregnant women, child welfare, and homeless or those experiencing housing insecurity.

The population of homeless Partnership members or those experiencing housing insecurity in Sonoma has increased over the years. A much higher increase is noticed between 2023 at 2.9% (4,213 members) and 2024 at 6.1% (7,790 members). Currently, homeless members are at 8% (10,573 members). Some reasons proposed for explaining the increase include more social need, more targeted enrollment or some change in definition of who can be called homeless.

Adverse Childhood Experiences (ACEs) monitoring helps detect and prevent adverse health outcomes among children in Sonoma, including special population children among Sonoma Partnership members. Sonoma's ACEs screening rate has gone down

from 2021 to 2025, a range from 49 to 169 per member per year per 1,000 members. There has been a threefold reduction in screening from 2023 to 2025.

Special populations in Sonoma include the Child Welfare population, about 1.1% of the total eligible Partnership member population in Sonoma. Child Welfare has most claims dedicated to primary care at 53.1%, well-child visits at 38.4%, and emergency department visits at 32.5%. The highest number of CalAIM registered child welfare community support claims is for housing support, and the second highest is for medically tailored meals.

Sonoma has one of the highest numbers of deliveries paid for by Partnership, second only to Solano. Deliveries ranged from 1,161 to 1,506 per year over the past ten years. Homeless mothers have increased over the years from 3% in 2023 to 6% in 2024 and 11% in 2025. Chronic disease (medical and mental) in pregnant and new mothers up to one year (maternal population) have increased over the past five years with a range from 21.9% to 53.3%. Mental chronic diseases remain high among the maternal population compared to other chronic medical diseases. Pregnant and postpartum members in Sonoma have a pattern of higher alcohol and stimulant substance use disorder compared to Partnership as a whole, which has a higher rate of pregnant patients with opioid use disorder.

Medical and Mental Services

Sonoma members have a 2.5 to 3.0 average office visit utilization per member per year, above the Partnership target of 2.2. Sonoma has over 20% of PCP visits conducted by video or telephone, reported as a telehealth visit. Emergency Department (ED) Visit rate is about 1 visit per 2 members per year.

In Adults, mental chronic conditions as a group had the highest number of claims per 1,000 members in Sonoma. Anxiety at 207 and Trauma/Stress at 130 the highest per 1,000 members in 2025. Medical chronic conditions peak with hypertension at 261 and Diabetes at 135 per 1,000 members in Sonoma, while kidney disease is at 112 per 1,000 in 2025. Congestive Heart Failures were at 50 per 1,000 members, seen as one of the complications of coronary artery disease at 7 per 1,000. In children, Asthma has a higher rate at 31 than adults at 23 per 1,000 members, also in 2025.

Sonoma has more alcohol SUD claims member count and paid claims per member per year per 1,000 Partnership Sonoma members than all Partnership members, 2025.

Access to Medical and Dental Services

Sonoma Partnership members utilizing Non-Medical and Non-Emergency Medical Transportation (NMT/NEMT) make up 1% of Sonoma's total Partnership members. NMT/NEMT was calculated at a rate of 86 trips per 1000 members per month (PMPM) for Sonoma members (or .086 trips PMPM), and a total of 9,429 completed trips across all 12 months of the year 2025. For Sonoma, the average trip distance is 12.8 miles, about half of Partnership's plan-wide average at 24.8 miles, and nearly 30% of users are over 65 years of age compared to 25.4% among all Partnership members.

Partnership member dental services are paid for by the state of California as Medi-Cal Dental and fee-for-service payments.

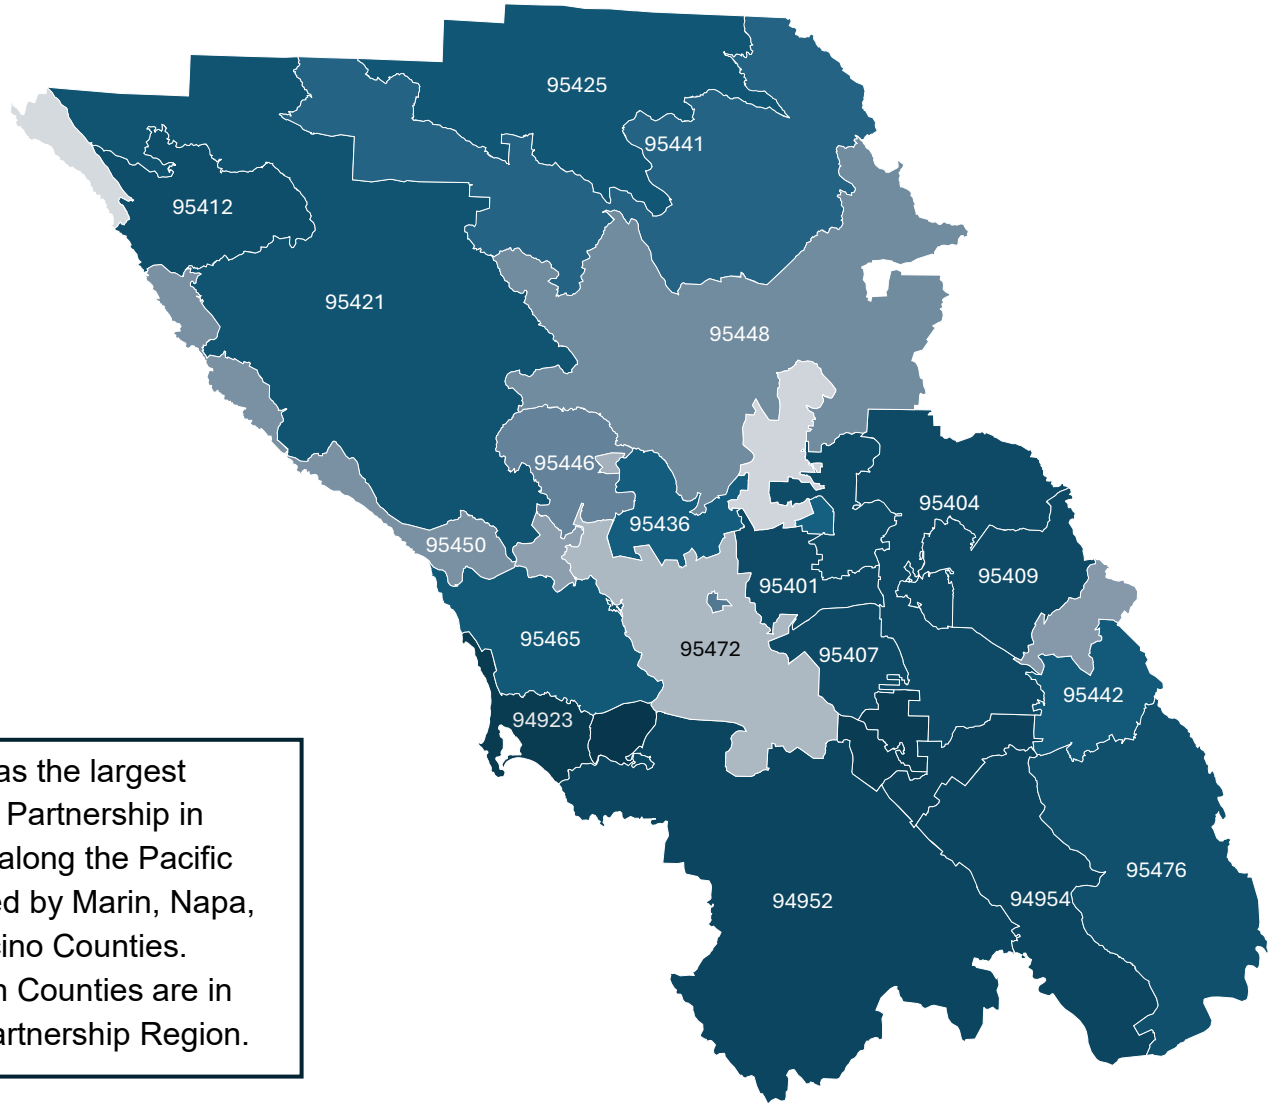
In 2025, Sonoma had 54 dentists and 19 hygienists serving about 110,586 Partnership members, lower than the United States 2021 report of an average of 60.84 dentists per 100,000 residents.

In Sonoma, the September 2025 had the highest number of dental services reported, with claims for 42,515 services for 24,399 members. Prevention and Early Detection services were at 47.6% with 11,619 total members served (child and adults), Support and Other services were at 33.3% with 8,117 members served, and Treatment and Intervention at 19.1% with 4,663 members served in September. Note, these are not mutually exclusive services even though they are in the same category and year, 2025.

Introduction

County Overview

Map of Sonoma County



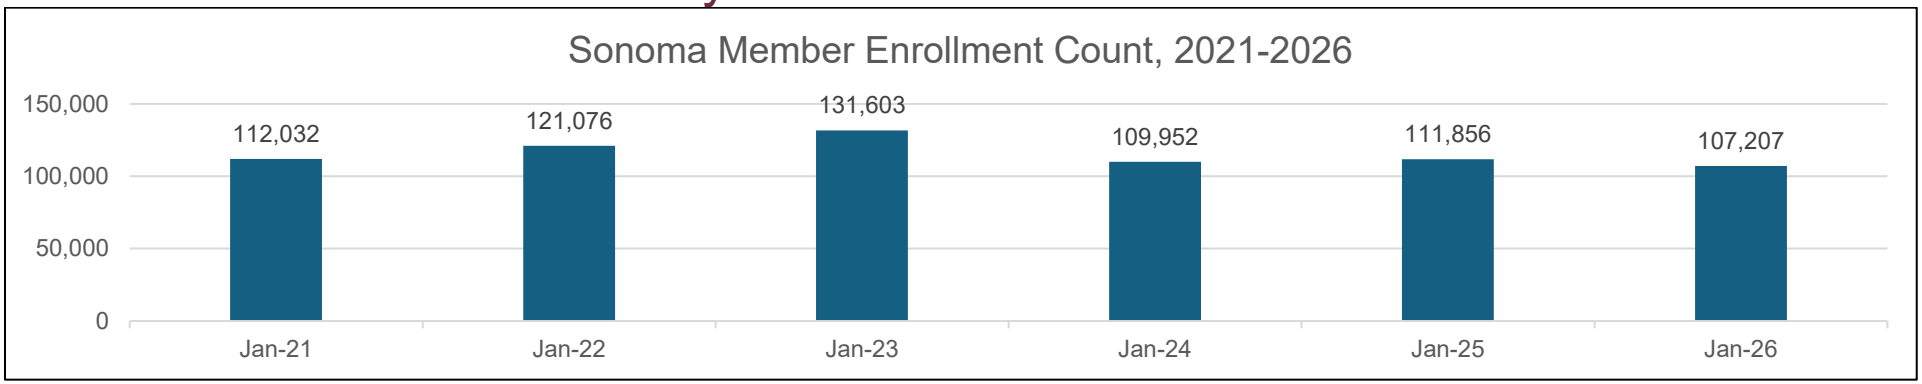
Sonoma County has the largest enrollment, joining Partnership in 2009. It is located along the Pacific Coast and bordered by Marin, Napa, Lake, and Mendocino Counties. Sonoma and Marin Counties are in the Santa Rosa Partnership Region.

Demographics

For more information, see Demographics in the Appendix

Demographics

County Member Enrollment Trend



Highlights of County Member Enrollment Trend

Data shows point-in-time view of the number of Sonoma residents who are enrolled in Partnership over the past six years. Data is captured on January 1 of each year from 2021-2026.

Definition:

- Membership: Partnership members are California Medicaid members also called Medi-Cal members assigned to Partnership by various criteria and eligibility status determined by the United States (U.S.) Centers for Medicare and Medicaid Services (CMS) and the state of California Department of Health Care Services (DHCS).
- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties. Partnership members are Medi-Cal enrolled members and could be Direct or Assigned members.
    - Direct Members: Direct Partnership members are enrolled members who are allowed to select their Primary Care Providers (PCP) and or Specialty Providers, while Partnership pays in form of paid claims.
    - Assigned Members: Assigned Partnership members are enrolled members who are assigned to a PCP or Specialty Providers upon enrollment and are encouraged to visit these providers for their health and care. Assigned members may be assigned to a Physician, Physician-Group, Rural Health Clinic (RHC), Federally Qualified Health Center (FQHC), Indian Health Service Clinic (Federal) or Tribal FQHC.

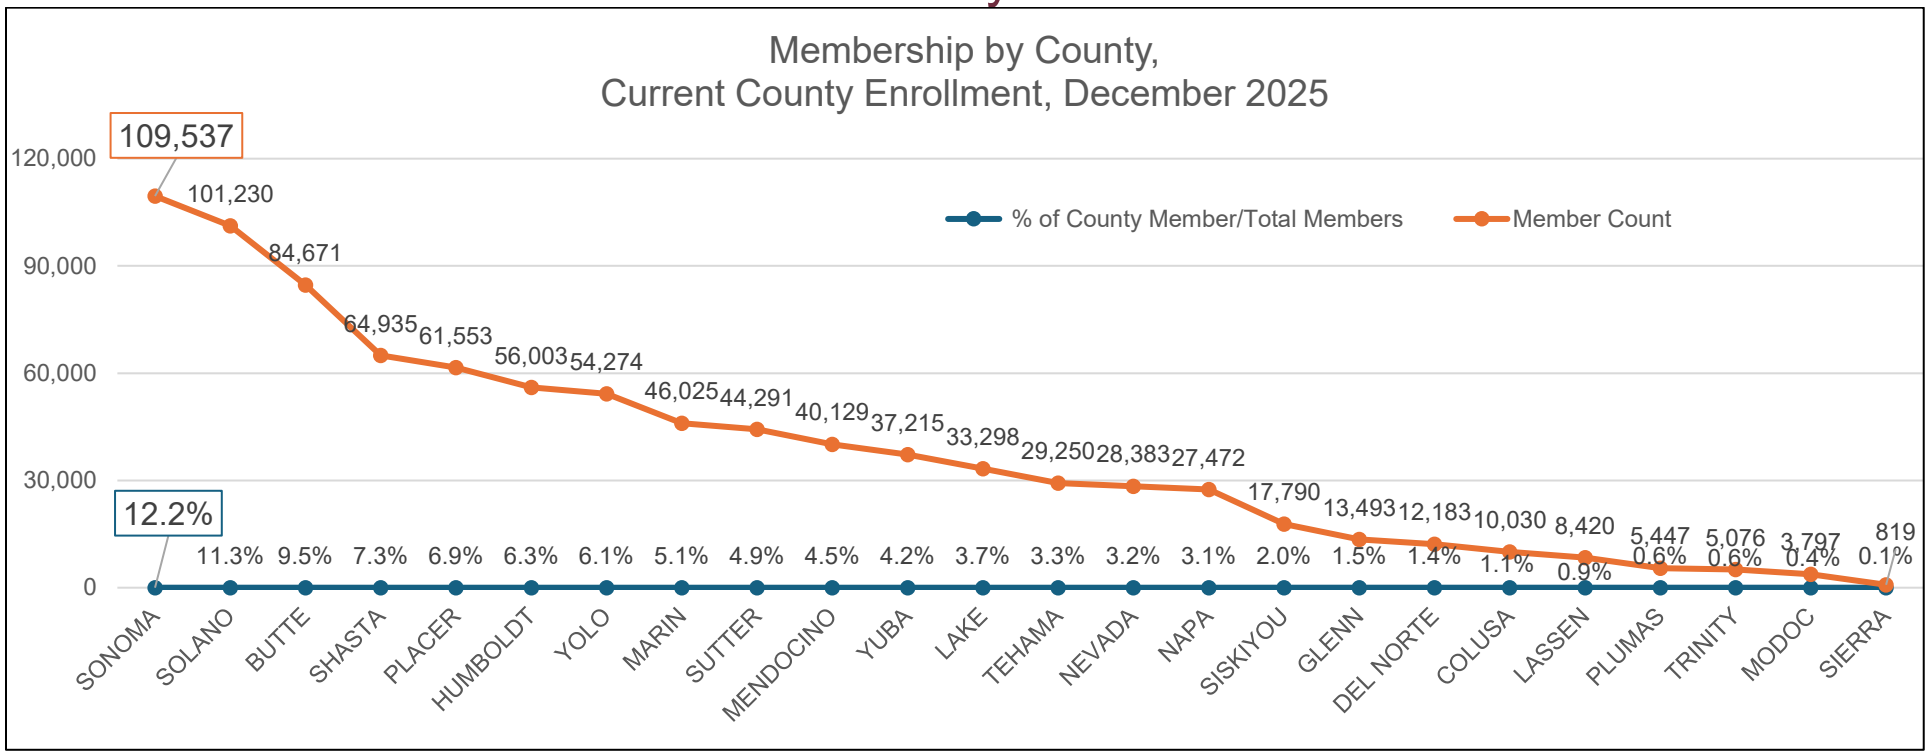
Demographics

Current County Enrollment



Highlights of Current County Enrollment

Data shows point-in-time view of the number of Sonoma enrolled residents compared to other Partnership counties, captured on December 31, 2025.

Definition:

- Current Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties. Partnership members are Medi-Cal enrolled members and could be Direct or Assigned members.
- Calculated:
    - Percentage of County Members is the total number of enrolled individual county members divided by the total number of enrolled Partnership members from all counties multiplied by 100 (%)

Demographics

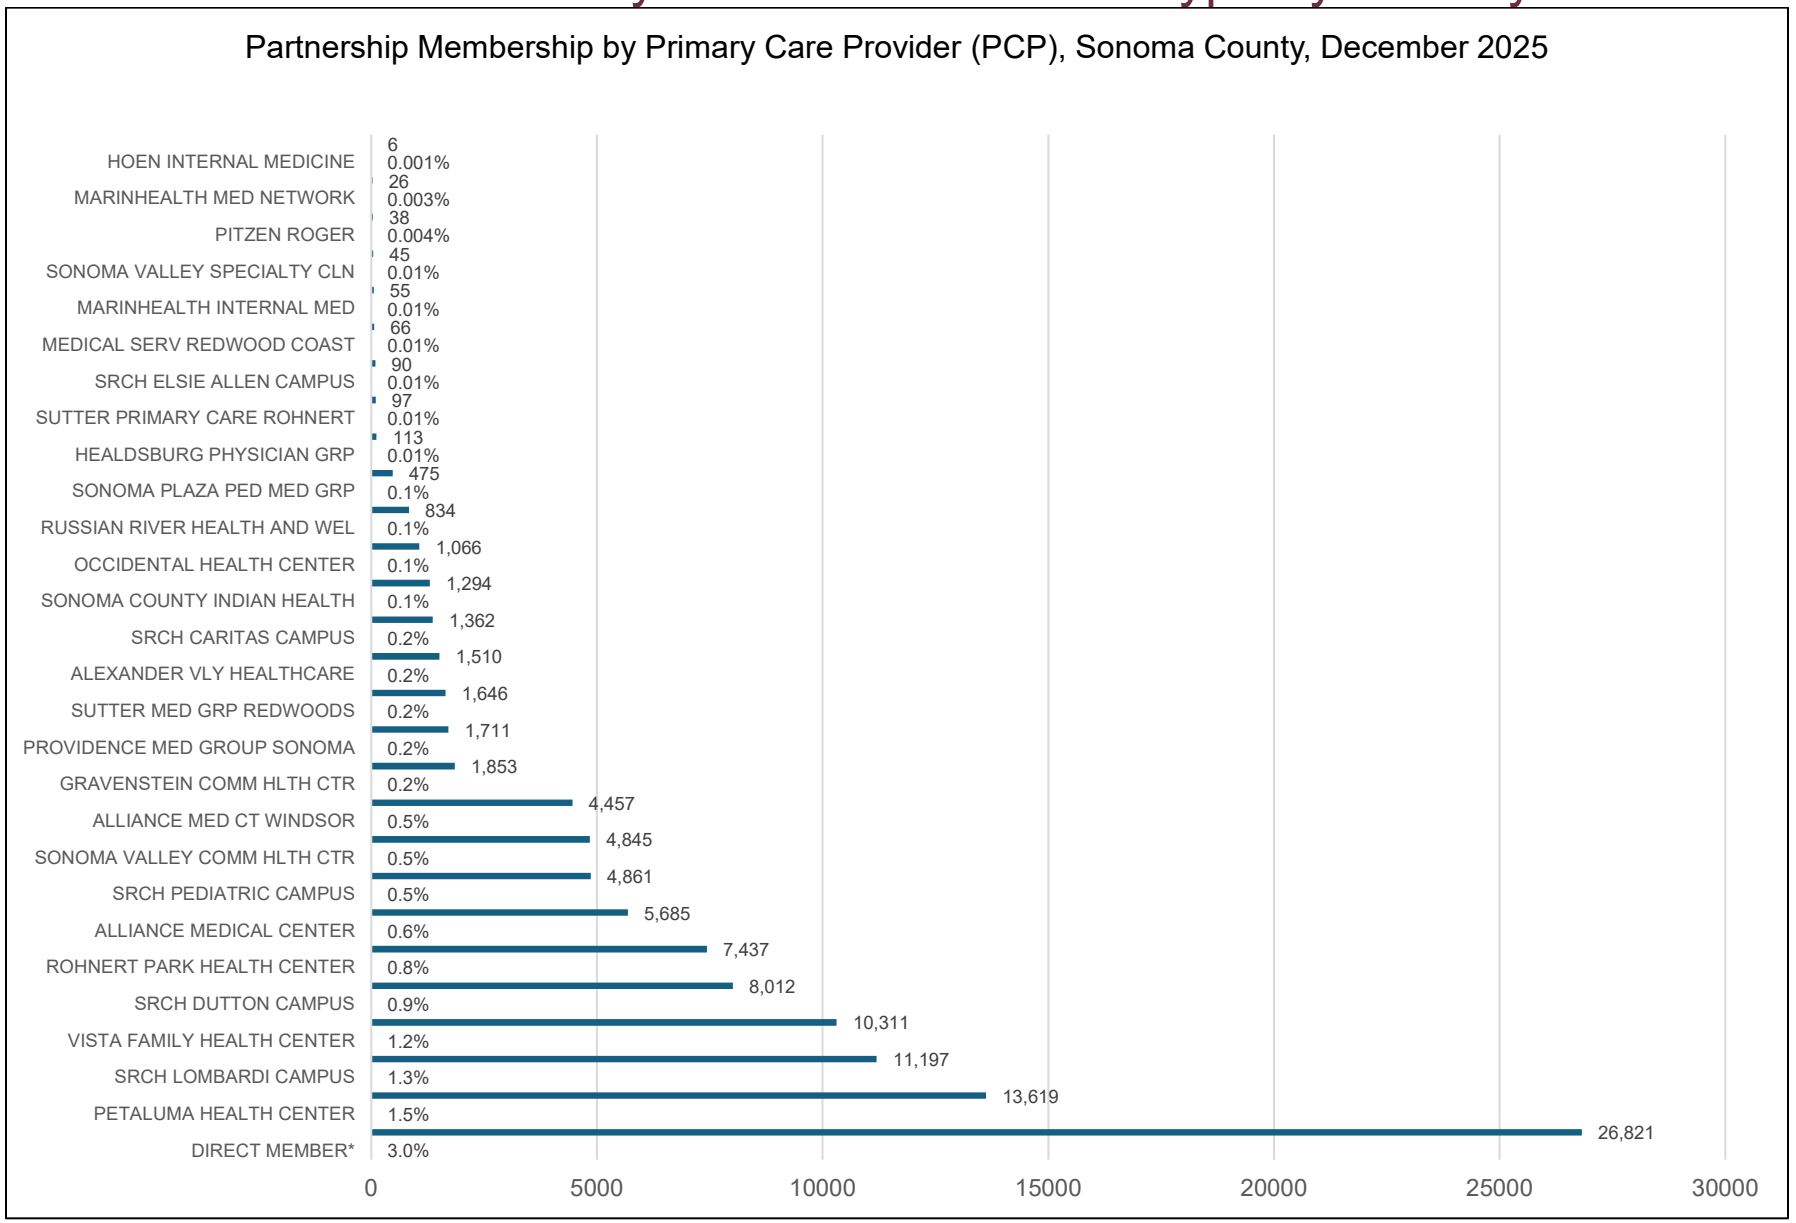
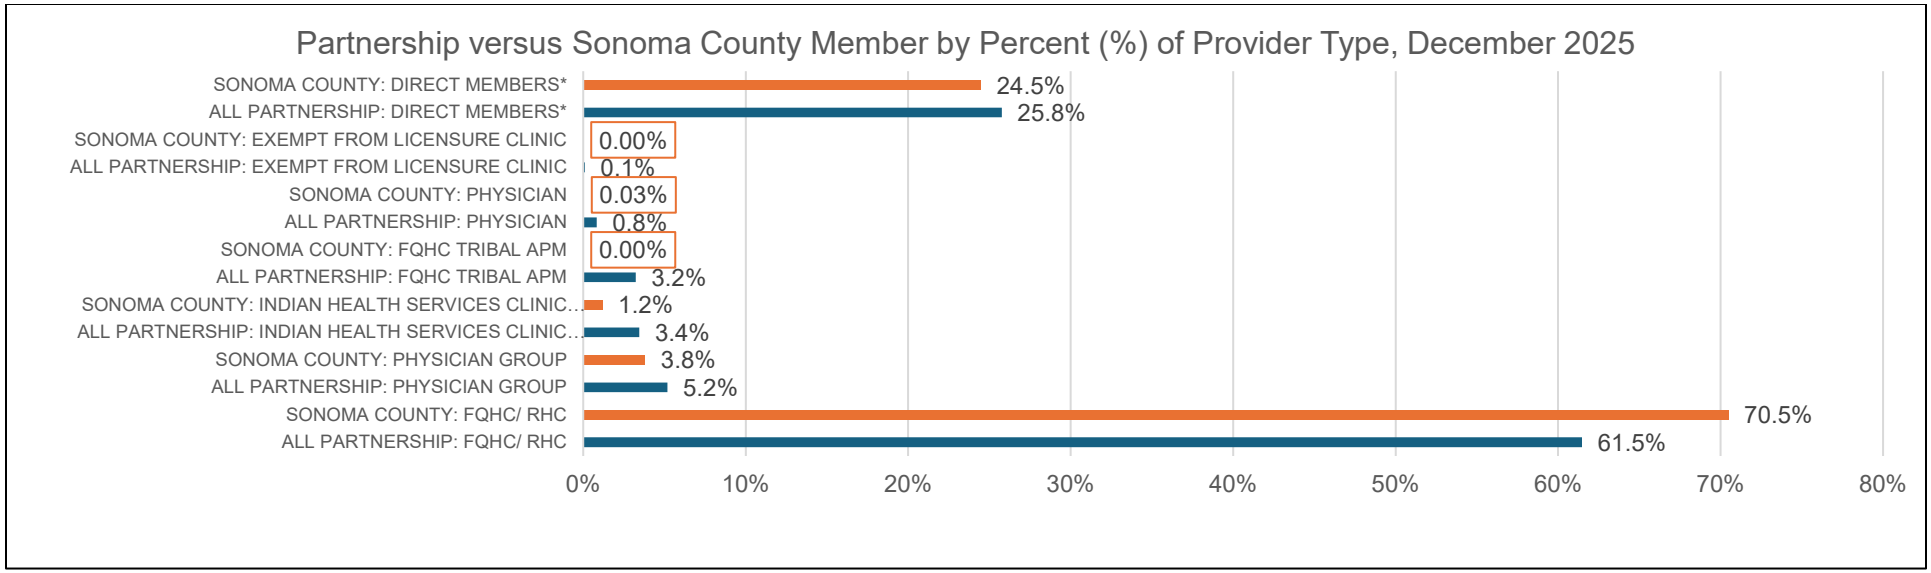
Sonoma Member Primary Provider & Member Type by Primary Provider





Highlights of Sonoma Member Primary Provider & Member Type by Primary Provider

Data shows a list of point-in-time (i.e., December 31, 2025) Sonoma Partnership Primary Care Providers (PCP) with the number of Partnership members residing in Sonoma who use these providers adding up to a total of 109,532 members and a total percentage (%) of 12.2% of all Partnership members. Partnership members (i.e., dark blue color) are divided into Direct Member at 25.8% (230,659 members) and Sonoma (i.e., orange color) at 24.5% (26,821 Members). All other members are Assigned.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
    - Direct Members: Direct Partnership members are enrolled members who are allowed to select their Primary Care Providers (PCP) and or Specialty Providers, while Partnership pays in form of paid claims.
    - Assigned Members: Assigned Partnership members are enrolled members who are assigned to a PCP or Specialty Providers upon enrollment and are encouraged to visit these providers for their health and care. Assigned members may be assigned to a Physician, Physician-Group, Rural Health Clinic (RHC), Federally Qualified Health Center (FQHC), Indian Health Service Clinic (Federal) or Tribal FQHC.

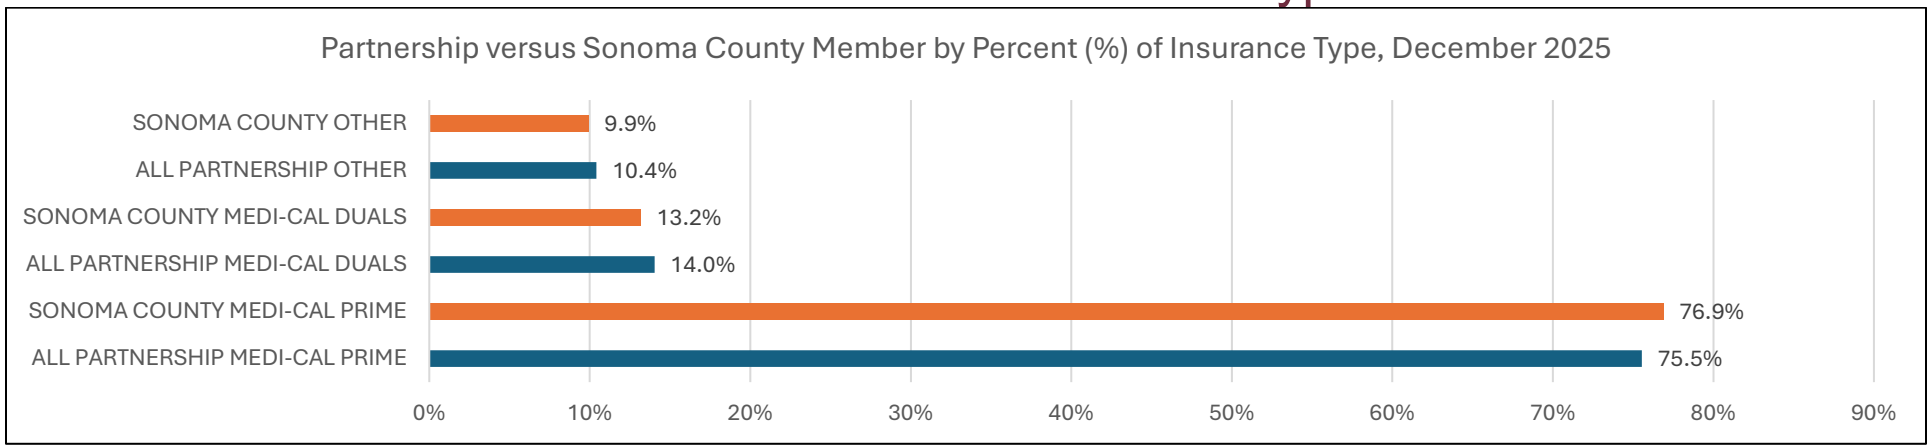
Demographics

Sonoma Member Insurance Type



Highlights of Sonoma Member Insurance Type

Data shows Partnership Members versus Insurance type at a point-in-time (i.e., December 31, 2025). All Direct Partnership members have Medi-Cal Prime Insurance, Medi-Cal being the primary source of medical bill payment as a payer of last resort. Assigned members could have Medi-Cal Prime, Other insurance or Dual Insurance (i.e., both Medicaid and Medicare insurance) also called "Medi-Medi" with Medi-Cal being the medical bill payer of last resort.

Definition:

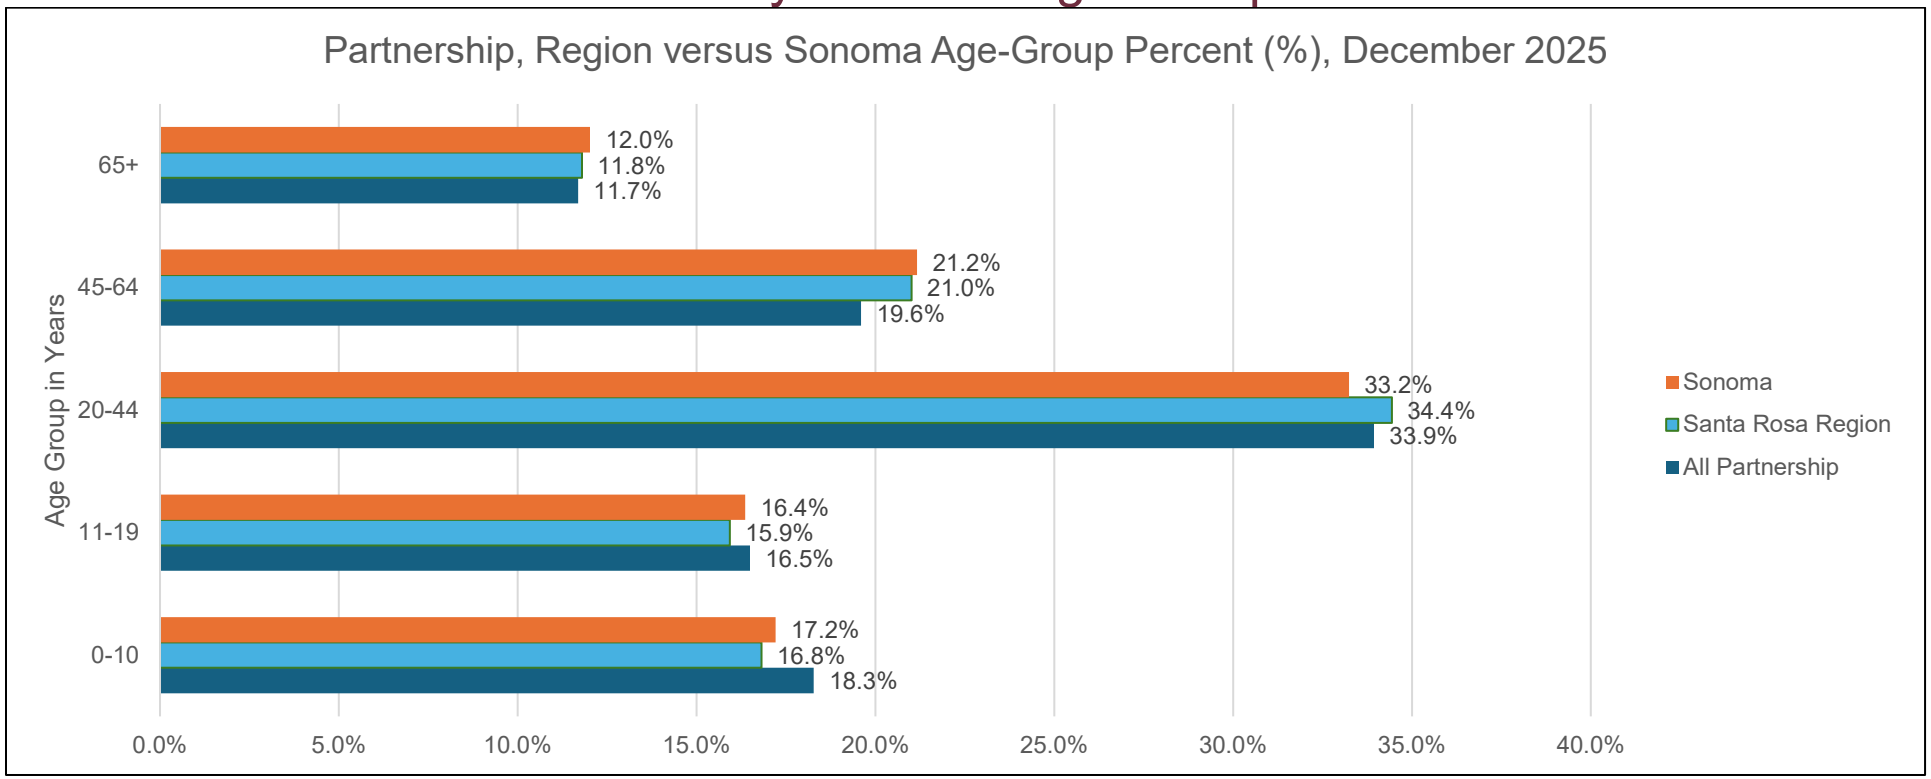
- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties. Partnership members are Medi-Cal enrolled members and could pay claims depending on the type of insurance enrollment:
    - Medi-Cal Prime: Enrolled individuals are eligible for Medi-Cal and Medi-Cal is the primary medical bill payer
    - Medi-Cal Duals: Enrolled individuals are eligible for both Medicaid and Medicare insurance
        - Medicaid and Medicare (i.e., Medi-Medi)
    - Other Insurance: Enrolled members have other forms of insurance and Medi-Cal is the payer of last resort, secondary to all other payers.
        - Private Insurance
        - Fee-for-Service

Data Source: Partnership Health Analytics Team linked and merged the following datasets by identifiers

- DHCS Enrollment and Claims data

Demographics

County Member Age Groups



Highlights of County Member Age Groups

Data shows “All Partnership” enrolled members (dark blue) versus Partnership members in Santa Rosa Office Region (light blue) versus Sonoma residents enrolled in Partnership (orange) as of December 31, 2025. Age groups include 0-10, 11-19, 20-44, 45-64 and 65 and above years. Similar percentage (%) of members are seen in all age groups.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

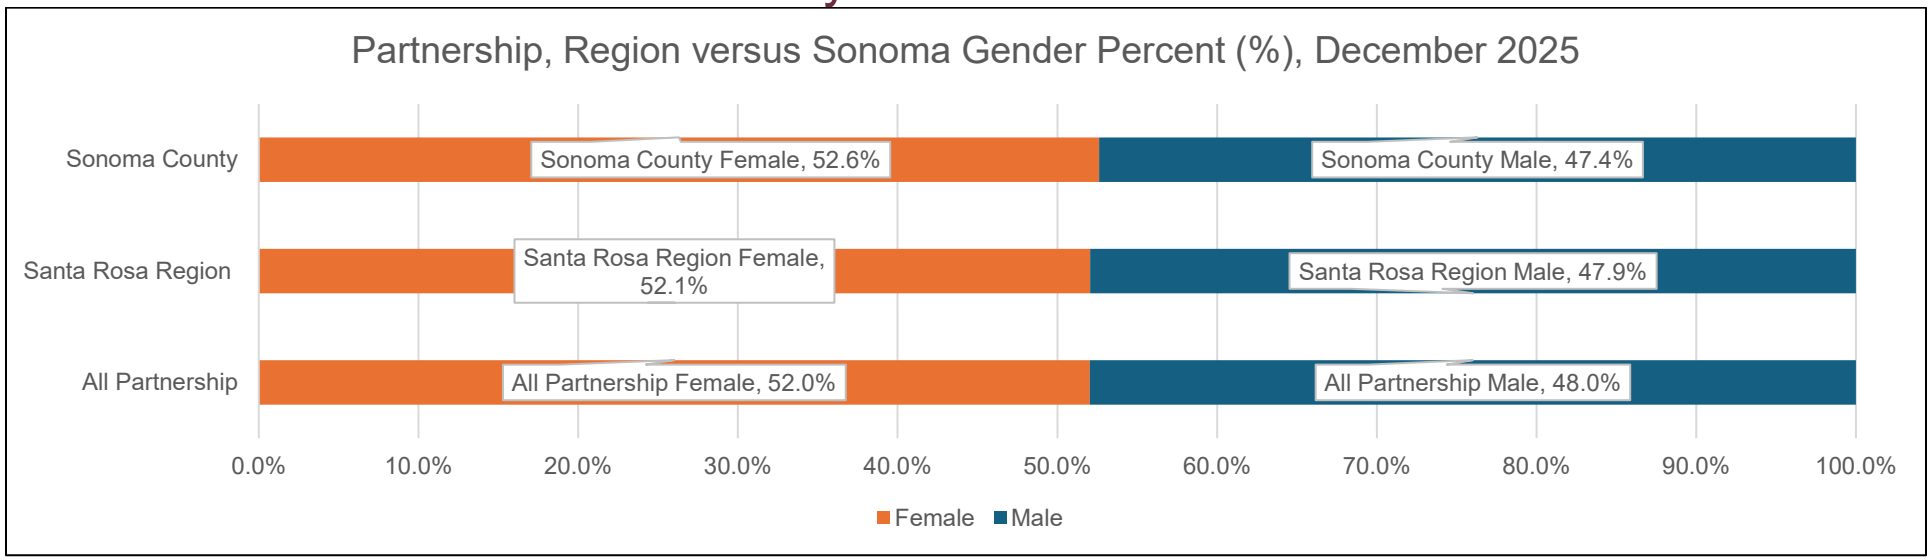
Definition:

- Current Enrollment: Enrollment is performed by the state of California DHCS and Partnership’s 24 individual counties.
- Calculations:
    - % Age Group is the number of enrolled members in the individual age group (i.e., 0-10, 11-19, 20-44, 45-64 and 65 and above years), in the location category (i.e., County, Region, or All Partnership) at the particular point-in-time in question, (i.e., December 31, 2025) divided by the total number of members in all age-groups in that particular location currently enrolled, multiplied by 100 (%)

Data Source: Partnership Health Analytics Team linked and merged the following datasets by identifiers

- DHCS Enrollment dataset for Partnership Members

Demographics
County Member Gender



Highlights of County Member Gender

Data shows gender distribution among "All Partnership" versus Partnership members in Santa Rosa Office Region versus Sonoma County residents enrolled as of December 31, 2025. Gender include sex designated at birth – male enrolled members in dark blue and female enrolled members in orange. Similar percentage (%) of members are seen among male gender and female gender by location (i.e., Sonoma County, or Santa Rosa Region or All Partnership).

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

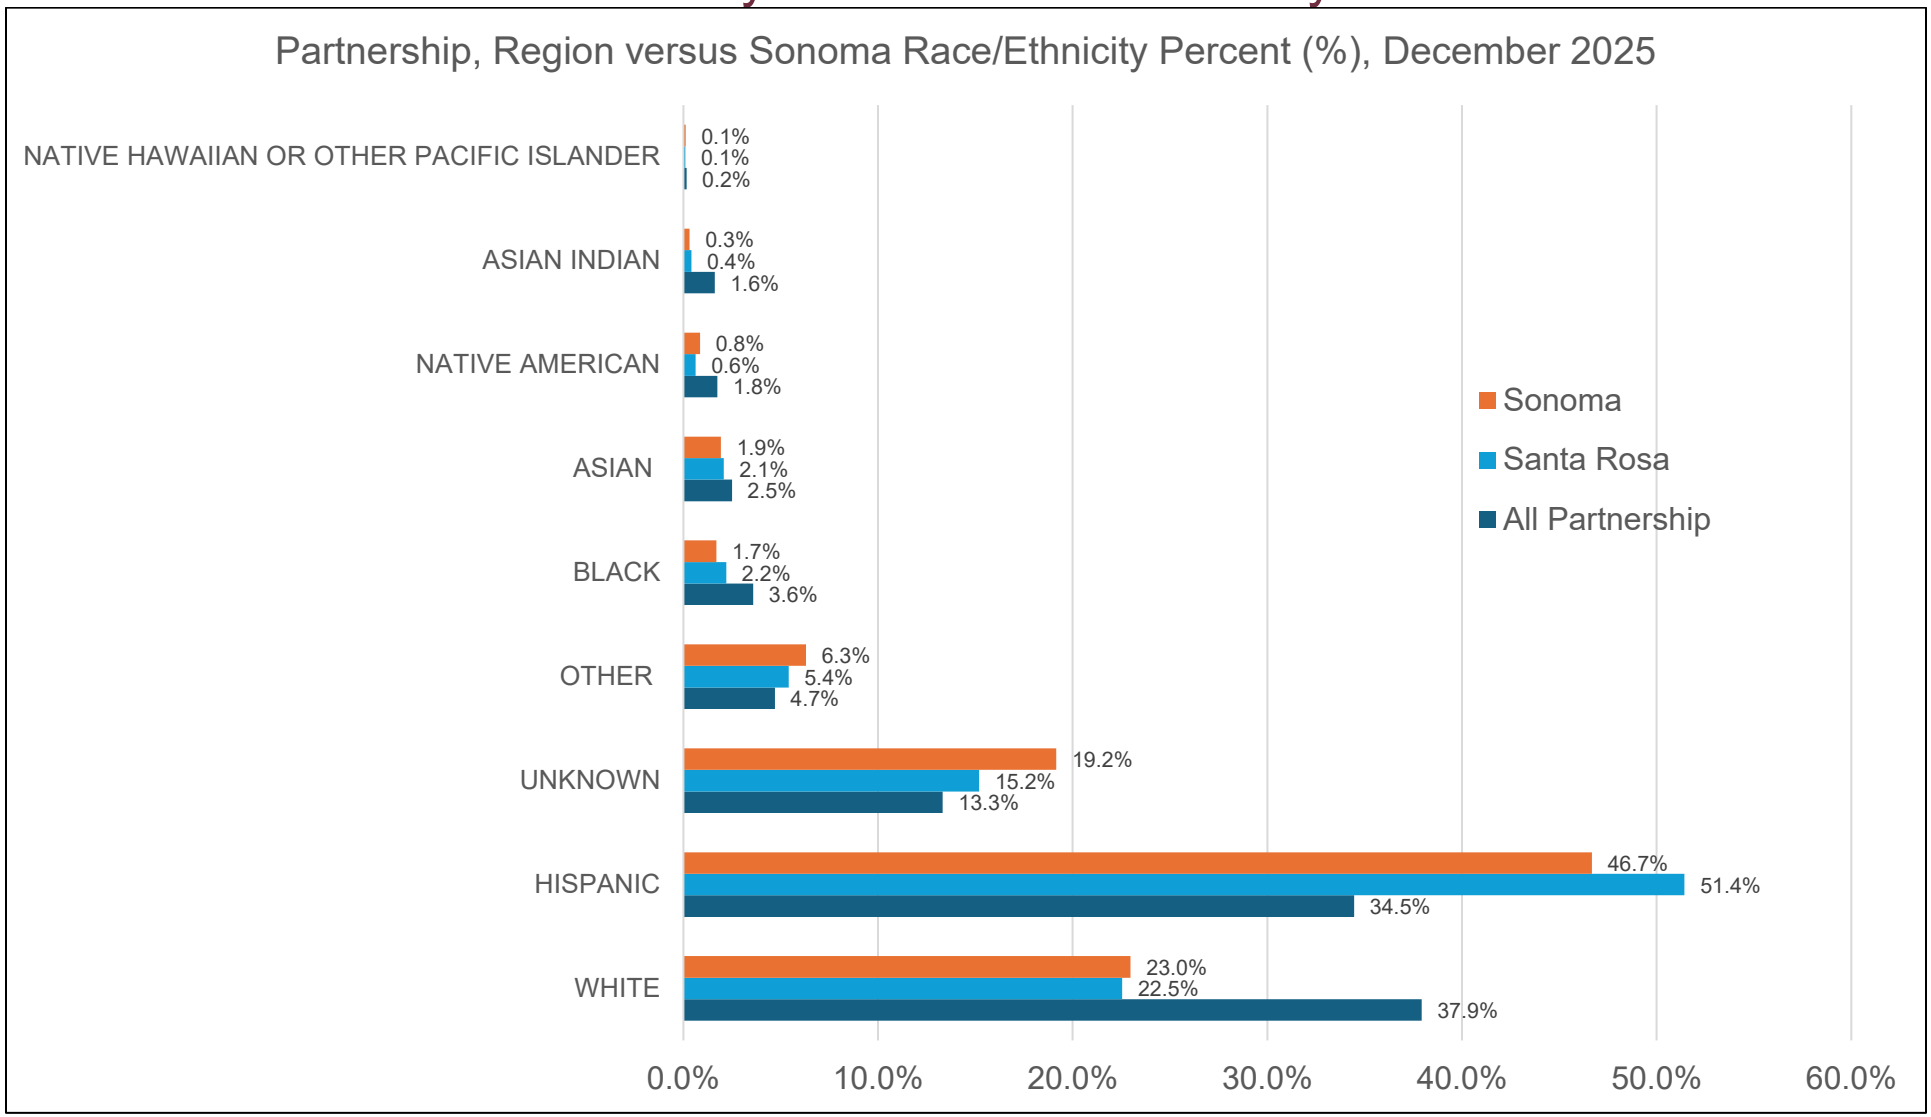
Definition:

- Current Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
- Gender is defined as sex designated at birth – male or female. Gender is completed during enrollment by the state of California DHCS and Partnership's 24 individual counties and determined by California DHCS. Enrollment files for Partnership members are populated and sent to Partnership by the state of California DHCS. Partnership does not determine member gender.
- Calculations:
    - % Gender is the number of enrolled members in the individual gender (i.e., male or female), in the location category (i.e., County, Region, or All Partnership) at the particular point-in-time in question, (i.e., December 31, 2025) divided by the total number of members in all gender (i.e., male and female) in that particular location currently enrolled, multiplied by 100 (%)

Data Source: Partnership Health Analytics Team linked and merged the following datasets by identifiers

- DHCS Enrollment dataset for Partnership Members

Demographics
County Member Race/Ethnicity



Highlights of County Member Race/Ethnicity

Data shows race ethnicity for "All Partnership" enrolled members (dark blue) versus Partnership members in Santa Rosa Office Region (light blue) versus Sonoma residents enrolled in Partnership (orange) as of December 31, 2025. Race/Ethnicity include White, Hispanic, Unknown, Other, Black, Asian, Native American, Asian Indian and Native Hawaiian or Other Pacific Islander. The percentage of White are less in Santa Rosa 22.5% and Sonoma 23.0% compared to All Partnership 37.9%, and so are Black 2.2%, 1.7% and 3.6%, Asian 2.1%, 1.9%, and 2.5%, Native American 0.6%, 0.8%, and 1.8% respectively. Sonoma Hispanic, Race/Ethnicity at 46.7% is however similar to Santa Rosa region at 51.4%, both larger when compared to All Partnership Hispanic population at 34.5%.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Current Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
- Race/Ethnicity is voluntarily completed during enrollment by the state of California DHCS and Partnership's 24 individual counties and determined by California DHCS. Enrollment files for Partnership members are populated and sent to Partnership by the state of California DHCS. Partnership does not determine member Race/Ethnicity category.
- Calculations:
    - % Race/Ethnicity is the number of enrolled members in the individual race/ethnicity group (i.e., White, Hispanic, Unknown, Other, Black, Asian, Native American, Asian Indian and Native Hawaiian or Other Pacific Islander), in the location category (i.e., County, Region, or All Partnership) at the particular point-in-time in question, (i.e., December 31, 2025) divided by the total number of members in all race/ethnicity groups in that particular location currently enrolled, multiplied by 100 (%)

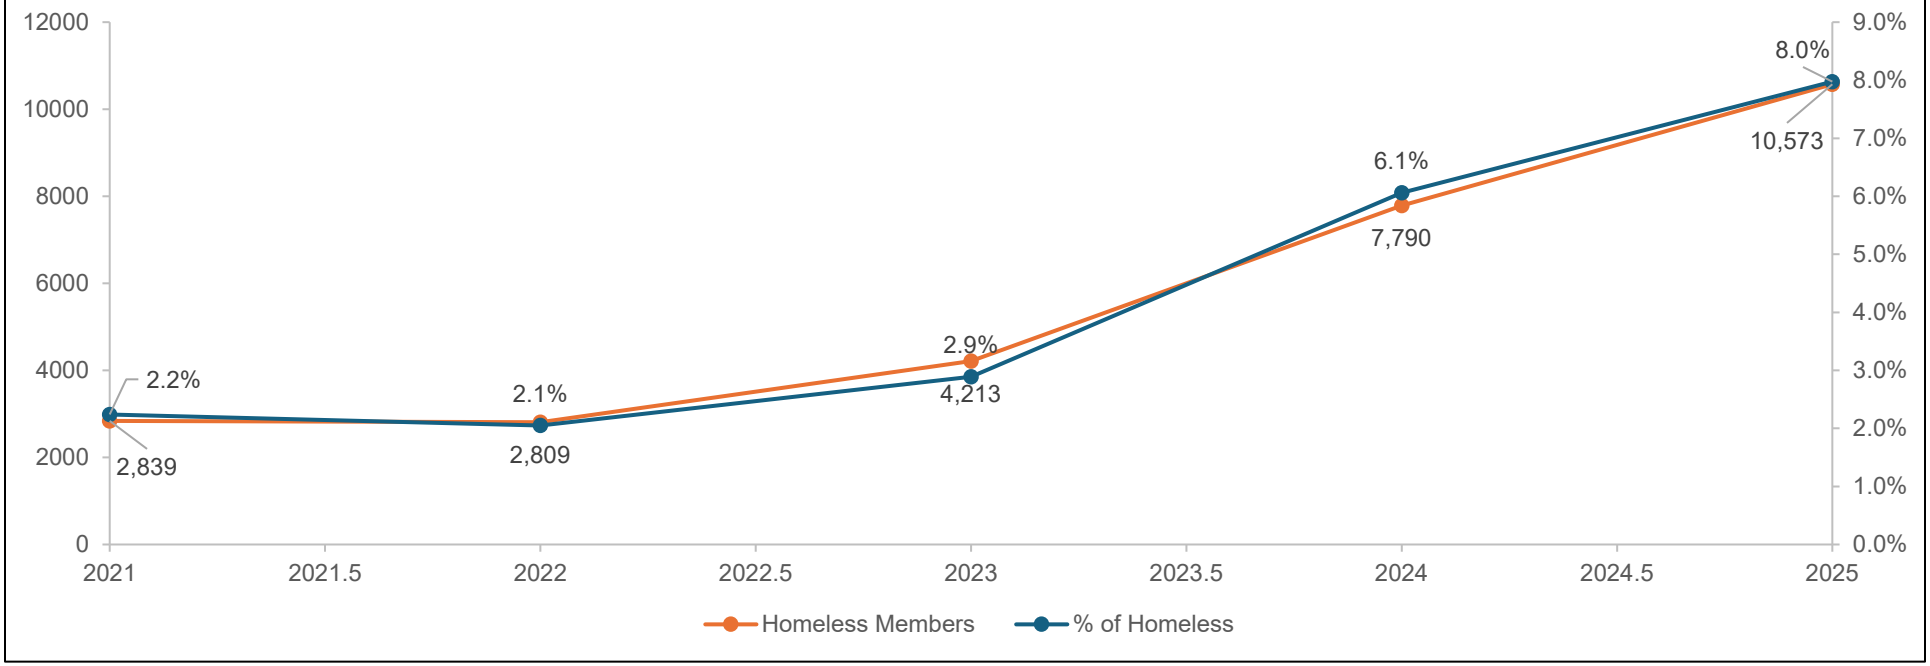
Partnership Homeless Member Number and Percent (%) in Sonoma, 2021-2025



Highlights of County Homeless Demographics

Data shows homeless members distribution among Partnership County residents enrolled from 2021 to 2025. Partnership Homeless population in Sonoma County has increased over the years from 2.2% in 2021 to 8.0% in 2025 due to changes in county enrollment classifications.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
    - Homeless, also called members experiencing housing insecurity is defined as individuals with physical address containing keywords indicating homelessness and claims data with diagnosis codes containing homeless, housing instability, inadequate housing, problems related to housing or living in residential institution, as a keyword.
    - This has nothing to do with point-in-time homeless count surveys implemented by counties.
    - Chronic Homelessness is homelessness for >180 consecutive days.
- Calculations:
    - % Homeless is the number of enrolled members with physical address containing keywords indicating homelessness and claims data with diagnosis codes containing homeless, housing instability, inadequate housing, problems related to housing or living in residential institution, as a keyword in the location category (i.e., County) at the particular point-in-time in question, (i.e., Year 2025; as of December 31, 2025) divided by the total number of members in that particular location currently enrolled, multiplied by 100 (%)

Highlights of Members by County

Data shows Partnership Child Welfare members as a Partnership special population distribution among Partnership County residents enrolled from 2021 to 2025. Partnership Child Welfare members in Sonoma County have been stable over the past five years, 2021-2025 with a high range of 1,180 to 1,295.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Child Welfare Members: Child Welfare Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties. Enrollment follows Medi-Cal Aid Codes used to classify Child Welfare as a special population including Adoption, Aged Out Foster Care, Current Foster Care and Relative Caregiver codes. Enrolled Child Welfare members residing in Partnership 24 counties are assigned to Partnership.
- There are three major categories of Child Welfare:
    - Children under 21 years currently in foster care
    - Children under 21 years and Adopted
    - Children under 21 years who received foster care within the last 12 months
    - Other Categories include:
        - Young Adults who are currently 18-26 years and aged out of foster care after 18 years
        - Adults 27 years and older who have been in foster care at some point in time are also tracked within these systems

Highlights of Percent (%) of Members by County

Data shows Partnership Child Welfare members as a percentage (%) of Partnership population in each county from 2021 to 2025. Partnership Child Welfare members in Sonoma County although high in number, over the past five years, 2021-2025 with a range from 1,180 to 1,295, is one of the lower percentages 1.0% to 1.1% of Partnership Child Welfare members in individual counties (i.e., Sonoma County).

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Child Welfare Members: Child Welfare Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties. Enrolled Child Welfare members residing in Partnership 24 counties are assigned to Partnership.
- Calculations:

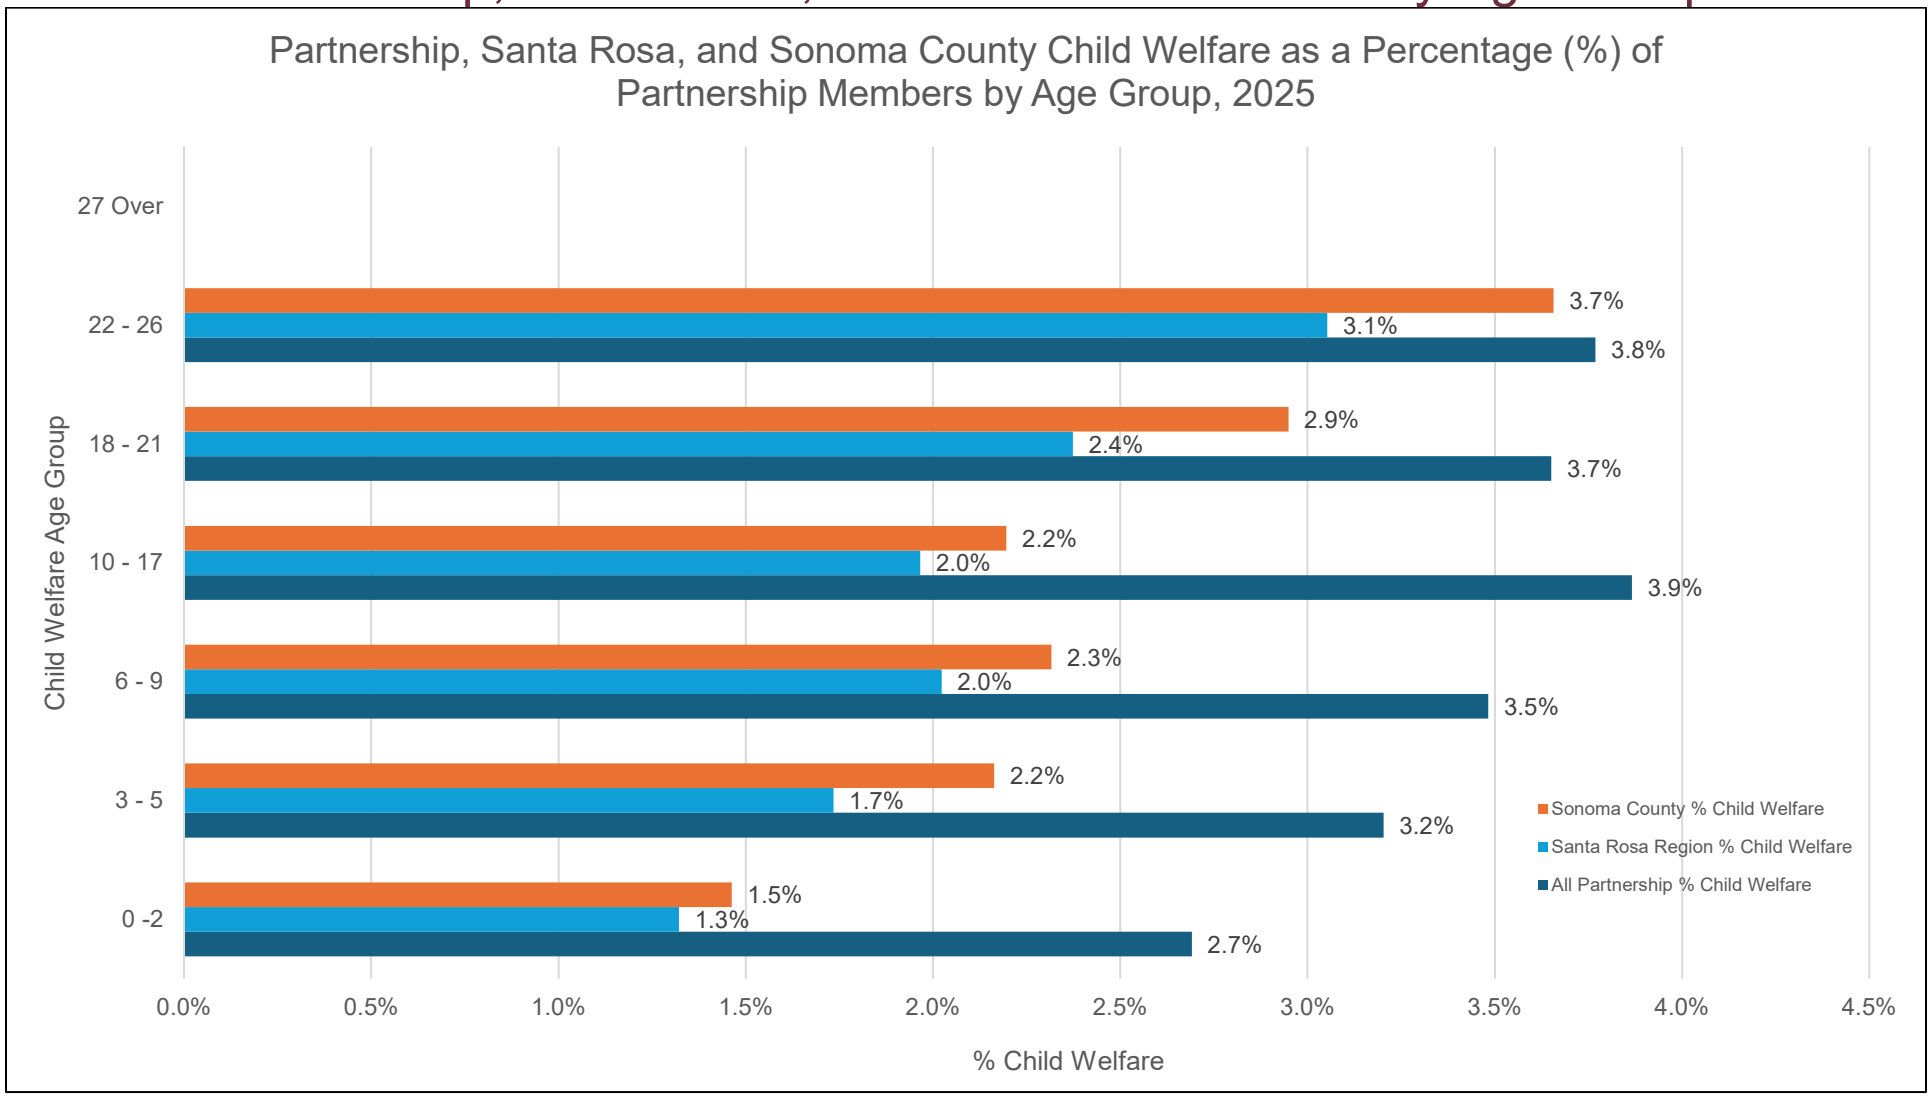
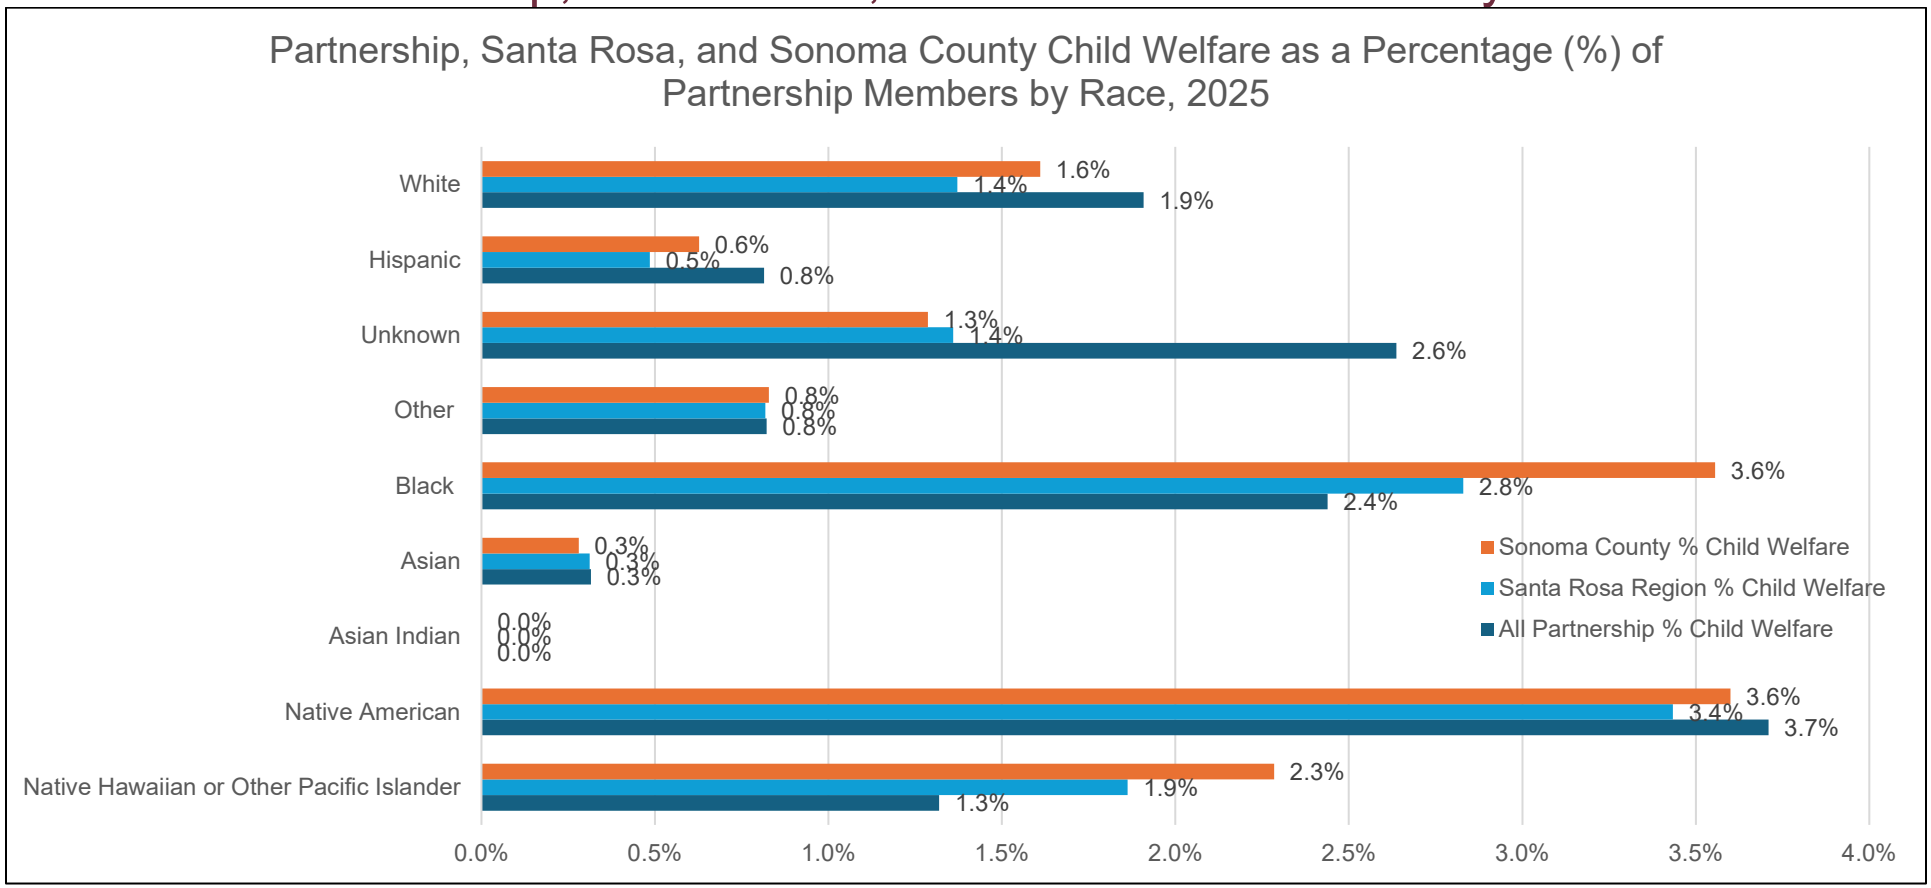
Child Welfare Demographics

Partnership, Santa Rosa, and Sonoma Members by Age Group



Child Welfare Demographics

Partnership, Santa Rosa, and Sonoma Members by Race



Highlights of Partnership, Santa Rosa and Sonoma Members by Age Group and Members by Race

Data shows Partnership Child Welfare members as a percentage (%) of "All Partnership" enrolled members versus Partnership members in Santa Rosa Office Region versus Sonoma County residents enrolled in Partnership as of December 31, 2025. Compared to All Partnership, by age group, there are less percentage (%) of Child Welfare members in each age group in Sonoma County even though Sonoma County has one of the highest populations of Child Welfare in Partnership. The 27 and over age group is currently 0%.

The races with the highest rate (%) of Child Welfare in Sonoma County are Black 3.6% and Native American 3.6% even though these amount to fewer children at 66 and 34 children respectively. These children could be easily targeted for intervention. White Child Welfare has the highest number at 415 and average rate of 1.6%, as of December 31, 2025.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

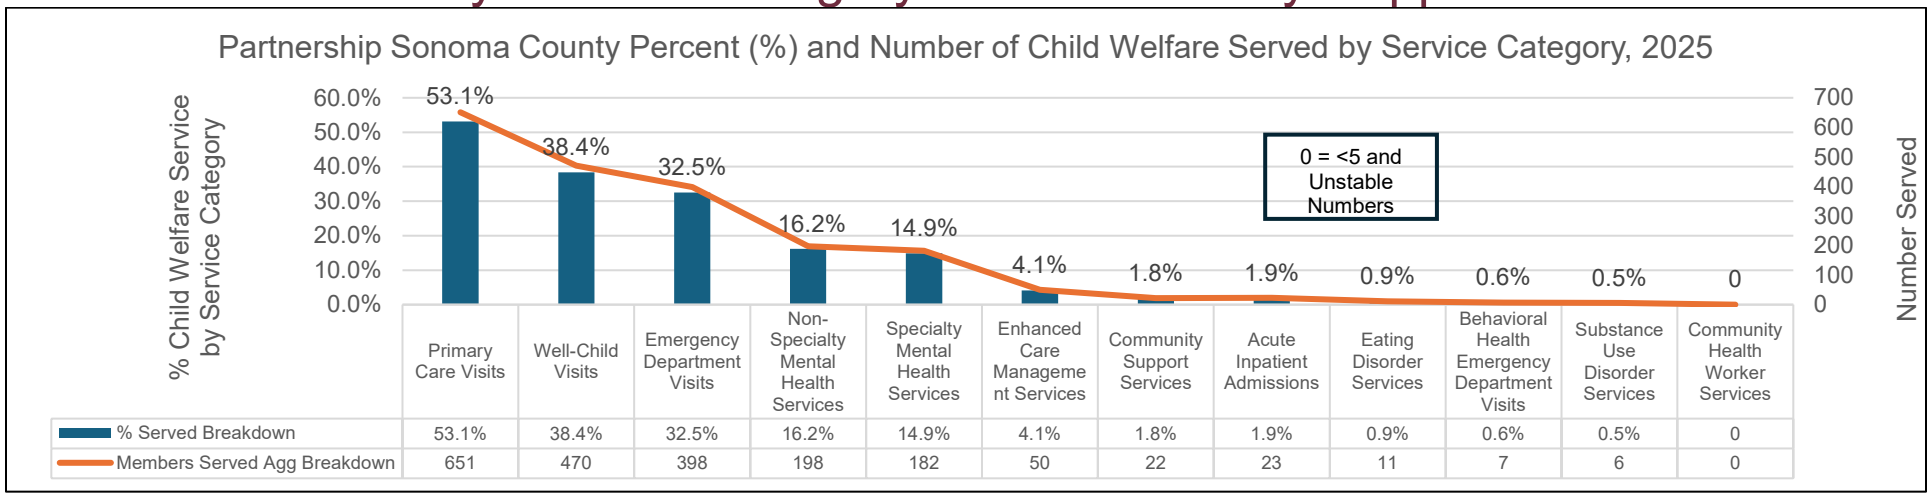
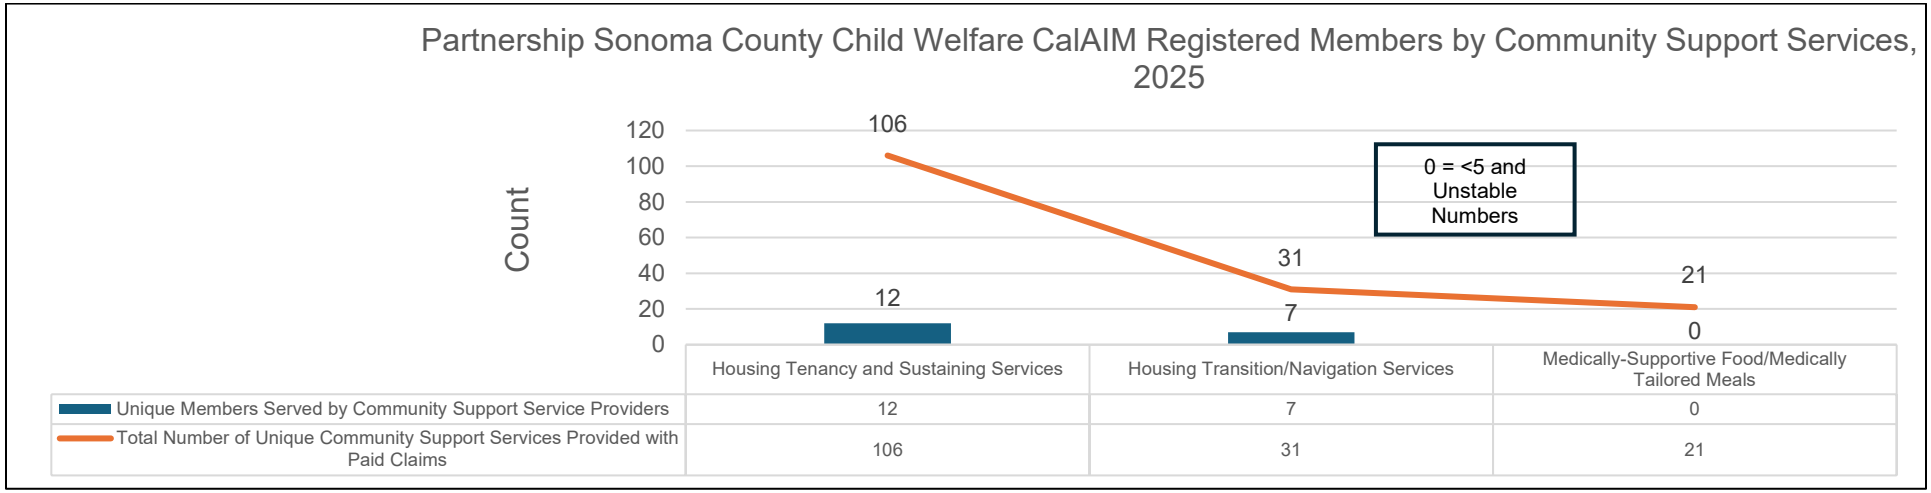
Child Welfare Demographics

Members by Service Category and Community Support Services





Highlights of Members by Service Category and Community Support Services

Data shows Partnership Child Welfare members and the percentage (%) of claims and services by service category as of December 31, 2025. Sonoma County reports as many Well-Child visits (38.4%) as Emergency Department (ED) visits (32.5%) for Partnership Child Welfare members. Total Child Welfare member Mental Health service is 31.1% in Sonoma. Most community services provided include Housing services for a total of 19 distinct members in 2025 and the other is for food.

Note: Unique members served can have multiple services and have claims from several service locations within the same year; hence, these members are not mutually exclusive over service category of diagnosis and location of service. *Agg means Aggregate

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

Sonoma County	1,237	1,235	1,294	1,161	1,253	1,309	1,449	1,506	1,405	1,337

Highlights of Maternal Deliveries & Comparison 2016-2025

Data shows Partnership Maternal Delivery Count over 10 years by county. Sonoma County has one of the highest delivery counts among those whose deliveries Partnership paid for in the Delivery Claims dataset.

Note: Partnership expanded from 14 to 24 counties, adding Butte, Colusa, Glenn, Nevada, Placer, Plumas, Sierra, Sutter, Tehama, and Yuba. Data from the 10 expansion counties became available to Partnership in 2024-2025, explaining the increase in delivery count during this period.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Partnership Maternal Population: is defined as the Maternal Delivery Count.
    - Partnership Maternal Delivery: deliveries Partnership paid for in the Delivery Claims dataset
    - Partnership Maternal Delivery Count is from the DHCS delivery claims data. If a mother has two deliveries in one year, both deliveries will be counted.
    - Partnership Member Maternal Delivery information is determined by individual deliveries during a given year or period. Each delivery is counted once in each category of maternal characteristic.
    - Delivery Claims datasets contain all Partnership Pregnant and those who have delivered up to one year after delivery (up to one year postpartum).

Highlights of Maternal Homelessness

Data shows Partnership Maternal homeless population as a percentage (%) over the past five years, 2021 to 2025 among those whose deliveries Partnership paid for in the Delivery Claims dataset. Sonoma County has had a decrease in number of births and an increase in the number of Maternal homeless population from 2% in 2021 to 11% in 2025.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Partnership Maternal Population: is defined as the Maternal Delivery Count.
    - Partnership Maternal Delivery: deliveries Partnership paid for in the Delivery Claims dataset.
    - Partnership Maternal Delivery Count is from the DHCS delivery claims data. If a mother has two deliveries in one year, both deliveries will be counted.
    - Partnership Member Maternal Delivery information is determined by individual deliveries during a given year or period. Each delivery is counted once in each category of maternal characteristic.
    - Delivery Claims datasets contain all Partnership Pregnant and those who have delivered up to one year after delivery (i.e., Up to one year postpartum).
- Maternal Homeless
    - Homeless, also called members experiencing housing insecurity is defined as individuals with physical address containing keywords indicating homelessness and claims data with diagnosis codes containing homeless, housing instability, inadequate housing, problems related to housing or living in residential institution, as a keyword.
    - This has nothing to do with point-in-time homeless count surveys implemented by counties.
    - Chronic Homelessness is homelessness for >180 consecutive days.
- Calculations:
    - % Maternal Homeless Deliveries:
        - Numerator: Number of Distinct Partnership County Homeless Maternal Deliveries whose deliveries Partnership paid for in the Delivery Claims dataset

Highlights of Maternal Chronic Conditions

Data shows Partnership Maternal Population chronic disease as a percentage (%) of maternal population as of December 31, 2025. In 2021, Corona Virus Pandemic (COVID-19) lockdowns caused a data lag. Data collected was "catch-up" data and incomplete. From 2022-2025, Partnership counties Maternal Chronic Conditions range from 20% to 75% among those whose deliveries Partnership paid for in the Delivery Claims dataset. The highest chronic condition seen in Partnership Maternal population is Anxiety followed by tobacco use at 20.6% and 17.9% average for all counties in 2025. Sonoma County maternal anxiety and tobacco use are however at 16.8% and 9.8% respectively, in 2025.

Sonoma Maternal population has a higher Diabetes, Chronic liver Disease and Trauma and Stressor rate than the Partnership average at 3.5% versus 2.8%, 2.4% versus 1.8% and 12.5% versus 11.6% respectively in 2025.

Note:

- Any one Chronic condition is counted as any Chronic Condition in the Partnership Maternal Population. These conditions are not mutually exclusive in each individual, as one individual may have several chronic conditions. Here, any Maternal individual with any one chronic condition is counted as a Maternal chronic condition.
- The Maternal population are Partnership members who are pregnant and those who have delivered up to one year after delivery (up to one year postpartum). Those who have had these conditions before, during, and/or up to two years after delivery are included in the count for each chronic condition. Pregnancy-related conditions that are not up to two years postpartum are not included here.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Partnership Maternal Population: is defined as the Maternal Delivery Count.
    - Partnership Maternal Delivery: deliveries Partnership paid for in the Delivery Claims dataset
    - Partnership Maternal Delivery Count is from the DHCS delivery claims data. If a mother has two deliveries in one year, both deliveries will be counted.

- Partnership Member Maternal Delivery information is determined by individual deliveries during a given year or period. Each delivery is counted once in each category of maternal clinical characteristics, also known as indicators, being measured.
- Delivery Claims datasets contain all Partnership pregnant and those who have delivered up to one year after delivery (up to one year postpartum).
- Maternal Chronic Conditions:
  - Maternal chronic conditions are defined as any of the conditions listed below, found in either diagnosis or procedure ICD10 codes of any individual in the Partnership Maternal population.
  - Maternal Population includes pregnant people and those who have delivered up to one year after delivery and at least twice over a two-year period.
  - Maternal chronic conditions do not include pregnancy-related conditions (i.e., various classifications of hypertension in pregnancy, when high blood pressure returns to normal right after delivery) and could be diagnosed before, during, or after delivery (up to one year postpartum) and within two years of claims data information gathered.
- Maternal Chronic Conditions are coded using ICD10 codes listed in the Appendix, and include:
  - Anxiety
  - Tobacco Use
  - Obesity
  - Depression
  - Substance Use
  - Trauma and Stressor
  - Chronic Kidney Disease
  - Hypertension
  - Diabetes
  - Bipolar
  - Schizophrenia
  - Chronic Liver Disease
  - Asthma
  - Congestive Health Failure
  - Cancer

        - Traumatic Brain Injury
- Calculations:
    - % Maternal Chronic Conditions:
        - Numerator: number of distinct Partnership county chronic condition maternal deliveries whose deliveries Partnership paid for in the Delivery Claims dataset
        - Denominator: total number of distinct Partnership county maternal deliveries whose deliveries Partnership paid for in the Delivery Claims dataset
        - Rate: multiplied by 100 (%)

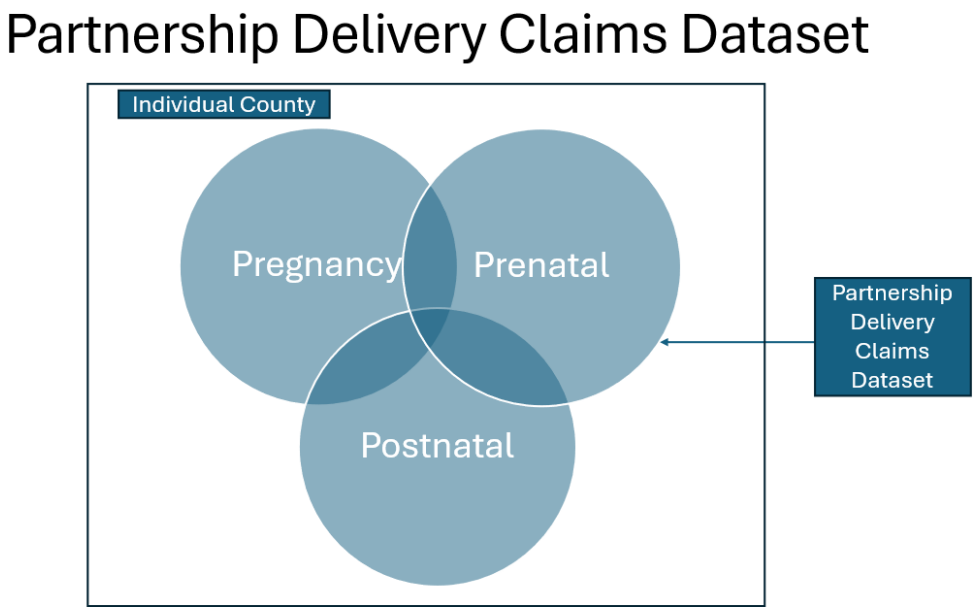
Partnership Postnatal Visit Rate by Delivering Members by Sonoma County, 2021-2025

	Distinct Members 2021	Distinct Members 2022	Distinct Members 2023	Distinct Members 2024	Distinct Members 2025
SONOMA Deliveries	1,309	1,449	1,506	1,405	1,341
SONOMA Postnatal Visit Rate	83.0%	81.6%	76.5%	84.7%	83.7%

Highlights of Maternal Prenatal & Postnatal Visits

Data shows Partnership Maternal Population as a percentage (%) of prenatal and postnatal visits from 2021 to 2025, among those whose deliveries Partnership paid for in the Delivery Claims dataset. For this Partnership Maternal population, prenatal visits range from 58% to 100%. In Partnership's smallest county, Sierra, postnatal visits range from 16% to 94%. Please note that any mother or expectant woman may join Partnership while pregnant, during delivery, or after delivery and may become ineligible while pregnant or after delivery. This data only shows the maternal population whose delivery Partnership paid for.

Sonoma County prenatal and postnatal rates have remained constant over the past five years with slight fluctuation in numbers from 2021 to 2025, a range of rate from 92.6% to 95.6% prenatal care and 76.5% to 84.7% postnatal care, among those whose deliveries Partnership paid for in the Delivery Claims dataset.



The data presented is **not** from the Partnership Healthcare Effectiveness Data and Information Set (HEDIS®) for prenatal visit and postnatal visit estimates. HEDIS data includes medical claims data for all prenatal and postnatal visits for both those whose deliveries were paid for by Partnership and those whose deliveries were not paid by Partnership. To summarize, HEDIS combines All Partnership member data in Medical Claims, Delivery Claims, and Clinical Setting datasets. Partnership hosts HEDIS reports on its web page at www.partnershiphp.org/Providers/Quality/Pages/HEDISLandingPage.aspx, under Annual Summary of Performance (See "MCAS" version).

Note: % Maternal Prenatal Visits are population-based calculations and should not be compared to % visits from statistical sampled population estimates stratified by county or service providers and clinics, as subset of the population estimates as seen in Partnership HEDIS or Partnership Quality Incentive Programs prenatal or postnatal visit estimates.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

ACCREDITED NCQA HEALTH PLAN

Highlights of Maternal Measures in Hospital Quality Improvement Programs

The table compares performance of Hospitals in the Partnership region of 24 Counties reported in the Hospital Compare database with data from California Maternal Quality Care Collaboration (CMQCC) and the California Department of Public Health (CDPH).

Definition:

- 2024 California deliveries reported to the California Maternal Quality Care Collaboration (CMQCC) Maternal Data Center
- NTSV CS: Nulliparous, Tern, Singleton, Vertex (NTSV) Cesarean Section (CS) Birth Rate, a method of delivery abstracted from California Hospital Discharge and Vital Records data, a CMQCC measure.
- Episiotomy Rate: Mothers with maternal birthing surgical cuts to avoid birthing tears during birthing process and prevent excessive bleeding. A CMQCC measure abstracted from California Patient Discharge Data with performance category developed by California Hospital Compare
- VBAC: Vaginal Birth After Cesarean Section (VBAC) are vaginal births after a previous CS. A CMQCC measure abstracted from California Patient Discharge Data with performance category developed by California Hospital Compare.
- Deliveries by Certified Nurse Midwives: A CMQCC measures abstracted from California Patient Discharge Data linked to Birth-Vital Records data with performance category developed by California Hospital Compare.
- Calculations: Performance Scores
    - Number/Total number of live births X 100 (%) for that period (i.e., 2024)
    - State Average: Represents 95% of 2024 California deliveries reported to CMQCC Maternal Data Center
    - Depending on the measure, a five scale or three scale rating is used
    - Five Scale Rating:
        - Superior
        - Above
        - Average
        - Below average
        - Poor
    - Three Scale Rating:
        - Superior
        - Average
        - Poor

Highlights of Anxiety

Data shows Partnership member chronic disease conditions as a percentage (%) of the total number of Partnership members in each county per year from 2021 to 2025. Any-one Chronic Disease Condition is counted as "Any-Chronic Condition." These conditions are not mutually exclusive in each individual, as one individual may have several chronic conditions, hence any-one is counted as a chronic condition. Partnership member chronic disease has been divided into two categories, adult and child. Children are members 0-21 years of age. Anxiety has the highest rate of chronic disease conditions among Partnership adult and child members per 1,000. Partnership members in Sonoma County are at an Anxiety rate range of adult 207-268 per 1,000 adult members and child 88-128 per 1,000 child members from 2021 to 2025.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
    - Chronic Conditions:
        - Chronic conditions are defined as any of the conditions listed below found in either diagnosis or procedure ICD10 codes of any Partnership member claims data at least twice over a two-year period.
        - Partnership member chronic disease information is determined by algorithms from the Chronic Conditions List from the Centers for Medicare & Medicaid Services (CMS) and Health Effectiveness Data and Information Set (HEDIS) specifications. The criteria used to define the different chronic conditions was based on the presence of diagnoses, procedures, or standard therapeutic classification Service Type Codes (STC) in those data sources during a look-back period that varies depending on the disease, usually one-to-two-year.
    - Chronic Disease Conditions are coded using ICD10 codes listed in the Appendix, and include:
        - **Anxiety**, Tobacco Use, Obesity, Depression, Substance Use, Trauma and Stressor, Chronic Kidney Disease, Hypertension, Diabetes, Bipolar, Schizophrenia, Chronic Liver Disease, Asthma, Coronary Artery Disease, Chronic Obstructive Pulmonary Disease (COPD), Congestive Heart Failure, Cancer, Traumatic Brain Injury.
- Calculations:
    - % Adult or Child Chronic Conditions:
        - Numerator: Number of Distinct Adult or Child Chronic Condition in Partnership members per County

  - Denominator: Total Number of Distinct Partnership members per County (i.e., adult or child)
  - Rate: Multiplied by 1,000 (i.e., per 1,000 adult or child Partnership Members)

Highlights of Asthma

Data shows Partnership member chronic disease conditions as a percentage (%) of the total number of Partnership members in each county per year from 2021 to 2025. Any-one Chronic Disease Condition is counted as "Any-Chronic Condition." These conditions are not mutually exclusive in each individual, as one individual may have several chronic conditions, hence any-one is counted as a chronic condition. Partnership member chronic disease has been divided into two categories, adult and child. Children are members 0-21 years of age. Asthma is seen in more children than adults as a chronic disease among Sonoma County Partnership members. Partnership members in Sonoma County are at an Asthma rate range of 23-44 per 1,000 adult members and child 29-48 per 1,000 child members from 2021 to 2025.

In 2025, there were fewer wildfires in North of California than 2021-2024, hence the relatively lower rates noticed in 2025 across all counties.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
    - Chronic Conditions:
        - Chronic conditions are defined as any of the conditions listed below found in either diagnosis or procedure ICD10 codes of any Partnership member claims data at least twice over a two-year period.
        - Partnership member chronic disease information is determined by algorithms from the Chronic Conditions List from the Centers for Medicare & Medicaid Services (CMS) and HEDIS specifications. The criteria used to define the different chronic conditions was based on the presence of diagnoses, procedures, or standard therapeutic classification Service Type Codes (STC) in those data sources during a look-back period that varies depending on the disease, usually one-to-two-year.
    - Chronic Disease Conditions are coded using ICD10 codes listed in the Appendix, and include:
        - Anxiety, Tobacco Use, Obesity, Depression, Substance Use, Trauma and Stressor, Chronic Kidney Disease, Hypertension, Diabetes, Bipolar, Schizophrenia, Chronic Liver Disease, **Asthma**, Coronary Artery Disease, Chronic Obstructive Pulmonary Disease (COPD), Congestive Heart Failure, Cancer, Traumatic Brain Injury.
- Calculations:

- % Adult or Child Chronic Conditions:
  - Numerator: Number of Distinct Adult or Child Chronic Condition in Partnership members per County
  - Denominator: Total Number of Distinct Partnership members per County (i.e., adult or child)
  - Rate: Multiplied by 1,000 (i.e., per 1,000 adult or child Partnership Members)

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
    - Chronic Conditions:
        - Chronic conditions are defined as any of the conditions listed below found in either diagnosis or procedure ICD10 codes of any Partnership member claims data at least twice over a two-year period.
        - Partnership member chronic disease information is determined by algorithms from the Chronic Conditions List from the Centers for Medicare & Medicaid Services (CMS) and HEDIS specifications. The criteria used to define the different chronic conditions was based on the presence of diagnoses, procedures, or standard therapeutic classification Service Type Codes (STC) in those data sources during a look-back period that varies depending on the disease, usually one-to-two-year.
    - Chronic Disease Conditions are coded using ICD10 codes listed in the Appendix, and include:
        - Anxiety, Tobacco Use, Obesity, Depression, Substance Use, Trauma and Stressor, Chronic Kidney Disease**,** Hypertension, Diabetes, Bipolar, Schizophrenia, Chronic Liver Disease, Asthma, Coronary Artery Disease, **Chronic Obstructive Pulmonary Disease (COPD)**, Congestive Heart Failure, Cancer, Traumatic Brain Injury.
- Calculations:
    - % Adult or Child Chronic Conditions:
        - Numerator: Number of Distinct Adult or Child Chronic Condition in Partnership members per County

  - Denominator: Total Number of Distinct Partnership members per County (i.e., adult or child)
  - Rate: Multiplied by 1,000 (i.e., per 1,000 adult or child Partnership Members)

Note: Partnership Child Coronary Artery Disease Condition prevalence data is too small to interpret.

Highlights of Coronary Artery Disease

Data shows Partnership member chronic disease conditions as a percentage (%) of the total number of Partnership members in each county per year from 2021 to 2025. Any-one Chronic Disease Condition is counted as "Any-Chronic Condition." These conditions are not mutually exclusive in each individual, as one individual may have several chronic conditions, hence any-one is counted as a chronic condition. Partnership member chronic disease has been divided into two categories, adult and child. Children are members 0-21 years of age. Coronary Artery Disease is seen in more adults than children. The child rates have been removed because they are small and unstable. Partnership members in Sonoma County are at a coronary artery disease adult rate range of 7-10 per 1,000 adult members from 2021 to 2025.

Note: * County reports numbers <5 and unstable rates.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

Highlights of Partnership and Sonoma Dental Service to Members by Service Category/Month

Data shows Partnership member Dental services reported as dental services in 3 categories by Month. The services in each of the categories are unique for that month only.

Note:

- A member may go for support services in January, Diagnostic services in June and Treatment services in November or have all three services in one day. The services should not be added across months to make a year; services here should only be interpreted by month.
- Data released to Partnership by DHCS are three months behind.
- Data for the months of June and November are incomplete and may upload and update in the future.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
- Dental Services
    - Partnership Member Dental Service information is determined by algorithms from the American Dental Association code on Dental Procedures and Nomenclature, called Dental codes (D-Codes) and the International Classification of Disease, 10th Revision (ICD10 Codes) in medical claims.
    - Dental categories were determined from the American Dental Association code on Dental Procedures and Nomenclature, 2022 and include: Diagnostic Services; Preventive Services; Restorative Services; Specialized Services; Adjective Services; Unclassified Services
    - For the purpose of this publication, Dental categories have been simplified into three categories below:
        - **Prevention & Early Detection**: Preventive Diagnostic & Preventive
        - **Treatment & Intervention**: Restorative & Specialized
        - **Support / Other**: Adjunctive General & Uncategorized
    - The data is three-Months behind: The state of California DHCS/Capitated members or Fee-for-Service (FFS) pays for the service reported in the Partnership dental database, with insurance varying from Medicaid for adults and for children, to Medicare Part A and B for senior citizens

Data Source: Partnership Health Analytics Team linked and merged the following datasets by identifiers

Highlights of Partnership and Sonoma Dental Service Category by Child Members/Month

Data shows Partnership members served reported by dental services in 3 categories by Month. The unique members in each service category are unique for that month only. Members have been divided into Child, 0-20 years and Adult, 21+ years.

Note:

- A unique member may go for support services in January, Diagnostic services in June and Treatment services in November or have all three services in one day. The unique members should not be added across months to make a year; unique members here should only be interpreted as unique by month.
- Data released to Partnership by DHCS are three months behind.
- Data for the months of June and November are incomplete and may upload and update in the future.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
- Dental Services
    - Partnership Member Dental Service information is determined by algorithms from the American Dental Association code on Dental Procedures and Nomenclature, called Dental codes (D-Codes) and the International Classification of Disease, 10th Revision (ICD10 Codes) in medical claims.
    - Dental categories were determined from the American Dental Association code on Dental Procedures and Nomenclature, 2022 and include: Diagnostic Services; Preventive Services; Restorative Services; Specialized Services; Adjective Services; Unclassified Services
    - For the purpose of this publication, Dental categories have been simplified into three categories below:
        - **Prevention & Early Detection**: Preventive Diagnostic & Preventive
        - **Treatment & Intervention**: Restorative & Specialized
        - **Support / Other**: Adjunctive General & Uncategorized
    - The data is three-Months behind: The state of California DHCS/Capitated members or Fee-for-Service (FFS) pays for the service reported in the Partnership dental database, with insurance varying from Medicaid for adults and for children, to Medicare Part A and B for senior citizens

Highlights of Partnership Member Population per Dentist by County & Members per Hygienist by County

In United States, the number of Dentists per 100,000 resident population is 60.84 Dentists per 100,000 (60.84:100,000) as of 2021, according to Centers for Disease Control and Prevention's (CDC) map of the American Dental Association Health Policy Institute article on Supply of Dentists in U.S. 2001-2021. This is the same as one Dentist per 1,643 resident-population (1:1,643) as of 2021. Sonoma county ranks 10th out of 24 Partnership counties when access to dental services is assessed. As of 2025, the member per dentist ratio for Sonoma County was one Dentist per 2,048 Sonoma County Partnership members (1:2,048). Sonoma County reported 54 dentists serving 110,586 Partnership members. Sonoma County also reports that 19 hygienists served 110,858 Partnership member residents in 2025. That is, one hygienist per 5,834.6 resident population (1:5,834.6).

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

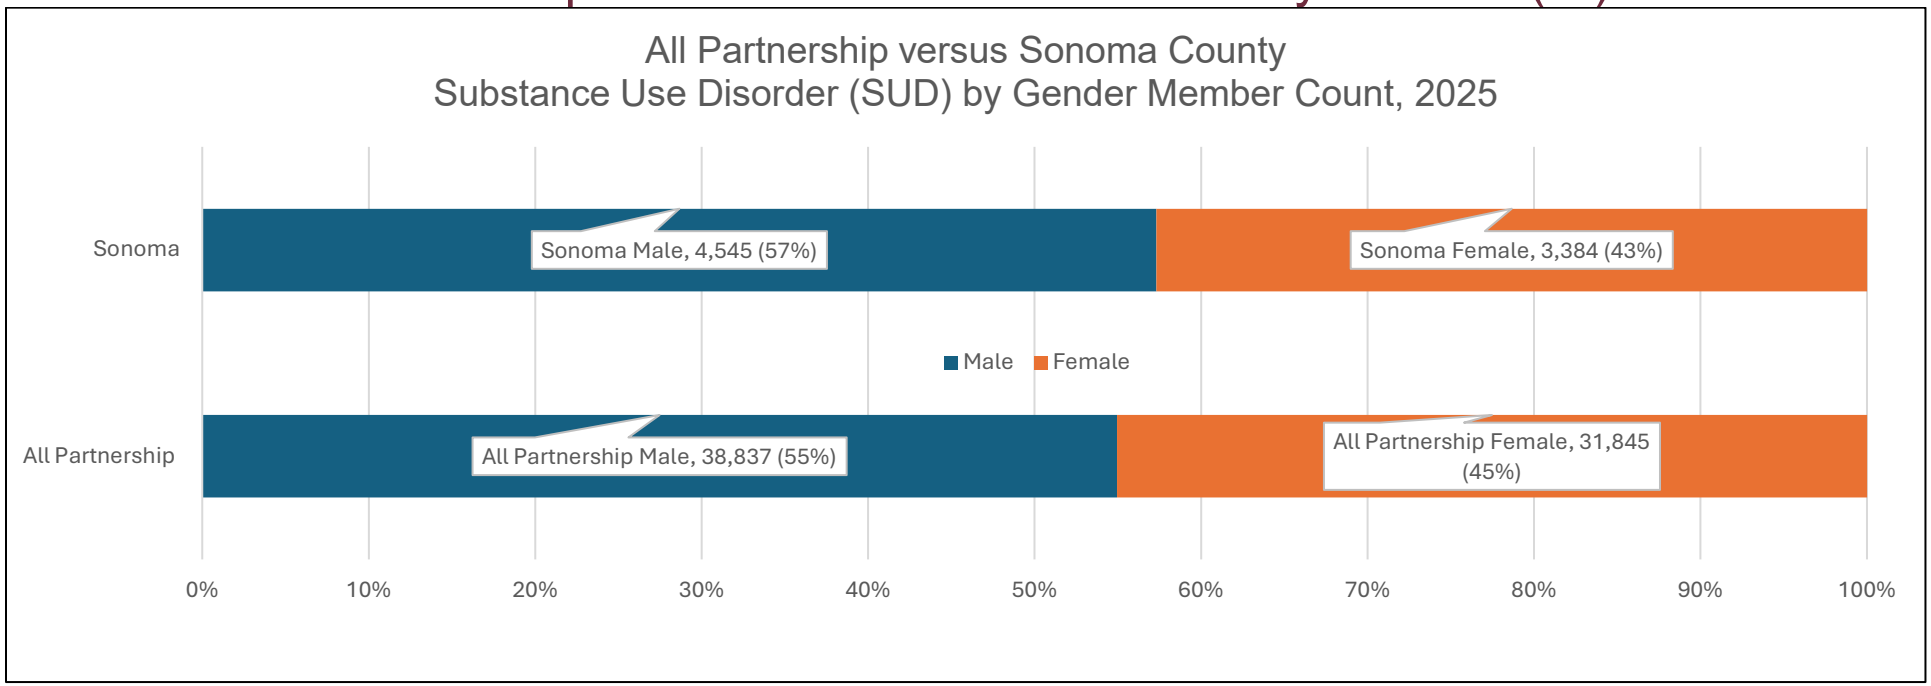
Substance Use Disorder

For more information, see Substance Use Disorder in the Appendix

Substance Use Disorder

Partnership and Sonoma SUD Member by Gender (%)



Highlights of Partnership and Sonoma SUD Member by Gender (%)

Partnership members' substance use disorder (SUD) claims, both male (55%) and female (45%), are similar to Sonoma County at 57% male and 43% female.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

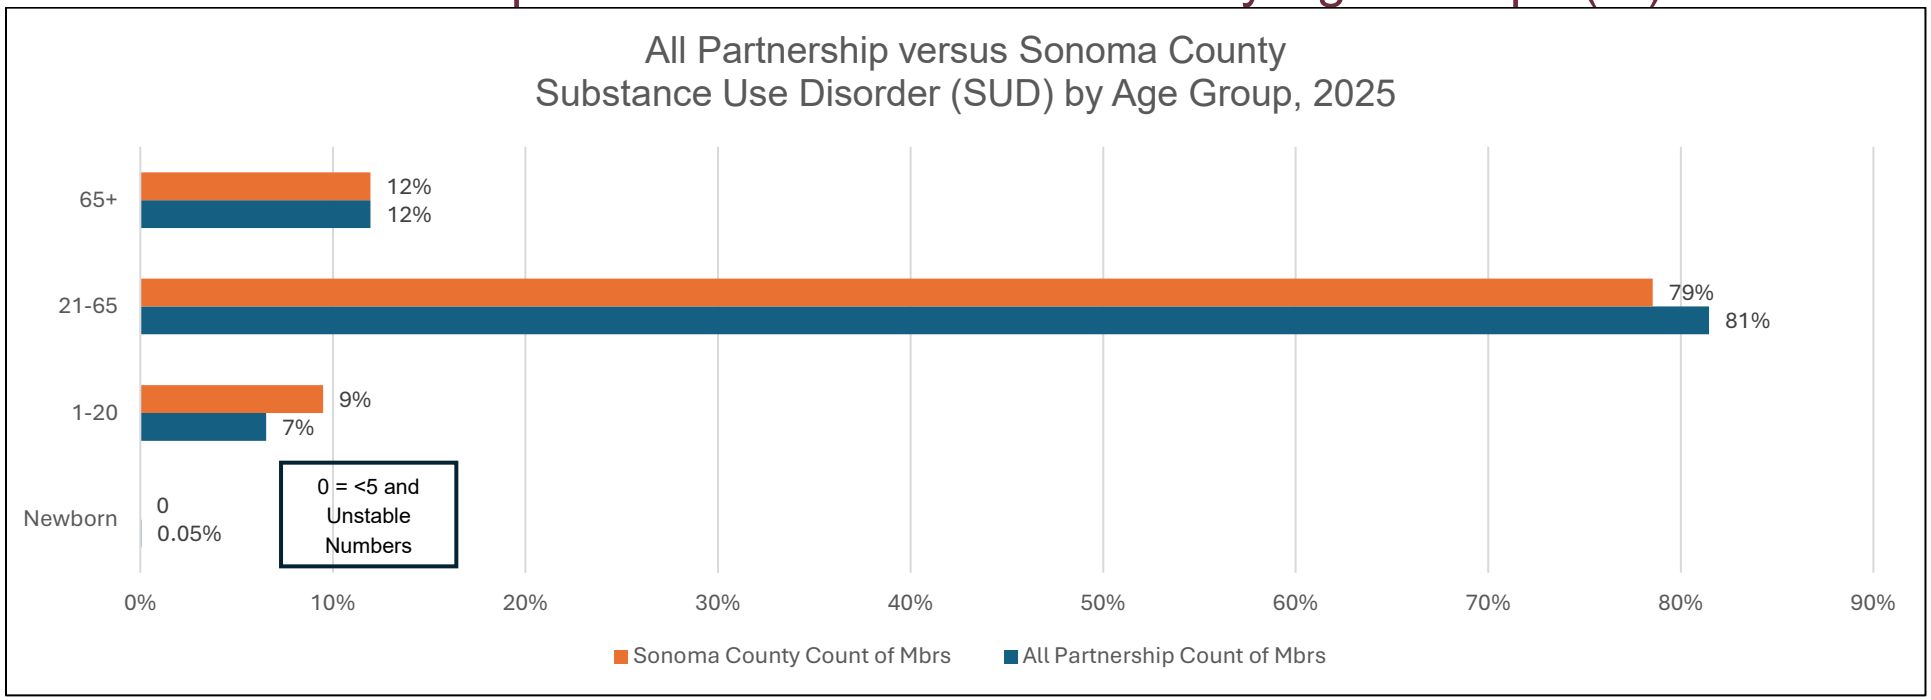
- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
- Member Count: Unique Partnership member count utilizing services.
- % Gender is the number of enrolled members in the individual gender (i.e., male or female), in the location category (i.e., Sonoma County, or All Partnership) at the particular point-in-time in question, (i.e., December 31, 2025) divided by the total number of members in all gender (i.e., male and female) in that particular location currently enrolled, multiplied by 100 (%)

Data Source: Partnership Health Analytics Team linked and merged the following datasets by identifiers

- DHCS Enrollment dataset for Partnership Members
- DHCS Medical Claims data
- Carelon Healthcare Services claims
- County Mental Health data
- Pharmacy (Rx) claims

Substance Use Disorder

Partnership and Sonoma SUD Member by Age Groups (%)



Highlights of Partnership and Sonoma SUD Member by Age Groups (%)

Partnership members with SUD claims are reported as 12% over 65 years, 81% ages 21-65, 7% ages 1-20, and 0.05% newborn, while Sonoma member claims by age group are reported as 12% over 65 years, 79% ages 21-65, 9% ages 1-20, and 0.001% newborn.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
- Member Count: Unique Partnership member count utilizing services.
- % Age Group is the number of enrolled members in the individual age group (i.e., 0-20, 21-65 and over 65 years), in the location category (i.e., Sonoma County, or All Partnership) at the particular point-in-time in question, (i.e., December 31, 2025) divided by the total number of members in all age-groups in that particular location currently enrolled, multiplied by 100 (%)

Data Source: Partnership Health Analytics Team linked and merged the following datasets by identifiers

- DHCS Enrollment dataset for Partnership Members
- DHCS Medical Claims data

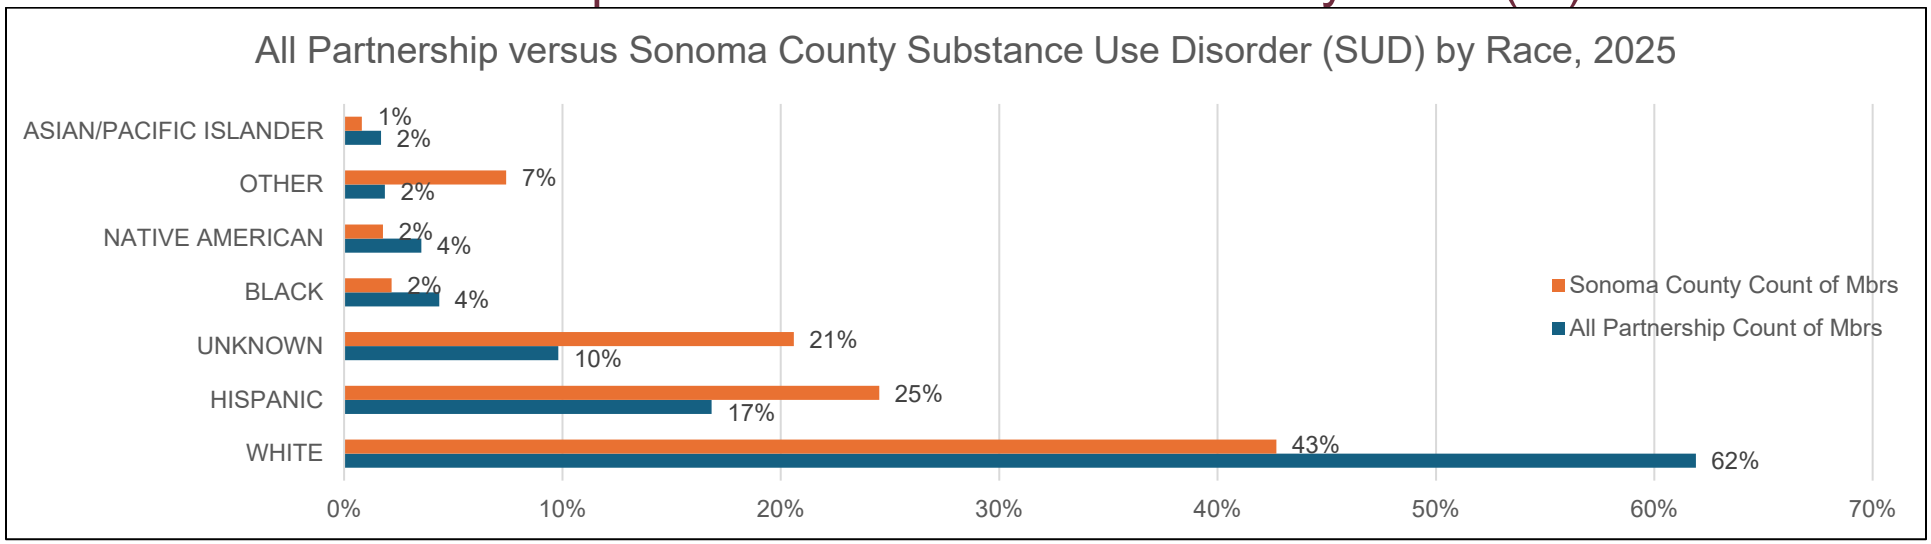
Substance Use Disorder

Partnership and Sonoma SUD Member by Race (%)



Highlights of Partnership and Sonoma SUD Member by Race (%)

Sonoma County makes up 11% of all Partnership members with SUD claims. White member SUD claims making up 43% (vs. Partnership at 62%). Sonoma had a higher SUD claim race category reported for Other race at 7%, Unknown 21%, and Hispanic 25%, compared to all of Partnership with Other race at 2%, Unknown 10%, and Hispanic at 17 in 202% in 2025.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Race/Ethnicity is voluntarily completed during enrollment by the state of California DHCS and Partnership's 24 individual counties and determined by California DHCS.
- Member Count: Unique Partnership member count utilizing services.
- % Race/Ethnicity is the number of enrolled members in the individual race/ethnicity group (i.e., White, Hispanic, Unknown, Other, Black, Asian, Native American, Asian Indian and Native Hawaiian or Other Pacific Islander), in the location category (i.e., Sonoma County, or All Partnership) at the particular point-in-time in question, (i.e., December 31, 2025) divided by the total number of members in all race/ethnicity groups in that particular location currently enrolled, multiplied by 100 (%)

Highlights of Partnership and Sonoma Member Counts by SUD Diagnosis

The graphs show SUD Member Count, unique Partnership member count utilizing services rendered by diagnosis claims. Comparing Sonoma to all of Partnership, Sonoma has more alcohol SUD claims member count and claims paid per member per year per 1,000 Partnership Sonoma County members, while Opioids in Sonoma County are lower than all Partnership numbers.

Note: In 2024, Partnership expanded from 14 to 24 counties, adding Butte, Colusa, Glenn, Nevada, Placer, Plumas, Sierra, Sutter, Tehama, and Yuba. Data from the 10 expansion counties became available to Partnership in 2024-2025, explaining the increase in SUD count during this period.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
- Member Count: Unique Partnership member count utilizing services by diagnosis claims.
    - The treatment of the following most frequently occurring substances are monitored using the International Classification of Disease, 10th Revision for medical claims based on diagnosis (ICD10 Codes):
        - Alcohol
        - Opioids
        - Stimulants
        - Cannabis
        - Sedatives
        - Drug Abuse including nonspecific diagnosis of drug abuse and dependance
        - Other, including Psychodysleptic/Hallucinogenic drugs, Lysergic Acid Diethylamide (LSD), Barbiturate, and Methylphenidates

Note: Unique members can have multi-drug SUD and have claims from several service locations within the same year; hence, these members are not mutually exclusive between category of diagnosis and location of service.

Claims PMPY*1000: Count of Service/Claim Per Member per Year (12) per 1000

Highlights of Partnership and Sonoma SUD Diagnoses Paid Claims Per Member Per Year (PMPY) Per 1,000
The graphs show SUD Paid Claims: Number of Substance Use services rendered by diagnosis claims.

Note: In 2024, Partnership expanded from 14 to 24 counties, adding Butte, Colusa, Glenn, Nevada, Placer, Plumas, Sierra, Sutter, Tehama, and Yuba. Data from the 10 expansion counties became available to Partnership in 2024-2025, explaining the increase in SUD count during this period.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
- Member Count: Unique Partnership member count utilizing services rendered by diagnosis claims.
- Paid Claims: Number of Substance Use services rendered by diagnosis claims.
  The treatment of the following most frequently occurring substances are monitored using the International Classification of Disease, 10th Revision for medical claims based on diagnosis (ICD10 Codes):
  - Alcohol
  - Opioids
  - Stimulants
  - Cannabis
  - Sedatives
  - Drug Abuse including nonspecific diagnosis of drug abuse and dependance
  - Other, including Psychodysleptic/Hallucinogenic drugs, Lysergic Acid Diethylamide (LSD), Barbiturate, and Methylphenidates
- Calculations:
  - Claims PMPY*1,000: The rate calculated from the number of Claims per Member per Year (12 months) per 1,000 Partnership Members.

        - Count of Service (i.e., SUD) paid in claims in particular location, at the particular point-in-time divided by the Total Number of paid claims in particular location, at the particular point-in-time per Member per Year (12) per 1000 Members in particular location.
    - This is calculated so for every 1,000 Partnership members with any diagnosis, in any service location, and any county, rates can be compared in the same way per 1,000 Partnership members per Member per Year.

Note: Unique members can have multi-drug SUD and have claims from several service locations within the same year; hence, these members are not mutually exclusive between category of diagnosis and location of service.

Highlights of Partnership and Sonoma Member Count by SUD Service Location

The graphs present SUD Member Count, unique Partnership member count utilizing services rendered by location claims. Most of Sonoma's SUD claim members were seen at Provider Office Visits and the Emergency Department (ED), similar to all of Partnership, while the most claims paid per member per year per 1,000 were for services located at the Provider Office, ED, Inpatient Hospital stay, and Other category. For all of Partnership, the most claims paid were for Substance Use Facilities and Provider Office Visits. Very few claims were recorded for Substance Use Facilities in Sonoma County. Places of service marked as "Other" are defined by the CMS Place of Service Code Set as unidentified service locations.

Note: In 2024, Partnership expanded from 14 to 24 counties, adding Butte, Colusa, Glenn, Nevada, Placer, Plumas, Sierra, Sutter, Tehama, and Yuba. Data from the 10 expansion counties became available to Partnership in 2024-2025, explaining the increase in SUD count during this period.

Highlights of Partnership & Sonoma Homeless Member Count by SUD Diagnosis

The graphs present SUD Homeless Member Count, unique Partnership member count utilizing services rendered by diagnosis claims. Partnership and Sonoma Homeless Members with SUD had Alcohol, Opioids, and Stimulants as the highest substances by claim count. Sonoma homeless have more alcohol claims paid per member per year per 1,000 Sonoma County members, while Partnership has a higher Opioid claim rate. Location of service for homeless in all of Partnership and Sonoma County are similar to other Partnership members.

Note: In 2024, Partnership expanded from 14 to 24 counties, adding Butte, Colusa, Glenn, Nevada, Placer, Plumas, Sierra, Sutter, Tehama, and Yuba. Data from the 10 expansion counties became available to Partnership in 2024-2025, explaining the increase in SUD count during this period.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
- Homeless Member Count: Unique Partnership member count utilizing services rendered by diagnosis claims, with physical address containing keywords indicating homelessness and claims data with diagnosis codes containing the following keywords: homeless, housing instability, inadequate housing, problems related to housing or living in residential institution.
    - The treatment of the following most frequently occurring substances are monitored using the International Classification of Disease, 10th Revision for medical claims based on diagnosis (ICD10 Codes):
        - Alcohol
        - Opioids
        - Stimulants
        - Cannabis
        - Sedatives
        - Drug Abuse including nonspecific diagnosis of drug abuse and dependance
        - Other, including Psychodysleptic/Hallucinogenic drugs, Lysergic Acid Diethylamide (LSD), Barbiturate, and Methylphenidates

Note: Unique members can have multi-drug SUD and have claims from several service locations within the same year; hence, these members are not mutually exclusive between category of diagnosis and location of service.

Claims PMPY*1000: Count of Service/Claim Per Member per Year (12) per 1000

Highlights of Partnership & Sonoma Homeless Member SUD Diagnoses Paid Claims Per Member Per Year (PMPY) Per 1,000
The graphs present Homeless SUD Paid Claims: Number of Substance Use services rendered by diagnosis claims.

Note: In 2024, Partnership expanded from 14 to 24 counties, adding Butte, Colusa, Glenn, Nevada, Placer, Plumas, Sierra, Sutter, Tehama, and Yuba. Data from the 10 expansion counties became available to Partnership in 2024-2025, explaining the increase in SUD count during this period.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
- Homeless Member Count: Unique Partnership member count utilizing services rendered by diagnosis claims, with physical address containing keywords indicating homelessness and claims data with diagnosis codes containing the following keywords: homeless, housing instability, inadequate housing, problems related to housing or living in residential institution.
- Paid Claims: Number of Substance Use services rendered by diagnosis claims.
    - The treatment of the following most frequently occurring substances are monitored using the International Classification of Disease, 10th Revision for medical claims based on diagnosis (ICD10 Codes):
        - Alcohol
        - Opioids
        - Stimulants
        - Cannabis
        - Sedatives
        - Drug Abuse including nonspecific diagnosis of drug abuse and dependance
        - Other, including Psychodysleptic/Hallucinogenic drugs, Lysergic Acid Diethylamide (LSD), Barbiturate, and Methylphenidates
- Calculations:
    - Claims PMPY*1,000: The rate calculated from the number of Claims per Member per Year (12 months) per 1,000 Partnership Members.

        - Count of Service (i.e., SUD) paid in claims in particular location, at the particular point-in-time divided by the Total Number of paid claims in particular location, at the particular point-in-time per Member per Year (12) per 1000 Members in particular location.
    - This is calculated so for every 1,000 Partnership members with any diagnosis, in any service location, and any county, rates can be compared in the same way per 1,000 Partnership members per Member per Year.

Note: Unique members can have multi-drug SUD and have claims from several service locations within the same year; hence, these members are not mutually exclusive between category of diagnosis and location of service.

Highlights of Partnership and Sonoma Maternal Member Count by SUD Diagnosis

The graphs present Maternal SUD Member Count, unique Partnership member count utilizing services rendered by diagnosis claims. The Maternal Partnership population's (pregnant women and mothers within one year of delivery) top three categories among those whose deliveries Partnership paid for in the Delivery Claims datasets are alcohol, opioids, and stimulant SUDs, while Partnership maternal members in Sonoma County have more alcohol and stimulant SUDs.

Note: In 2024, Partnership expanded from 14 to 24 counties, adding Butte, Colusa, Glenn, Nevada, Placer, Plumas, Sierra, Sutter, Tehama, and Yuba. Data from the 10 expansion counties became available to Partnership in 2024-2025, explaining the increase in SUD count during this period.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
- Member Count: Unique Partnership member count utilizing services by diagnosis claims.
- Maternal population: are Partnership members who are pregnant and those who have delivered up to one year after delivery (up to one year postpartum). Those who have had these conditions before, during, and/or up to two years after delivery are included in the count for SUD.
- Total Maternal SUD: Maternal population among those whose deliveries Partnership paid for in the Delivery Claims datasets who have been diagnosed with SUD.
- The treatment of the following most frequently occurring substances are monitored using the International Classification of Disease, 10th Revision for medical claims based on diagnosis (ICD10 Codes):
    - Alcohol
    - Opioids
    - Stimulants
    - Cannabis
    - Sedatives
    - Drug Abuse including nonspecific diagnosis of drug abuse and dependance

Substance Use Disorder

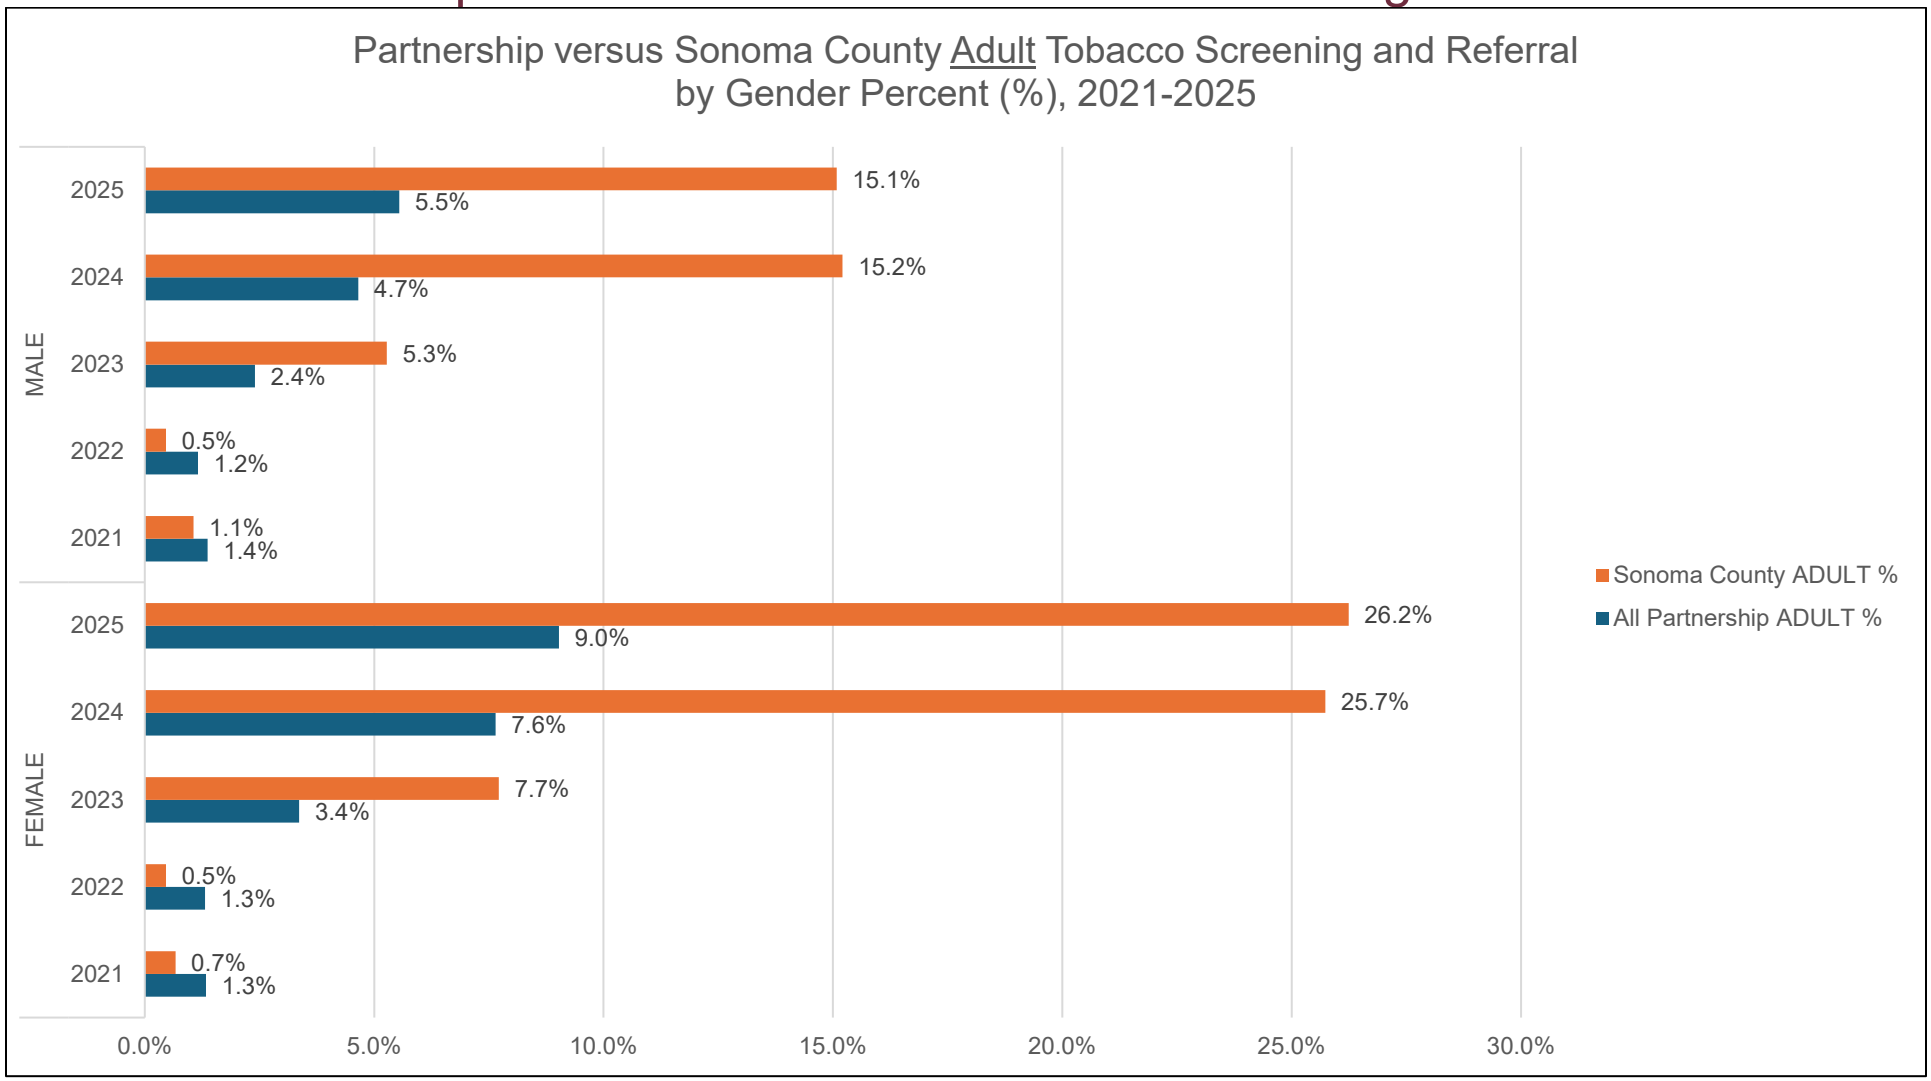
Partnership and Sonoma Adult Tobacco Screening and Referral



Highlights of Partnership and Sonoma Adult Tobacco Screening and Referral

The graph presents Sonoma County Adult tobacco screening and referral compared to all of Partnership. For both Partnership and Sonoma, female screening rate is higher than male screening rate and Sonoma screening rate is higher than all of Partnership.

Note:

- Tobacco screenings before 2023 were low before a concerted effort to have PCPs report tobacco screening was instituted, with a pay for performance incentive.
- In 2024, Partnership expanded from 14 to 24 counties, adding Butte, Colusa, Glenn, Nevada, Placer, Plumas, Sierra, Sutter, Tehama, and Yuba. Data from the 10 expansion counties became available to Partnership in 2024-2025, so these years may appear larger than other years monitored.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
- Member Count: Unique Partnership member count utilizing services rendered by Tobacco use diagnosis paid claim
    - Current Procedural Terminology (CPT) codes considered include
        - 99406, 99407 -– Tobacco Cessation Counselling visit,
        - 4004F – Tobacco Cessation Intervention Counselling,
        - 1036F – Current Tobacco non-user.
- % Gender is the number of enrolled members in the individual gender (i.e., male or female), in the location category (i.e., Sonoma County, or All Partnership) at the particular point-in-time in question, (i.e., December 31, 2025) divided by the total number of members in all gender (i.e., male and female) in that particular location currently enrolled, multiplied by 100 (%)
    - Tobacco Screening and Referral Members are divided into two categories:
        - Adult (over 21 years of age)
        - Child (ages less than 21 years).
    - Inclusion/Exclusion Criteria:
        - Included only members who are assigned or capitated to a PCP site.

- Excluded members who are partial/full duals, wellness and recovery only members, newborns, Kaiser members, deceased members.

Highlights of Partnership and Sonoma Adult Tobacco Screening and Referral by Race

The graph presents Sonoma County Adult tobacco screening and referral compared to all of Partnership by race. For both Partnership and Sonoma, Other and Unknown race have the highest screening and referral combined rate.

Note:

- Tobacco screenings before 2023 were low before a concerted effort to have PCPs report tobacco screening was instituted, with a pay for performance incentive.
- In 2024, Partnership expanded from 14 to 24 counties, adding Butte, Colusa, Glenn, Nevada, Placer, Plumas, Sierra, Sutter, Tehama, and Yuba. Data from the 10 expansion counties became available to Partnership in 2024-2025, so these years may appear larger than other years monitored.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties. Race/Ethnicity is voluntarily completed during enrollment by the state of California DHCS and Partnership's 24 individual counties and determined by California DHCS.
- Member Count: Unique Partnership member count utilizing services rendered by Tobacco use diagnosis paid claim
    - Current Procedural Terminology (CPT) codes considered include
        - 99406, 99407 -– Tobacco Cessation Counselling visit,
        - 4004F – Tobacco Cessation Intervention Counselling,
        - 1036F – Current Tobacco non-user.
- % Race/Ethnicity is the number of enrolled members in the individual race/ethnicity group (i.e., White, Hispanic, Unknown, Other, Black, Asian, Native American, Asian Indian and Native Hawaiian or Other Pacific Islander), in the location category (i.e., Sonoma County, or All Partnership) at the particular point-in-time in question, (i.e., December 31, 2025) divided by the total number of members in all race/ethnicity groups in that particular location currently enrolled, multiplied by 100 (%)
- Tobacco Screening and Referral Members are divided into two categories:
    - Adult (over 21 years of age)
    - Child (ages less than 21 years).
- Inclusion/Exclusion Criteria:
    - Included only members who are assigned or capitated to a PCP site.
    - Excluded members who are partial/full duals, wellness and recovery only members, newborns, Kaiser members, deceased members.

Highlights of Tobacco Screening and Referral by County

The graph presents Sonoma County tobacco screening and referral compared to all of Partnership by county. Sonoma County has the highest screening and referral rate 21% for adults as of 2025.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
- Member Count: Unique Partnership member count utilizing services rendered by Tobacco use diagnosis paid claim
    - Current Procedural Terminology (CPT) codes considered include
        - 99406, 99407 –– Tobacco Cessation Counselling visit,

    - 4004F – Tobacco Cessation Intervention Counselling,
    - 1036F – Current Tobacco non-user.
- Tobacco Screening and Referral Members are divided into two categories:
    - Adult (over 21 years of age)
    - Child (ages less than 21 years).
- Inclusion/Exclusion Criteria:
    - Included only members who are assigned or capitated to a PCP site.
    - Excluded members who are partial/full duals, wellness and recovery only members, newborns, Kaiser members, deceased members.
- Calculations:
    - Tobacco screening and referral to treatment Percentage (%) by:
    - Count of distinct members (i.e., by adult or child category) who received at least one tobacco screening and referral (numerator) divided by the count of distinct eligible members in the calendar year (denominator) (i.e., by adult or child category) X 100 (%).

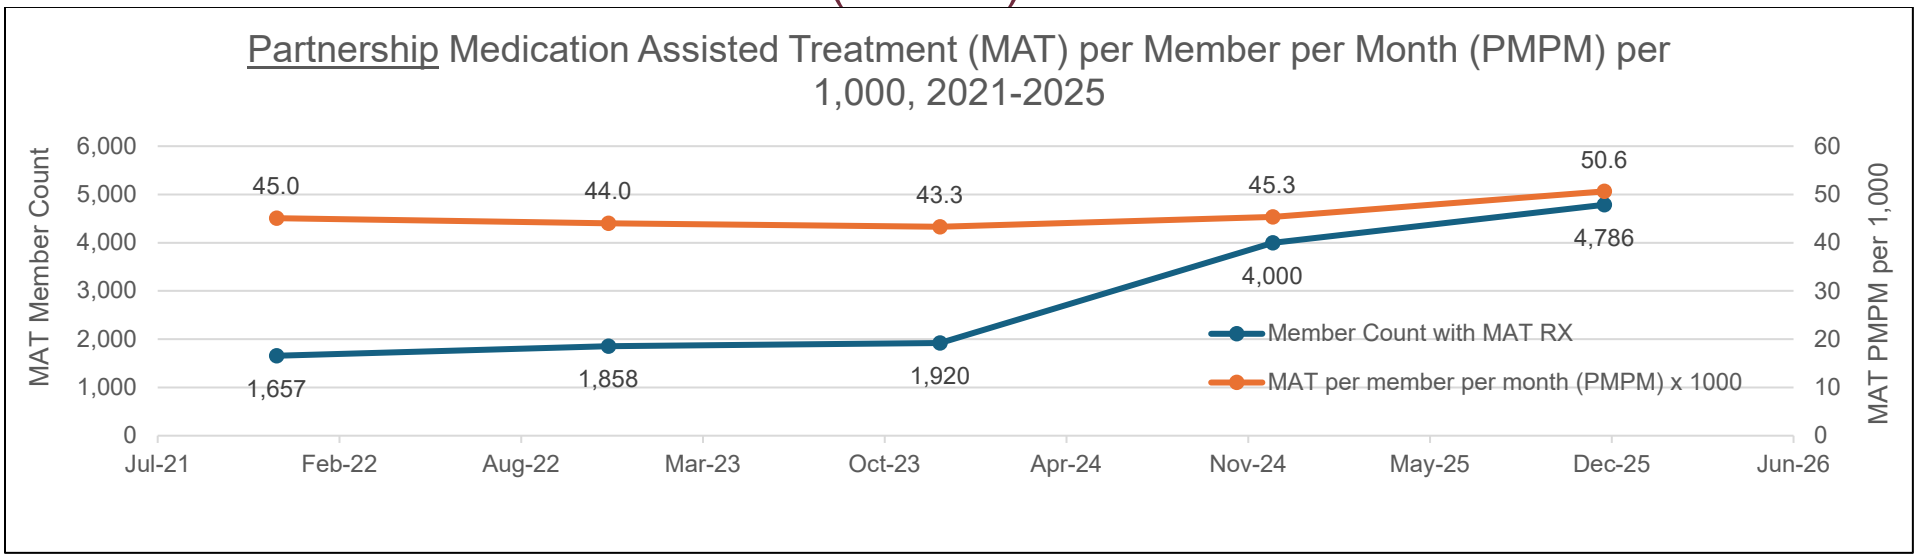
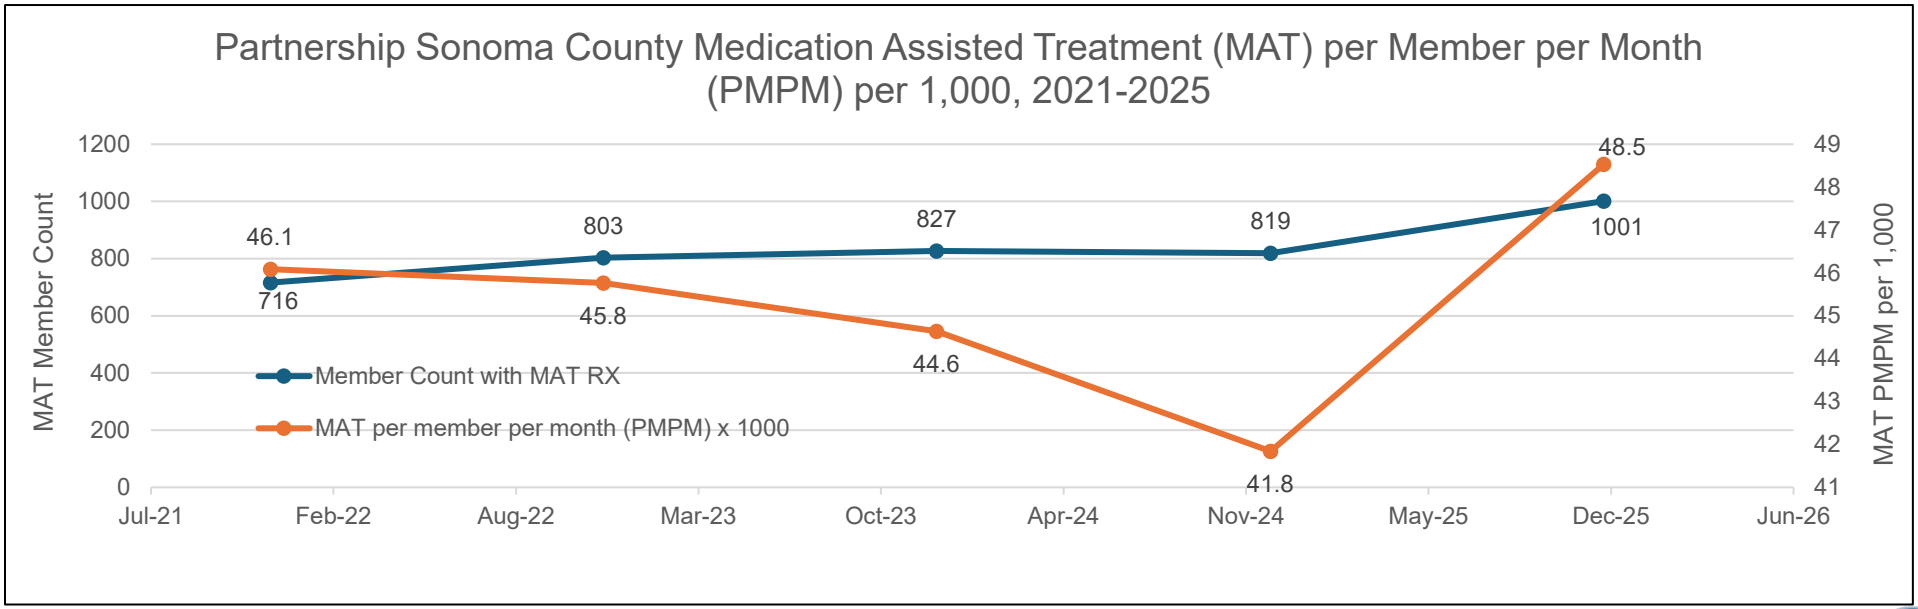
Partnership & Sonoma Medication Assisted Treatment (MAT) Per Member Per Month (PMPM) Per 1000





Highlights of Partnership & Sonoma Medication Assisted Treatment (MAT) Per Member Per Month (PMPM) Per 1000

Medicated Assisted Treatment (MAT) among Partnership members has been relatively stable over the last five years, only increasing in 2024-2025 due to the increase in Partnership members from ten new Partnership Counties. Sonoma County MAT has also remained constant over the past five years, with a range from 45 to 49 MAT per member per month (PMPM) per 1,000 Sonoma County Partnership members from 2021 to 2025, except for 2024 when the numbers decreased to 42 MAT PMPM per 1,000.

Note: In 2024, Partnership expanded from 14 to 24 counties, adding Butte, Colusa, Glenn, Nevada, Placer, Plumas, Sierra, Sutter, Tehama, and Yuba. Data from the 10 expansion counties became available to Partnership in 2024-2025, explaining the increase in MAT count during this period.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- MAT services are licensed alcoholism and drug abuse recovery or treatment facilities and certified programs ensuring members have access to medications for the treatment of substance use disorders.
- Member Count: Unique Partnership member count utilizing Pharmacy Medication (Rx) services.
- For Partnership healthcare service Utilization, places of service are defined by the CMS Place of Service Code Set.
- Calculations:
    - MAT PMPM*1,000**:** Rate calculated from the number of members utilizing MAT per Member per Month (member months) per 1,000 Partnership members. MAT PMPY*1,000: [sum(MAT) / sum(member X12 months)] per 1,000 Partnership members.
    - This is calculated so Partnership members with any type of visit or diagnosis, in any service location and any county, rates can be compared in the same way per 1,000 Partnership members per member per month.
    - MAT PMPM*1,000: [sum(MAT) / sum(member months)] per 1,000 Partnership members.

Emergency Department (ED) Visits PMPY *1000: The number of Emergency Department visits per Member per Year per 1000 Members
SUM(ED Visits)/SUM(Member Months)*12 per 1000

Highlights of Emergency Department Visits

The Emergency Department (ED) Visit rate per Partnership member per year in Sonoma County is average compared to other counties. The rate per 1,000 members per year went from 444 to 572 from 2023 to 2025 and is about 0.4 to 0.6 visits per member per year (1 member: 0.4-0.6 visit) or about 1 visit per 2 members per year. Hence, on estimate, every other Partnership member may end up going to the emergency room once a year in Sonoma County. Compared to the Partnership target of 2.2 visits for primary care provider visits per year to establish a Medical Home, Sonoma County ED visits are high.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
    - Member Count: Unique count of Partnership members utilizing services
    - Utilizing Members: Unique Members who have an ED visit claim in the Partnership medical claims dataset.
    - For Partnership healthcare service Utilization, places of service are defined by the CMS Place of Service Code Set.
    - Note: These include only Fee for Service and Capitated Members.
- Calculations:
    - Visit PMPY*1,000: Rate calculated from the number of Visit Claims per Member per Year (12 months) per 1,000 Partnership Members.
        - Numerator: Number of Visit Claims in that particular location at the particular point-in-time.
        - Denominator: Total number of Visit Claims by Member Month in that particular location at the particular point-in-time.
        - Rate: per Member per Year (12 months) per 1,000 Partnership Members.
    - For Partnership members with any type of visit or diagnosis, in any service location and any county, rates can be compared in the same way per 1,000 Partnership members per member per year.

Highlights of Homeless Emergency Department Visits

Out of all ED visits, 8-15% of ED visits are by Homeless members in Sonoma County, a rate per 1,000 homeless members of 127 to 262 from 2023 to 2025 per member per year.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
    - Homeless: Unique members who have an ED visit claim in the Partnership medical claims dataset, with physical address containing keywords indicating homelessness and claims data with diagnosis codes containing the following keywords: homeless, housing instability, inadequate housing, problems related to housing or living in residential institution.
    - Member Count: Unique count of Partnership members utilizing services.
    - Utilizing Members: Unique Members who have an ED visit claim in the Partnership medical claims dataset.

- For Partnership healthcare service Utilization, places of service are defined by the CMS Place of Service Code Set.
- Note: These include only Fee for Service and Capitated Members.

- Calculations:
  - Percent (%) Homeless**:** Unique Homeless Members who have an ED visit claim in the Partnership medical claims dataset, in that particular location, at the particular point-in-time divided by the Total Number of ED Visits in that particular location, at the particular point-in-time X100 (%). Visit Rate: Total number of ED visits by Homeless member / Total Utilizing Members X100 (%).
  - Visit PMPY*1,000: Rate calculated from the number of Homeless Visit Claims per Member per Year (12 months) per 1,000 Partnership Members.
    - Numerator: Number of Homeless Visit Claims in that particular location, at the particular point-in-time.
    - Denominator: Total number of Visit Claims by Member Month in that particular location, at the particular point-in-time.
    - Rate: per Member per Year (12 months) per 1,000 Partnership Members.
  - For Partnership members with any type of visit or diagnosis, in any service location and any county, rates can be compared in the same way per 1,000 Partnership members per member per year.

Highlights of Mental Health: Medical Claims

Mental Health Services utilization for Sonoma shows similar rates compared to the Santa Rosa Region and all of Partnership, except for County Mental Health services at 1.6%, compared to all of Partnership at 2.9%. Sonoma had medical claim rates ranging from 225.5 to 227.9 from 2023 to 2025 per member per year per 1,000 Sonoma Partnership members.

Mental Health Service Provider claims sources include:

- Medical claims
- Carelon Healthcare Services claims
- County Mental Health data
- Pharmacy (Rx) claims

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
    - Member Count: Unique count of Partnership members utilizing services Each Mental health service provider source is assessed for the following indicators:
        - Claims Count: Distinct visit to mental health provider, a distinct combination of member, service date, and provider.
        - Utilizing Members: Unique Members who utilize services provided by Medical (i.e., Primary Care Providers).
- Calculations:
    - Utilizing Member Visit PMPY*1,000: is the rate calculated from the number of Utilizing Member per Member per Year (12 months) per 1,000 Partnership Members. Utilizing Member PMPY*1,000: [sum(Utilizing Member) / sum(member months)] * 12 per 1,000 Partnership members.
        - Numerator: Number of Utilizing Member Claims in that particular location, at the particular point-in-time.
        - Denominator: Total number of Utilizing Member Claims by Member Month in that particular location, at the particular point-in-time.
        - Rate: per Member per Year (12 months) per 1,000 Partnership Members.

Data Source: Partnership Health Analytics Team linked and merged the following datasets by identifiers

- DHCS Enrollment dataset for Partnership Members and DHCS Medical Claims data

- Carelon Healthcare Services claims
- County Mental Health data
- Pharmacy (Rx) claims; Note: From 2022, all pharmacy data (Carved In/Out) comes from Magellan datasets called Carved Out (excluding Carved In data).

Highlights of Mental Health: County Mental Health Claims

For County Mental Health, Sonoma has a lower rate compared to other counties at 16 to 22.5 utilizing members per member year per 1,000 members compared to Modoc County with a rate range from 84 to 99 utilizing member per member year per 1,000 members, 2023-2025.

Mental Health Service Provider claims sources include:

- Medical claims
- Carelon Healthcare Services claims
- County Mental Health data
- Pharmacy (Rx) claims

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
    - Member Count: Unique count of Partnership members utilizing services Each Mental health service provider source is assessed for the following indicators:
        - Claims Count: Distinct visit to mental health provider, a distinct combination of member, service date, and provider.
        - Utilizing Members: Unique Members who utilize services provided by the County Mental Health Service.
- Calculations:
    - Utilizing Member Visit PMPY*1,000: is the rate calculated from the number of Utilizing Member per Member per Year (12 months) per 1,000 Partnership Members. Utilizing Member PMPY*1,000: [sum(Utilizing Member) / sum(member months)] * 12 per 1,000 Partnership members.
        - Numerator: Number of Utilizing Member Claims in that particular location, at the particular point-in-time.
        - Denominator: Total number of Utilizing Member Claims by Member Month in that particular location, at the particular point-in-time.
        - Rate: per Member per Year (12 months) per 1,000 Partnership Members.

Data Source: Partnership Health Analytics Team linked and merged the following datasets by identifiers

- DHCS Enrollment dataset for Partnership Members and DHCS Medical Claims data
- Carelon Healthcare Services claims
- County Mental Health data
- Pharmacy (Rx) claims; Note: From 2022, all pharmacy data (Carved In/Out) comes from Magellan datasets called Carved Out (excluding Carved In data).

Utilization: Services Provided

Behavioral Health: Carelon Healthcare Services

Highlights of Behavioral Health: Carelon Healthcare Services

Partnership contracts with Carelon Behavioral Health to offer mild to moderate Behavioral Health services and monitor them through Carelon claims. Members utilizing Carelon have been divided into age groups for less than 18 years, 18-21 years and over 21 years. Colusa distinct Carelon Behavioral Health utilizing members and distinct visits by age group show similar patterns to Partnership members as a whole.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
    - Member Count: Unique count of Partnership members utilizing services. Each Behavioral Health Services provider (Carelon) source is assessed for the following indicators:
        - Claims Count: Distinct visit counts to Behavioral Health Service providers, defined as a distinct combination of member, service date, and provider.
        - Utilizing Members: Unique Members who utilize behavioral health services provided by Carelon
- Calculations:
    - Penetration Rate (%): DHCS treats penetration rate as the percentage of Medi-Cal Members utilizing Health services divided by the number of Medi-Cal eligible members for that county X100.
    - Partnership defines the measure as a rolling sum of unique members in the first month of measurement period plus unique new members in each of the following months: The sum of (new members receiving service over the span of 12 months)/(member months) X 100.

Data Source: Partnership Health Analytics Team linked and merged the following datasets by identifiers

Highlights of Acute Inpatient Utilization

Hospital Admissions for Acute Inpatient Utilization in Sonoma County increased from an average rate of 70 to 76.5 from 2023 to 2025 per member per month per 1,000 members. Average length of hospital stay (LOS) among Partnership members is about 7 days. Sonoma County had a 6 to 7 day average from 2023 to 2025.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
    - Member Count: Unique count of Partnership members utilizing services. Each Acute Inpatient Service provider source is assessed for the following service indicators:
        - Claims Count: Distinct visit counts to Acute Inpatient Service providers, defined as a distinct combination of member, service date, and provider.
        - Utilizing Members: Unique Members who utilize Acute Inpatient Services
- Calculations:
    - Acute Inpatient Utilization or Admissions: Acute inpatient episodes include both acute and administrative days (prescheduled admissions), measures reported as inpatient over last two years. Transfers to a different facility during an episode are counted as two episodes. Episodes remain active until a discharge date is received from any one of the data sources with evidence of the member receiving non-inpatient care after admission.
        - Episodes are excluded if:
        - The Length of Stay (LOS) is over 180 days.
        - Multiple active episodes for a member occur at the same time – only one episode is kept.
        - There are overlapping admission or discharge dates with other episodes of the same source or across data sources – only one episode is kept.
    - Note:
        - Data Sources are combined: Claims data. All have some gaps, but when combined we estimate accuracy to be 99%.
        - The majority of Medicare Part A and Kaiser members are counted under Kaiser.

- Length of Stay (LOS): Also known as Hospital Length of Stay, LOS is the number of days between admission and discharge dates for completed episodes and between admission and the last ran date for ongoing episodes. These include admin days (scheduled admissions) and will be counted as a 1-day stay if less than 24 hours.

- Admits PMPM*1,000: The rate calculated from the number of utilizing Members Admitted per Member per Month (member months) per 1,000 Partnership Members. Admits PMPM*1,000: [sum(Admits) / sum(member months)] per 1,000 Partnership members.
    - Numerator: Number of utilizing members Admission Claims in that particular location, at the particular point-in-time
    - Denominator: Total number of utilizing members Admission Claims by Member Month in that particular location at the particular point-in-time
    - Rate: per 1,000 Partnership Members.
    - This is calculated so that for every 1,000 Partnership members with any type of visit or diagnosis, in any service location and any county, rates can be compared in the same way per 1,000 Partnership members per member per month.

Data Source: Partnership Health Analytics Team linked and merged the following datasets by identifiers

Highlights of PCP Office Visits

Partnership's target primary care provider (PCP) office visit utilization is 2.2 per member per year. That is 2,200 per member per year per 1,000 Partnership members. Sonoma is also average going from 2,451.7 to 2,812.9 from 2023 to 2025 per member per year per 1,000 members. Sonoma members have a 2.5 to 3.0 average office visit utilization per member per year, above the Partnership target of 2.2, which works towards a PCP Medical Home, an approach to providing coordinated comprehensive primary care to individual members as a form of patient-centered care (i.e., Resource: American Academy of Pediatrics/Medical Home).

Note: None of the utilization rates or numbers are mutually exclusive, as one Sonoma County Partnership member may have several acute and chronic diseases at the same time. That could require multiple visits to primary care, acute inpatient admissions, ED, and mental health in one month and through the calendar year (PMPY -per Member per Year). These visits will be counted as one utilizing member per facility utilized.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
    - Member Count: Unique count of Partnership members utilizing services. Each PCP source is assessed for the following service indicators:
        - Claims Count: Distinct visit counts to PCP, defined as a distinct combination of member, service date, and provider.
        - Utilizing Members: Unique Members who utilize PCP
- Calculations:
    - PCP Office Visits are defined by applying the following criteria to Partnership medical claims data:
        - Place of service (Location Code defined by the CMS Place of Service Code Set) is an Office code
        - Current Procedure Terminology (CPT) Code maintained by the American Medical Association/American Academy of Professional Coders includes Office Visit (i.e., 992, 993, 994, or CH01)
        - Treatment Type AA or AB (Office Visits)

- PCP Office Visit PMPY*1,000: is the rate calculated from the number of Visit Claims per Member per Year (12 months) per 1,000 Partnership Members. PCP Office Visit PMPY*1,000: [sum(office visits) / sum(member months)] * 12 per 1,000 Partnership members.
  - Numerator: Number of Visit Claims in that particular location, at the particular point-in-time
  - Denominator: Total number of Visit Claims by Member Month in that particular location, at the particular point-in-time
  - Rate: per Year (12 months) per 1,000 Partnership Members.
  - This is calculated so for every 1,000 Partnership members with any type of visit or diagnosis, in any service location and any county, rates can be compared in the same way per 1,000 Partnership members per member per year.

Data Source: Partnership Health Analytics Team linked and merged the following datasets by identifiers

- DHCS Enrollment dataset for Partnership Members
- DHCS Medical Claims data

Note: Medicare Part A and Kaiser members are excluded.

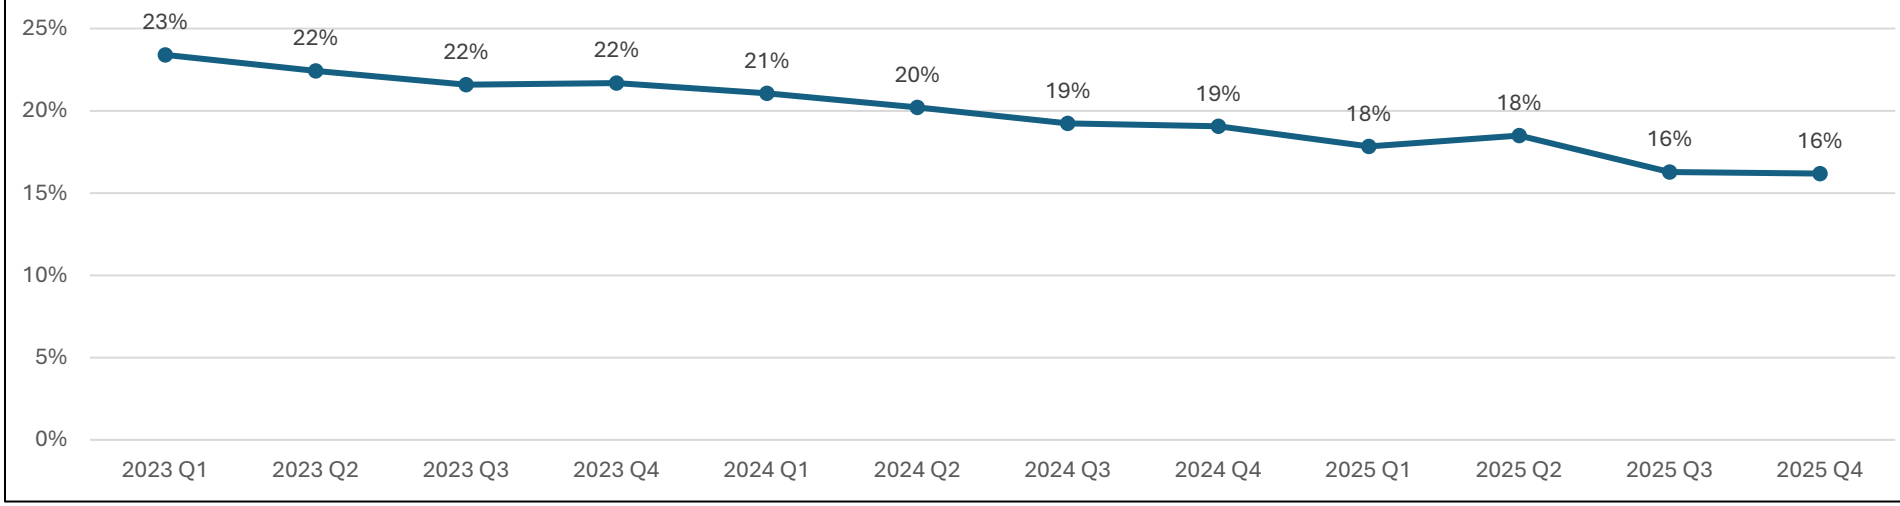
Telehealth Visit PMPY*1000: Count of Telehealth Primary Care Provider (PCP) Visit Per Member per Year (PMPY) per 1000
[sum(Telehealth visits) / sum(member months)] *12 per 1000

Partnership Sonoma County Member Telehealth as a Percent (%) of Primary Care Provider (PCP) Visits in Quarters/Years, 2023-2025



Highlights of Telehealth PCP Visits & Diagnoses

Sonoma telehealth utilization as a percentage of primary care provider visits has been reducing over the years (2023-2025) from 21.4% in 2024 to 17.2% in 2025. From 2023-2025 by quarter (i.e., Q1, Q2, Q3, Q4), decreasing from 23% in Q1 2024 to 16% in Q4 2025. Partnership counties where 1 of every 5 (1 out of 5) PCP visits are reported as a telehealth visit include Sonoma, Marin, and Solano counties.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Enrollment: Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties.
    - Member Count: Unique count of Partnership members utilizing services. Each Telehealth Visit source is assessed for the following service indicators:
        - Claims Count: Distinct visit counts to Telehealth Visits, defined as a distinct combination of member, service date, and provider.
        - Utilizing Members: Unique Members who utilize Telehealth Visits
    - Telehealth Visits are defined by:
        - Location Code 02, 10 as defined by the CMS Place of Service Code Set.
        - CMS Telemedicine and Remote Monitoring
            - Modifier Code 1: 'GQ', 'GT', '95', '93'
            - Procedure Code 1: '99451', 'G0071', 'G2012', '92250', '92227', '99444'
    - Percentage (%) of Telehealth Visits: Number of Telehealth Visits/Total Number of PCP Visits X 100 (%)
    - Telehealth Visit PMPY*1,000: is the rate calculated from the number of Telehealth Visit Claims per Member per Year (12 months) per 1,000 Partnership Members. Telehealth Visit PMPY*1,000: [sum(Telehealth visits) / sum(member months)] * 12 per 1,000 Partnership members.
        - Numerator: Number of Visit Claims in that particular location, at the particular point-in-time in question.
        - Denominator: Total number of Visit Claims by Member Month in that particular location, at the particular point-in-time.
        - Rate: per Year (12 months) per 1,000 Partnership Members.

- This is calculated so for Partnership members with any type of visit or diagnosis, in any service location and any county, rates can be compared in the same way per 1,000 Partnership members per member per year.

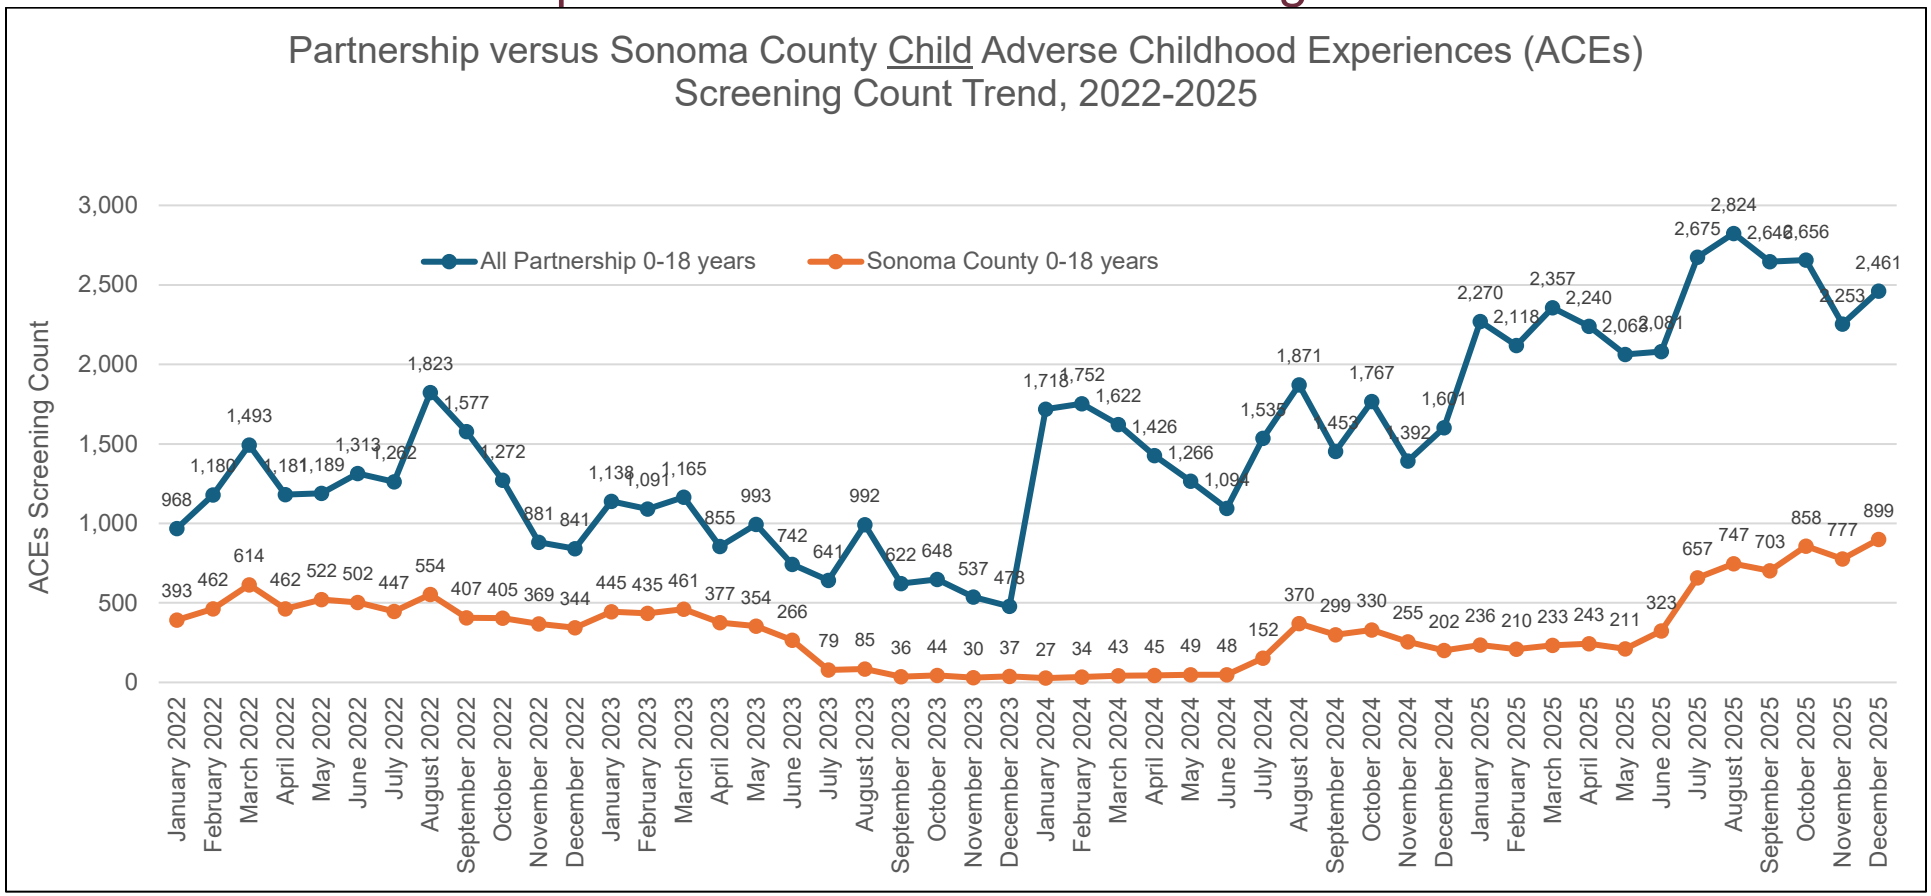
ACEs Screenings

For more information, see ACEs Screenings in the Appendix

ACEs Screenings

Partnership and Sonoma ACEs Screening Count Trend



Highlights of Partnership and Sonoma ACEs Screening Count Trend

The Adverse Childhood Experiences (ACEs) screening tool is used to assess the likelihood of having increased risk of an adverse response to toxic stress, due to trauma experienced in the past from birth to 18 years old, such as abuse, neglect, or household dysfunction. Toxic stress can affect both physical and mental health, and manifest in violence, drug abuse, self-harm, and other issues.

Children under the age of 20 are usually assessed in various ways, and different methods, an attempt to reduce the risk of toxic stress by intervention, preventing adverse physical and mental health outcomes. Adults ages 20-64 are assessed less frequently to determine past exposures and tailor appropriate intervention.

Data is collected from Medical Claims using Healthcare Common Procedure Coding System (HCPCS) codes:

- G9919 – Positive or High Risk (ACEs Screening Score 4 or greater)
- G9920 – Negative or Low Risk (ACEs Screening Score 0-3)

Note: In 2024, Partnership expanded from 14 to 24 counties, adding Butte, Colusa, Glenn, Nevada, Placer, Plumas, Sierra, Sutter, Tehama, and Yuba. Data from the 10 expansion counties became available to Partnership in 2024-2025, explaining the increase in Partnership ACEs Screening during this period.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Data originally tracked as a result of California Prop 56 which enhanced payments for ACEs to in-network providers
- Number of ACEs Screenings (Count)
    - For the purpose of this report, children are categorized as ages 0-18, while adults are categorized as age 19+. Both children and adults are allowed one billable ACEs assessment per year by Managed Health Plan providers.

Data Source:

Medical Claims (Amisys) and Membership Eligibility data used for ACEs Screenings exclude:

- All Kaiser (in 2024, Kaiser became its own health plan), Medi-Medi, deceased, newborns, and Wellness & Recovery members.

- All Carelon Healthcare Services ACEs Screenings are excluded from the data.
- Membership data as of last record of eligibility on file in each year (i.e., December of each year).

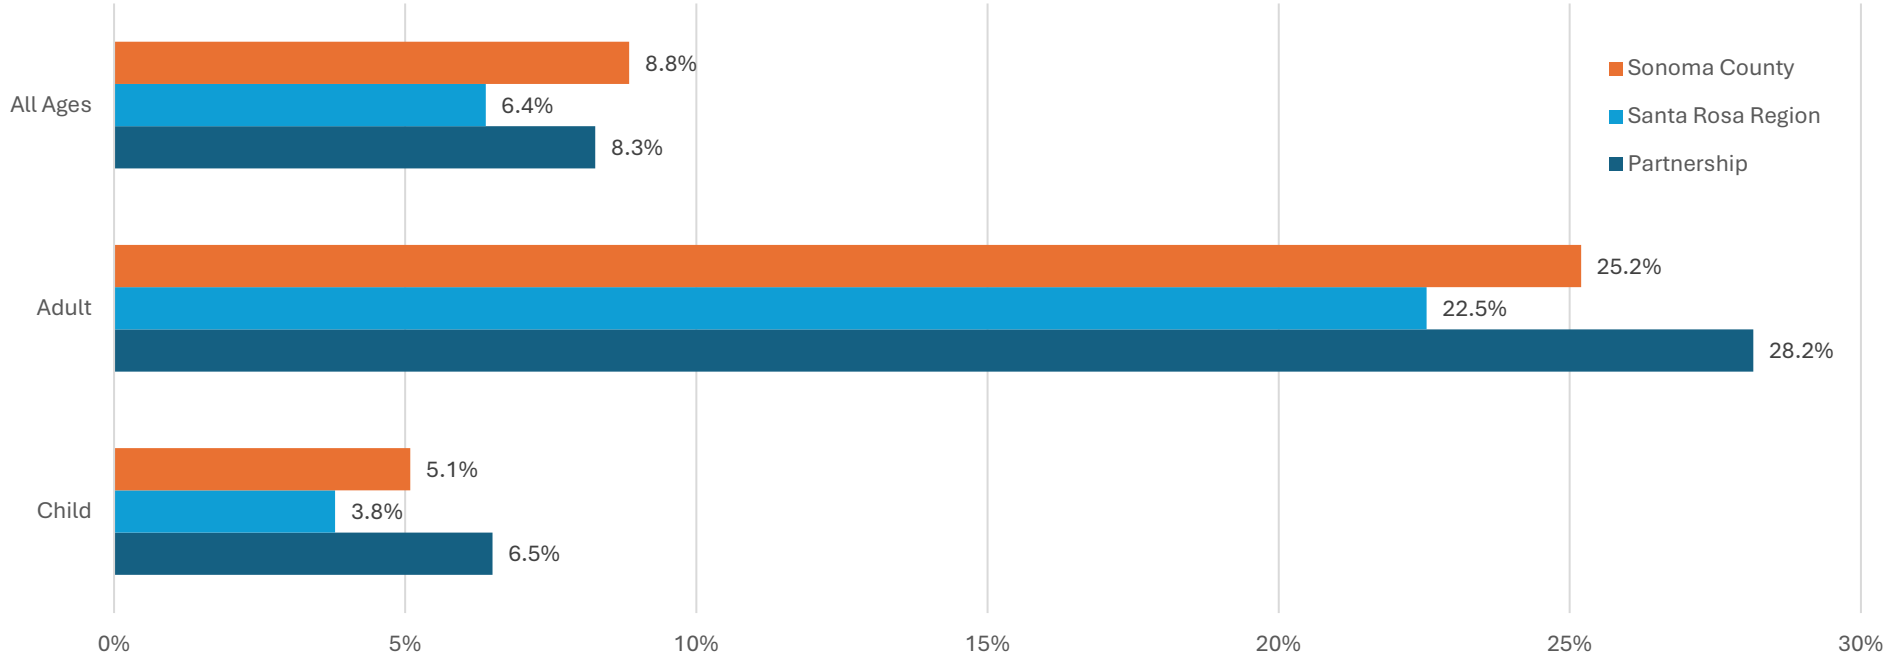
Screenings Percent (%) with High Risk Result by Age, 2025



G9919 Result: Indicates patient scored 4 or greater on the screening survey and is at high risk of adverse response to toxic stress, due to trauma experienced in the past from birth to 18 years

Highlights of ACEs Screenings by County

The Adverse Childhood Experiences (ACEs) screening tool is used to assess the likelihood of having increased risk of an adverse response to toxic stress, due to trauma experienced in the past from birth to 18 years old, such as abuse, neglect, or household dysfunction. Toxic stress can affect both physical and mental health, and manifest in violence, drug abuse, self-harm, and other issues.

Children under the age of 20 are usually assessed in various ways, and different methods, an attempt to reduce the risk of toxic stress by intervention, preventing adverse physical and mental health outcomes. Adults ages 20-64 are assessed less frequently to determine past exposures and tailor appropriate intervention.

Data is collected from Medical Claims using Healthcare Common Procedure Coding System (HCPCS) codes:

- G9919 – Positive or High Risk (ACEs Screening Score 4 or greater)
- G9920 – Negative or Low Risk (ACEs Screening Score 0-3)

Data shows Sonoma child ACEs screening compared to all of Partnership and Santa Rosa Office Region by age group. Sonoma County screens more High Risk Results among Partnership child members (5.1%) and adult members (25.2%) than Santa Rosa Office 3.8% and 22.5% respectively.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Data originally tracked as a result of California Prop 56 which enhanced payments for ACEs to in-network providers
- Number of ACEs Screenings (Count)
    - For the purpose of this report, children are categorized as ages 0-18, while adults are categorized as age 19+. Both children and adults are allowed one billable ACEs assessment per year by Managed Health Plan providers.

Transportation Services
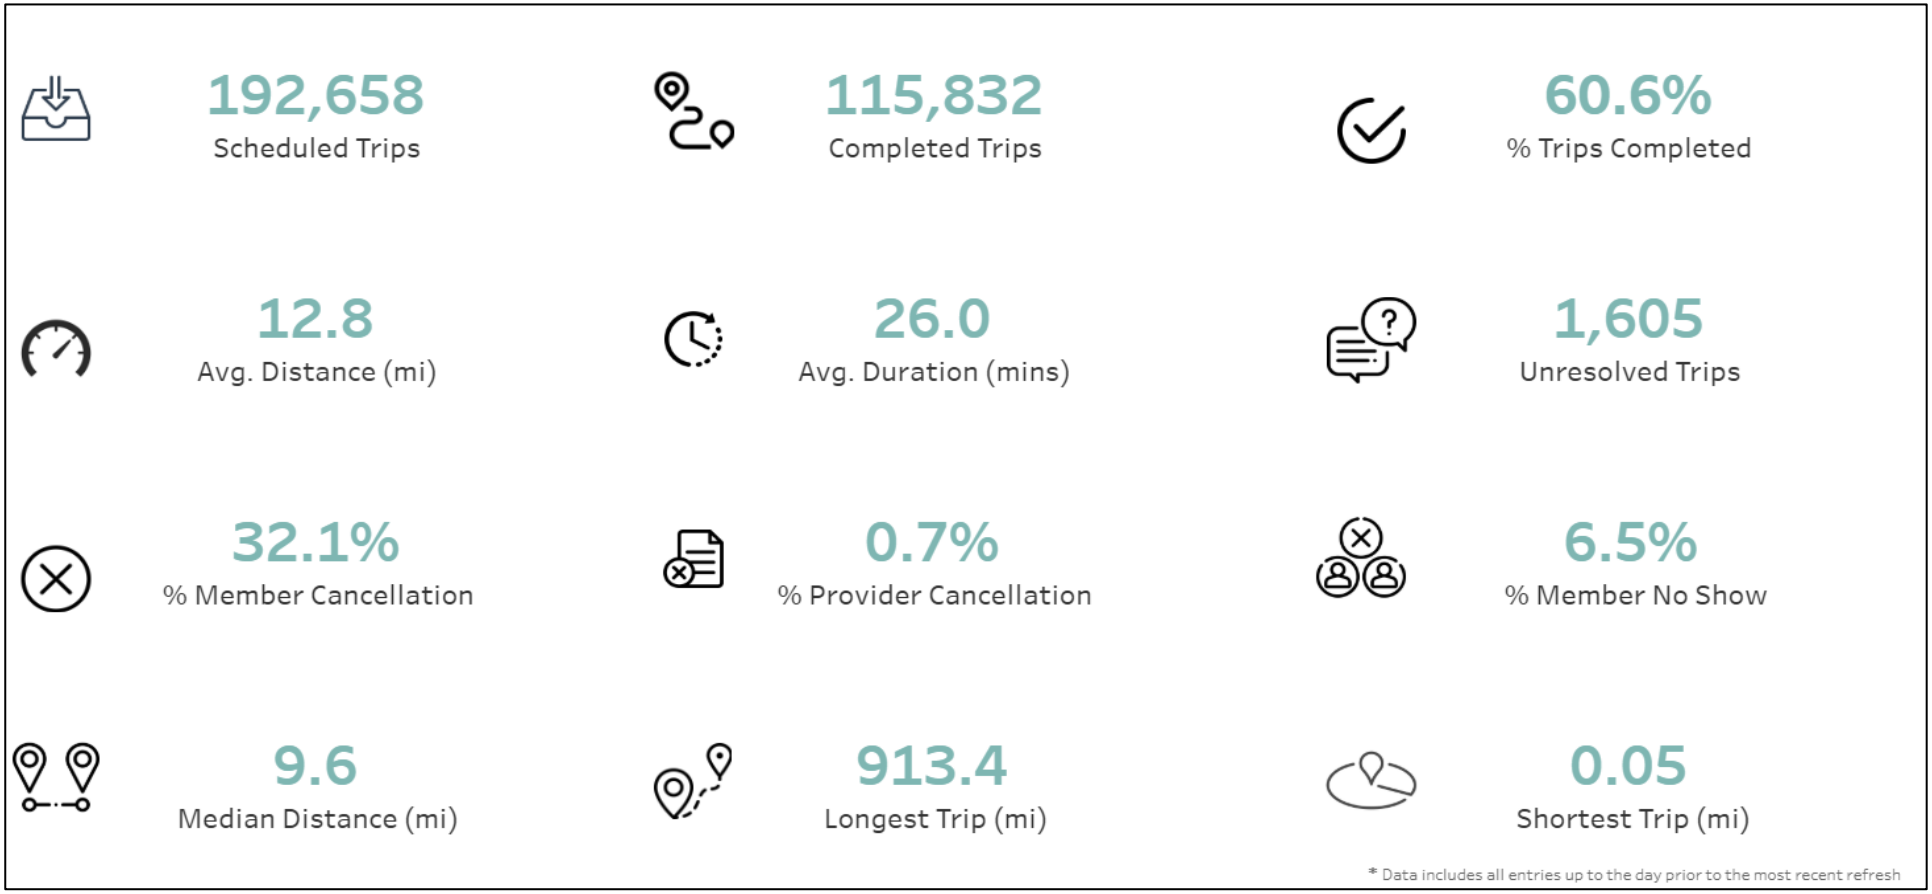
Sonoma Trips

Sonoma County Key Performance Indicator (KPI) for Non-Medical Transportation (NMT) and Non-Emergency Medical Transportation (NEMT) services, 2025



Highlights of Partnership, Santa Rosa Region, and Sonoma Trips

Access to healthcare is one of the main priorities of all Partnership counties. Most counties are rural and have tracking progress in transportation as one of the indicators for access to healthcare. Transportation is a Partnership intervention that is offered to members to increase access to care, early detection, timely and adequate treatment of disease. Sonoma has 12% of the Partnership member population, but only 8.8% of the total number of completed trips in Partnership for the year 2025. The longest trip completed in Sonoma in 2025 was 913.4 miles, while the longest trip in Partnership was 913.4 miles.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

- Transportation is divided into:
    - NMT: Non-Medical Transportation helps members who do not have any other way of getting to their appointments and back to their residence. NMT includes passenger cars, taxis, buses, trains, or other public transportation.
    - NEMT: Non-Emergency Medical Transportation helps members who need door-to-door service – help with getting in and out of the home, vehicle, and medical office. NEMT may include non-emergency ambulances, gurney vans, wheelchair vans, or medical air transport.
- Key Performance Indicators (KPI) follow standards set by Centers for Medicare and Medicaid Services (CMS) and DHCS for NMT and NEMT services booked and used by members, including:
    - Scheduled Trip: The total of all trips that were placed in the scheduling system
    - Completed Trip: Trip status of Completed, Assignment Exported
    - Non-Completed Trip: Trip status of Requester Cancelled/Patient Cancelled, No Show, Provider Cancellation/Denied
    - Resolved Trip: Trip status of Completed, Requester Cancelled, Patient Cancelled, No Show, Denied, Approval Denied, Assignment Exported
    - Unresolved Trip: Trip status of Approval Pending, Assignment Accepted, Assignment Dispatched, Assignment Pending, En Route, Expired, Ready to Assign
    - Member Cancellation: All Member Cancellation classifications are defined as user caused
    - Member No Show: All Member No Show classifications are defined as user caused
    - Provider Cancellation: All Provider Cancellation classifications are defined as provider caused

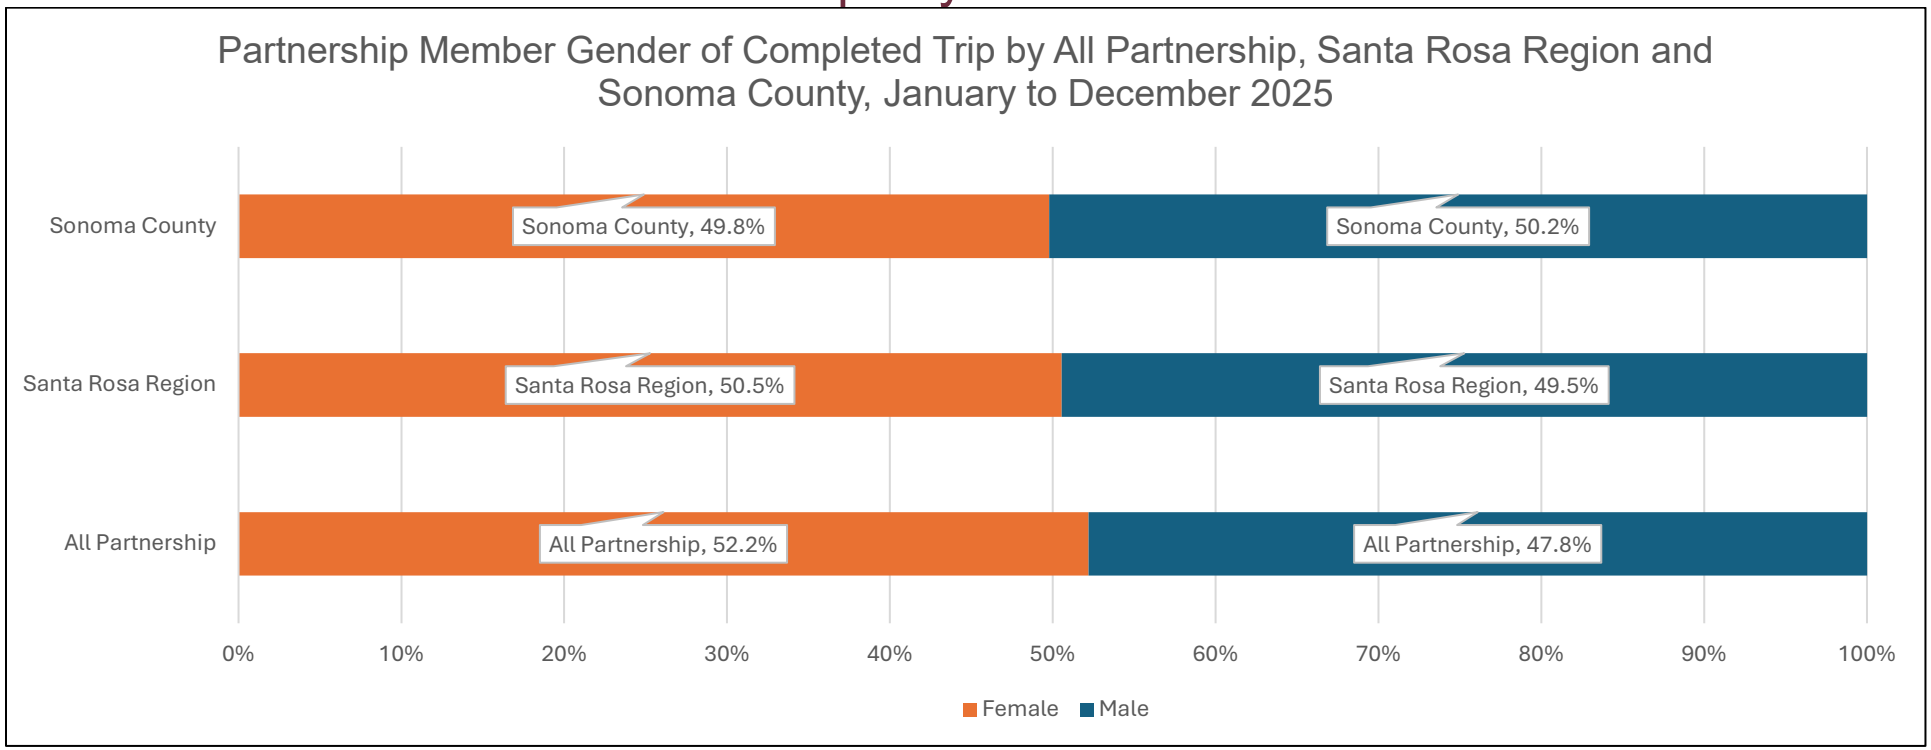
  - Date of Service is defined as the Scheduled Trip Pick Up Date
- Transportation Key Performance Indicators (KPI):
  - Number of Scheduled Trips
  - Average Distance Traveled (miles)
  - Average Duration of Trip (minutes)
  - Median Distance Traveled (miles)
  - Shortest Distance of Trip (miles)
  - Longest Distance of Trip (miles)
- Calculations:
  - Percent (%) Completed Trip: Number of Completed Trips divided by Total number of Trips X100 (%)
  - Percent (%) Member No Show: Number of No-Show Trips divided by Total number of Trips X100 (%)
  - Percent (%) Member Cancellation: Number of Cancelled Trips divided by Total number of Trips X100 (%)
  - Percent (%) Provider Cancellation: Number of Cancelled Trips by Transportation Provider divided by Total number of Trips X100 (%)
  - The following Measures are also tracked in percentage (%) and rate:
    - Percent (%) Utilizing Members:
      - Number of unique Partnership members who schedule and complete trips within a given period (e.g., calendar year 2025).
      - Unique Members Completing Trip divided by Total Partnership Population X100 (%)
    - Trip Rate PMPM per 1,000:
      - NMT/NEMT services are also tracked per member per month (PMPM) per 1,000 Partnership Member Month
      - Completed Trips per Month divided by Total Partnership Population per Month X 1,000 (per Partnership Member per Month).

Data Source: Partnership Health Analytics Team linked and merged the following datasets by identifiers

- DHCS Enrollment dataset for Partnership Members
- Transportation trip information is tracked by the Partnership Transportation Department. Member and Trip details including demographics and eligibility by month come from datasets received from Kinetic Transportation Data

Transportation Services

Trips by Gender



Highlights of Trips by Gender

Sonoma has similar gender distribution among those completing trips compared to Santa Rosa and all of Partnership as a whole. There is no difference between male and female estimates, with a range of 48% to 52%, in 2025.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition: Non-Medical Transportation and Non-Emergency Medical Transportation (NMT/NEMT) Service

Calculations:

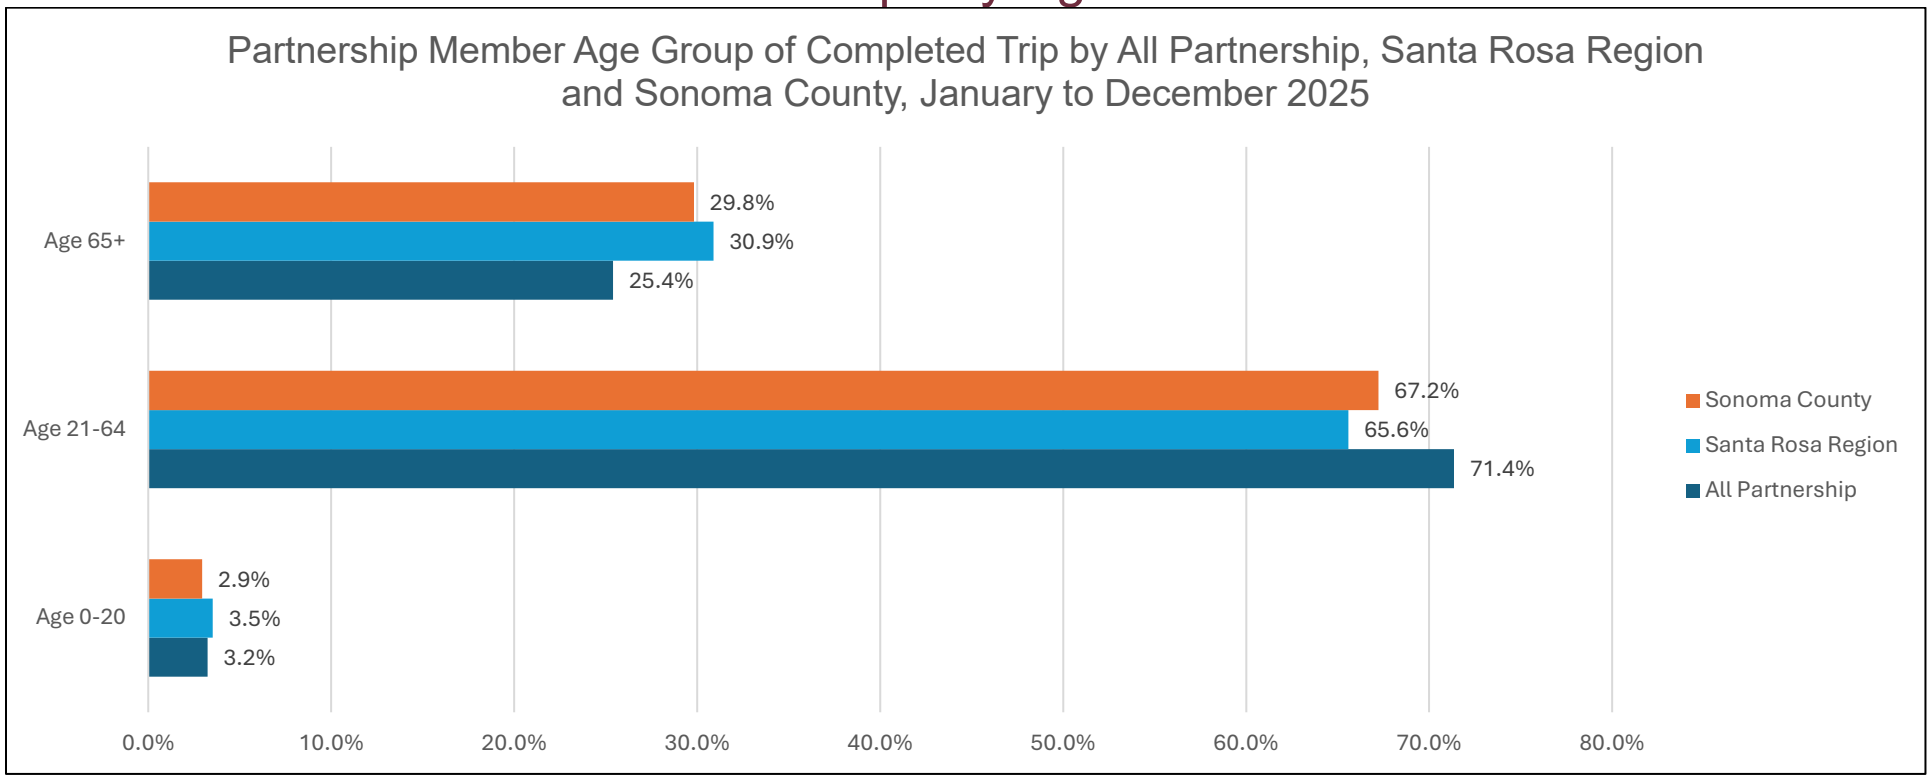
- % Gender is the number of enrolled members in the individual gender (i.e., male or female), in the location category (i.e., County, Region, or All Partnership) at the particular point-in-time in question, (i.e., December 31, 2025) divided by the total number of members in all gender (i.e., male and female) in that particular location currently enrolled, multiplied by 100 (%)

Data Source:

- DHCS Enrollment dataset for Partnership Members
- Transportation trip information is tracked by the Partnership Transportation Department. Member and Trip details including demographics and eligibility by month come from datasets received from Kinetic Transportation Data

Transportation Services

Trips by Age



Highlights of Trips by Age

Sonoma has similar age group distribution among ages 0-20 years completing trips compared to Santa Rosa and all of Partnership as a whole, at 2.9%, 3.5% and 3.2% respectively. Compared to Partnership at 71.4%, Sonoma has fewer 21–64-year-old members completing trips at 67.2%. Sonoma has more 65+ years at 29.8% than Partnership as a whole, at 25.4% completing trips, in 2025.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition: Non-Medical Transportation and Non-Emergency Medical Transportation (NMT/NEMT) Service

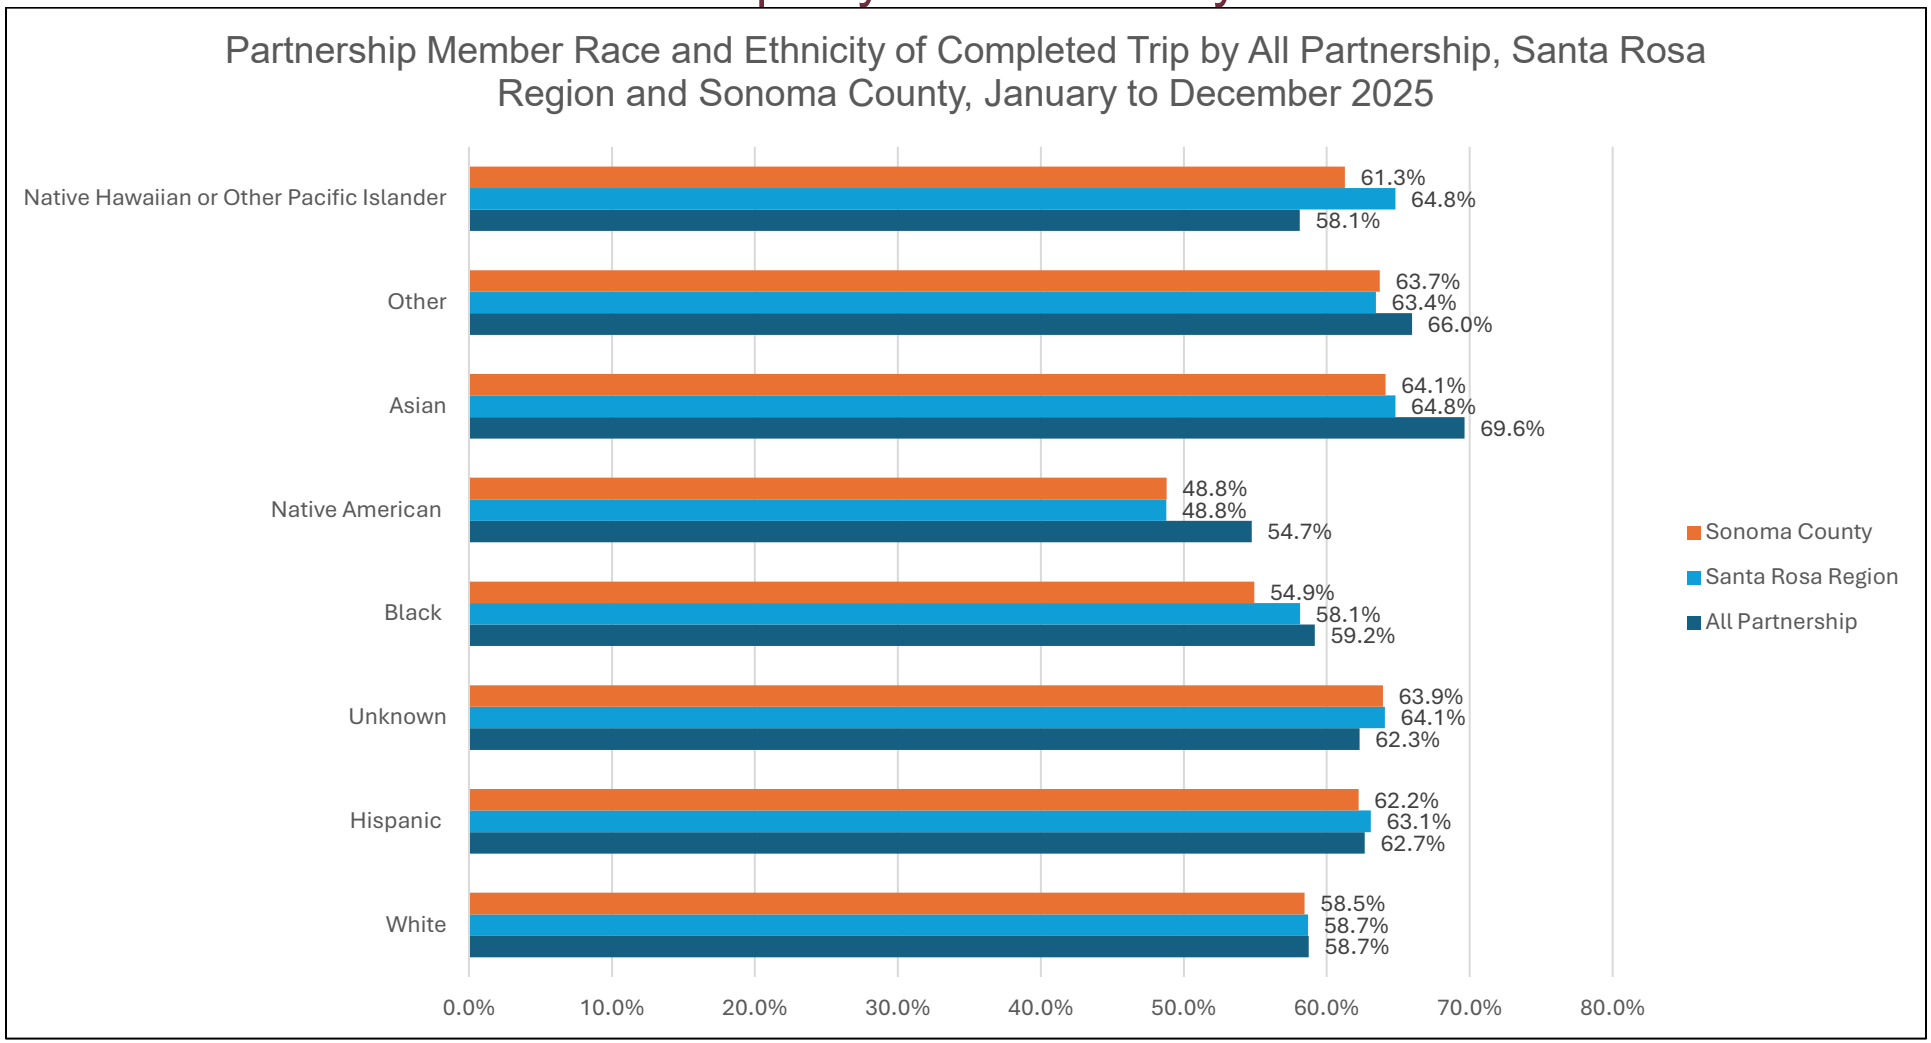
Calculations:

- % Age Group is the number of enrolled members in the individual age group (i.e., 0-20, 21-64 and 65 and above years), in the location category (i.e., County, Region, or All Partnership) at the particular point-in-time in question, (i.e., December 31, 2025) divided by the total number of members in all age-groups in that particular location currently enrolled, multiplied by 100 (%)

Data Source:

- DHCS Enrollment dataset for Partnership Members
- Transportation trip information is tracked by the Partnership Transportation Department. Member and Trip details including demographics and eligibility by month come from datasets received from Kinetic Transportation Data

Transportation Services
Trips by Race/Ethnicity



Highlights of Trips by Race/Ethnicity

Sonoma has the highest number of Hispanic race/ethnicity residents who are Partnership members. For Transportation, Sonoma has the highest percentage (%) of completed trips seen in Asian, Other and Unknown race members at an estimated rate of 64%. Black and Native American races have the lowest completed trips at 55% and 49% respectively, while Hispanic, White and Native Hawaiian or Other Pacific Islanders are in the mid rates at 62%, 59% and 61% respectively, in 2025.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

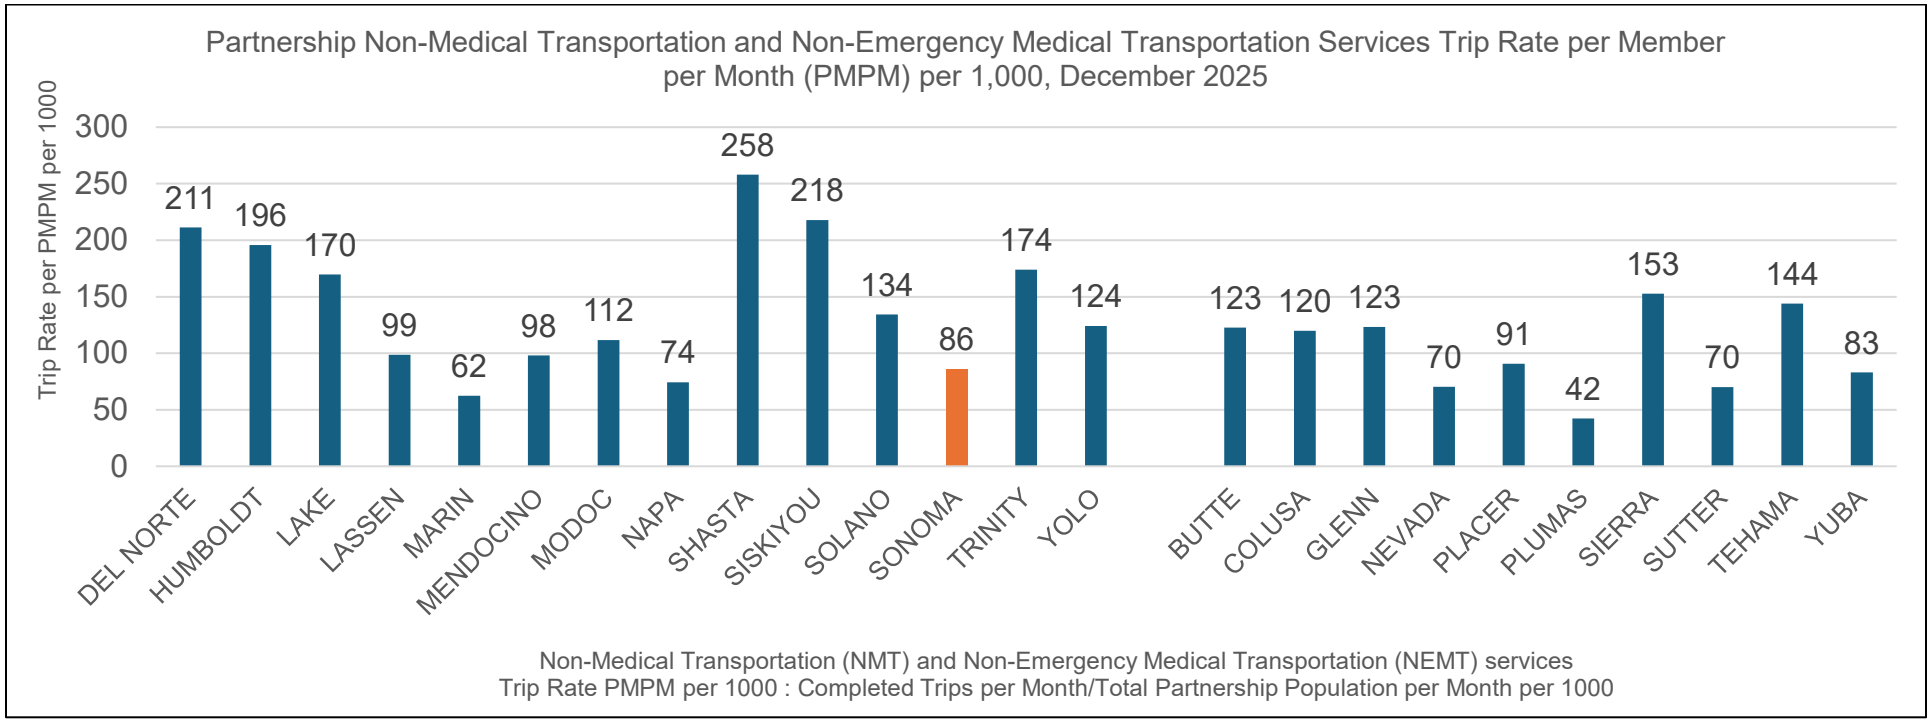
Definition:

- Non-Medical Transportation and Non-Emergency Medical Transportation (NMT/NEMT) Service
- Enrollment is performed by the state of California DHCS and Partnership's 24 individual counties. Race/Ethnicity is voluntarily completed during enrollment by the state of California DHCS and Partnership's 24 individual counties and determined by California DHCS. Enrollment files for Partnership members are populated and sent to Partnership by the state of California DHCS. Partnership does not determine member Race/Ethnicity category.
- Calculations:
    - % Race/Ethnicity is the number of enrolled members in the individual race/ethnicity group (i.e., White, Hispanic, Unknown, Other, Black, Asian, Native American, Asian Indian and Native Hawaiian or Other Pacific Islander), in the location category (i.e., County, Region, or All Partnership) at the particular point-in-time in question, (i.e., December 31, 2025) divided by the total number of members in all race/ethnicity groups in that particular location currently enrolled, multiplied by 100 (%)

Data Source: Partnership Health Analytics Team linked and merged the following datasets by identifiers

- DHCS Enrollment dataset for Partnership Members
- Transportation trip information is tracked by the Partnership Transportation Department. Member and Trip details including demographics and eligibility by month come from datasets received from Kinetic Transportation Data

Transportation Services
Partnership Trips by County



Highlights of Partnership Trips by County

This graph shows Sonoma as a county with low NMT/NEMT transportation at 86 completed trips per member per month (PMPM) for 1,000 members. For every 1,000 members in Sonoma, about 86 members completed NMT/NEMT transportation trips within a month compared to Shasta with the highest PMPM at 258 members per 1,000 members per month, in 2025.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition: Completed Trip is Trip status of Completed, Assignment Exported

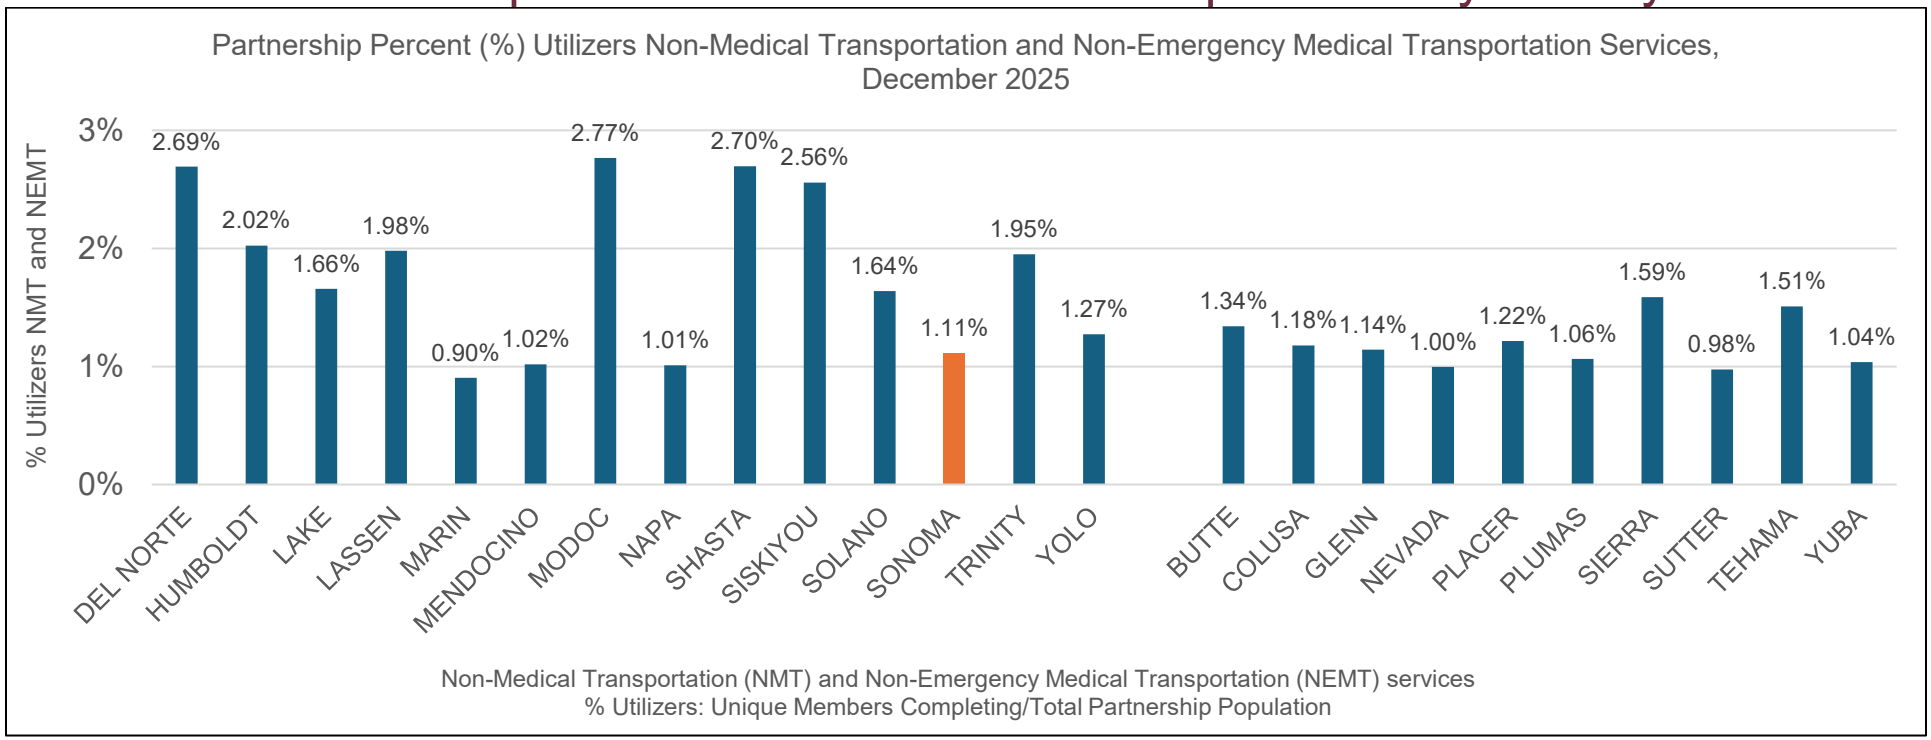
- Transportation is divided into:
    - NMT: Non-Medical Transportation helps members who do not have any other way of getting to their appointments and back to their residence. NMT includes passenger cars, taxis, buses, trains, or other public transportation.
    - NEMT: Non-Emergency Medical Transportation helps members who need door-to-door service – help with getting in and out of the home, vehicle, and medical office. NEMT may include non-emergency ambulances, gurney vans, wheelchair vans, or medical air transport.
- Calculation: Trip Rate PMPM per 1,000
    - NMT/NEMT services are also tracked per Member per Month (PMPM) per 1,000 Partnership Member Month
    - Completed Trips per Month divided by Total Partnership Population per Month X 1,000 (per Partnership Member per Month).

Data Source: Partnership Health Analytics Team linked and merged the following datasets by identifiers

- DHCS Enrollment dataset for Partnership Members
- Transportation trip information is tracked by the Partnership Transportation Department. Member and Trip details including demographics and eligibility by month come from datasets received from Kinetic Transportation Data

Transportation Services

Partnership Member Utilization of Transportation by County



Highlights of Partnership Member Utilization of Transportation by County

Sonoma member population using NMT/NEMT transportation services is 1% of the total number of Partnership Sonoma County members, in 2025.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition: Completed Trip is the trip status of Completed, Assignment Exported

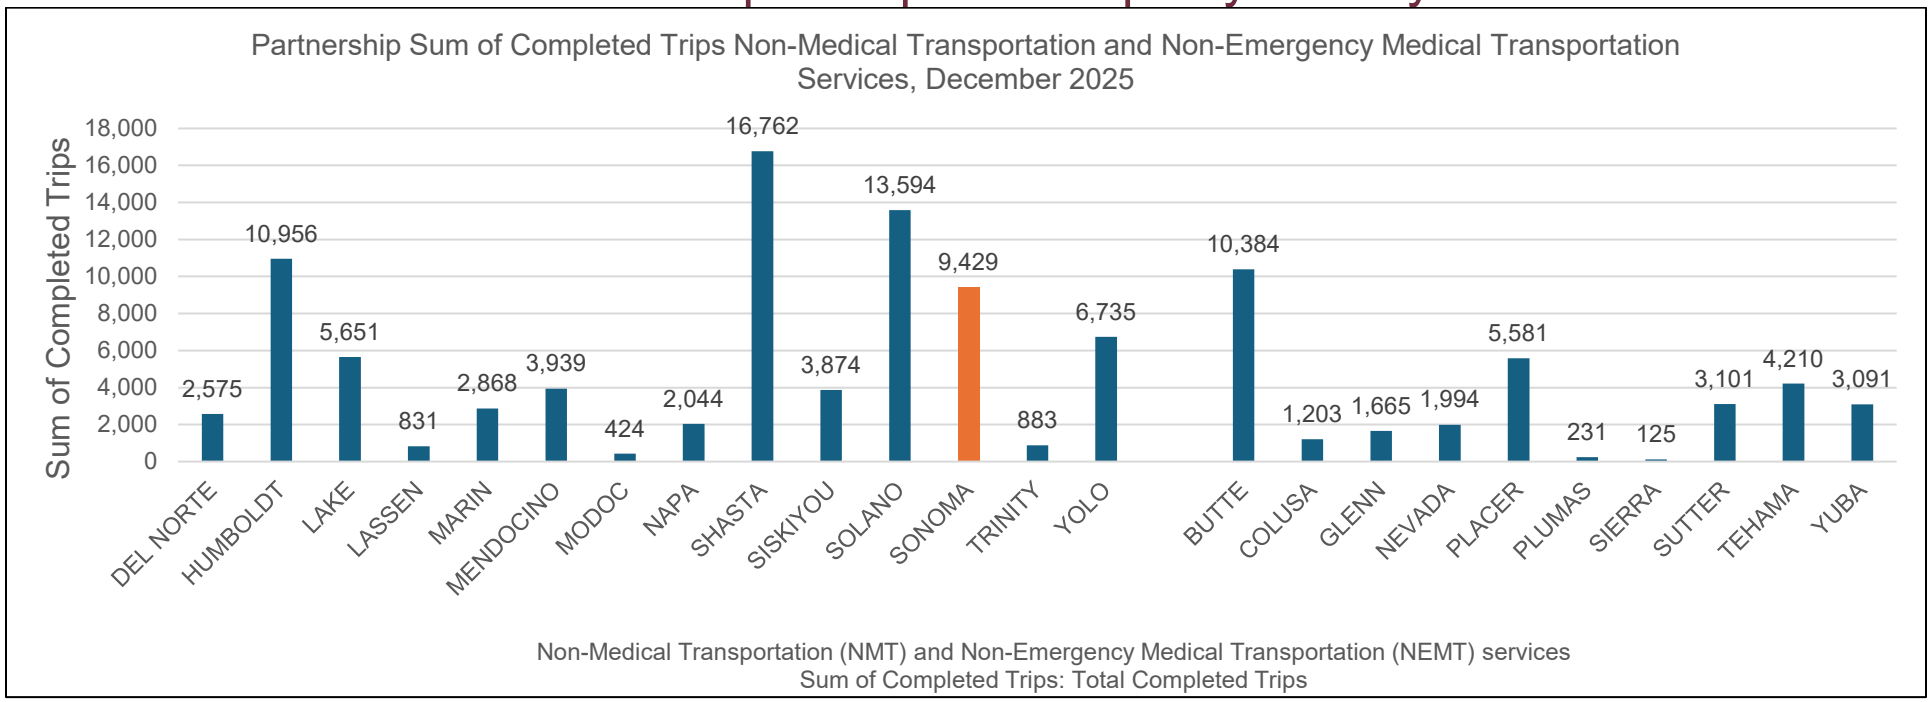
- Transportation is divided into:
    - NMT: Non-Medical Transportation helps members who do not have any other way of getting to their appointments and back to their residence. NMT includes passenger cars, taxis, buses, trains, or other public transportation.
    - NEMT: Non-Emergency Medical Transportation helps members who need door-to-door service – help with getting in and out of the home, vehicle, and medical office. NEMT may include non-emergency ambulances, gurney vans, wheelchair vans, or medical air transport.
- Key Performance Indicators (KPI) follow standards set by Centers for Medicare and Medicaid Services (CMS) and DHCS for NMT and NEMT services booked and used by members, including:
- Calculations: Percent (%) Utilizing Members
    - Number of unique Partnership members who Schedule and Complete Trips within a given Period (i.e., calendar year 2025)
    - Unique Members Completing Trip divided by Total Partnership Population in that particular Location, currently enrolled (i.e., Sonoma County) within the same Period
    - Rate: Percentage X100 (%)

Data Source: Partnership Health Analytics Team linked and merged the following datasets by identifiers

- DHCS Enrollment dataset for Partnership Members
- Transportation trip information is tracked by the Partnership Transportation Department. Member and Trip details including demographics and eligibility by month come from datasets received from Kinetic Transportation Data

Transportation Services

Partnership Completed Trips by County



Highlights of Partnership Completed Trips by County

Though Sonoma Partnership members using transportation services were 1% of Sonoma Partnership population in 2025, estimated at 86 members per month per 1,000 members, a total of 9,429 NMT/NEMT trips were completed, compared to 16,762 completed trips in Shasta.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Health Disparities

Race/Ethnicity Disparities (Partnership-Wide)

Health Disparity Focus Measures by Race, Measurement Year (MY) 2024, 2025

Breast Cancer Screenings: White: Below MPL Asian/Pacific Islander: Below MPL Native American: Below MPL	**Controlling Blood Pressure:** Black: Below MPL Asian/Pacific Islander: Below MPL White: Below MPL Native American: Below MPL
Breast Cancer Screenings: White: Below MPL Asian/Pacific Islander: Below MPL Native American: Below MPL	**Well-Care Visits:** Black: Below MPL Native American: Below MPL White: Below MPL
Diabetes Mellitus Poor Control (A1c >9%): No groups are below MPL.	**Colorectal Cancer Screenings**: Asian/Pacific Islander: Below MPL Black: Below MPL White: Below MPL Native American: Below MPL

Note: Only groups below MPL are shown.

Highlights of Race/Ethnicity Disparities (Partnership-Wide)

Partnership recently received the National Committee for Quality Assurance (NCQA) Health Equity Accreditation (HEA), June 2025. In order to continue to improve health disparities, certain Healthcare Effectiveness Data and Information Set (HEDIS®), Managed Care Accountability Set (MCAS) measures are selected by the Partnership Quality Improvement Health Equity Committee (QIHEC) which oversees the Quality Improvement and Health Equity Transformation Program (QIHETP), charged to develop, implement, monitor, and maintain a health equity transformation system to address improvements in the quality of care delivered by all its providers in any setting, and take appropriate action to improve upon the health equity and health care delivered to Partnership members. Annual Performance Measures and Reports are submitted to the state DHCS for continued HEA.

Limitation:

- Ideally, a true increase or decrease in point estimate is estimated from a P-value or non-overlapping confidence interval (95% CI), which determines statistically significant difference in point estimates between years. These have not been included here. Increase or decrease in point estimates have been determined for program improvement purposes only.

Definition:

Benchmarks and Targets are set as

- MPL: means the minimum performance level (MPL) based on the NCQA's quality compass, 50th national Medicaid percentile. Measures can be -Below MPL- (below target)
- HPL: means the high performance level (HPL) based on the NCQA's quality compass 90th national Medicaid percentile. Measures can be -Above HPL- (above target)

Health Disparities is reported to DHCS via the MCAS data reports with data from the year before:

- Measure Year (MY) is the data collection year (i.e., MY 2024)
- Report Year (RY) (i.e., RY 2025)

Health Disparity Data Analysis

- Comparing prior year data to currently available data, calculated gaps to be filled by measure and race
- Compared race stratification by MPL
- Chi-Square analysis was performed comparing each race stratification to the White race stratification

HEDIS Measures Selected:

- Breast Cancer Screenings (BCS-E): The percentage of women 52–74 years of age who had a mammogram to screen for breast cancer as of December 31 of the measurement year.

- Cervical Cancer Screening (CCS): The percentage of women 21–64 years of age who were screened for cervical cancer using either of the following criteria:
    - Women 21–64 years of age who had cervical cytology performed within the last 3 years
    - Women 30–64 years of age who had cervical high-risk human papillomavirus (hrHPV) testing performed within the last 5 years
    - Women 30–64 years of age who had cervical cytology/high-risk human papillomavirus (hrHPV) cotesting within the last 5 years
- Diabetes Mellitus Poor Control (HbA1c poor control: A1c >9%) for Patients with Diabetes (HBD): The percentage of members 18–75 years of age with diabetes (type 1 and type 2) who had each of the Measure Indicators performed.
    - HbA1c poor control (>9.0%). The most recent HbA1c level is >9.0% or is missing a result, or if an HbA1c test was not done during the measurement year.
- Controlling Blood Pressure (CBP): The percentage of members 18–85 years of age who had a diagnosis of hypertension (HTN) and whose BP was adequately controlled (
- Well-Care Visits (WCV): The percentage of members 3–21 years of age who had at least one comprehensive well-care visit with a PCP or an OB/GYN practitioner during the measurement year.
    - Total: The sum of the age stratifications (ages 3–21) as of December 31 of the measurement year.
- Colorectal Cancer Screenings (COL-E) The percentage of members 45–75 years of age who had appropriate screening for colorectal cancer from January 1- December 31 of the measurement year.

Data Source:

Health Disparities are measured using HEDIS measures are from various DHCS claims datasets for data completeness purposes and to overcome limitations of data collected. Data collected could be divided into:

- Administrative from DHCS Medical claims data ONLY
- Hybrid from DHCS Medical claims data and Data Abstraction from case notes

** Hybrid Measures: Measure rates are calculated using a systematic sample drawn from the eligible population.*
*** ECDS Measures: ECDS Measures are calculated using claims and encounter data as well as supplemental data sources such as Health Information Exchanges, Immunization Registries, and Data Aggregator vendors.*
^ Survey Measures: CAHPS survey responses are collected by member survey between February - May 2023 for the CAHPS measures included in the MY2024 HPA.
 # Before MY2024, the GSD measure was referred to as Hemoglobin A1c Poor Control for Patients with Diabetes (HBD).
Plan All-Cause Readmissions (PCR) is a ratio, and a lower ratio indicates higher performance.
Note: The Follow-Up After Hospitalization for Mental Illness— 7 days (FUH) weighted HEDIS measure has been designated a "Not a Benefit" (NB) measure for Partnership by NCQA and removed from Partnership's NCQA HPA measure set in MY2024.

		Asthma Medication Ratio (AMR) - Total, 5 to 64 Ratios > 0.50	64.71%	54.56%	62.35%	70.56%	76.65%
		Avoidance of Antibiotic Treatment for Acute Bronchitis/Bronchiolitis (AAB) - Total, All Ages	56.00%	49.48%	56.76%	67.03%	77.66%
		Pharmacotherapy Management of COPD Exacerbation (PCE) - Bronchodilators	86.18%	67.25%	80.19%	86.54%	89.96%
		Pharmacotherapy Management of COPD Exacerbation (PCE) - Systemic Corticosteroids	70.93%	55.28%	66.86%	74.78%	82.88%
TREATMENT	Risk-Adjusted Utilization	##Plan All-Cause Readmissions (PCR) - Total Medicare	0.9945	1.1783	1.0290	0.9124	0.8188

** Hybrid Measures: Measure rates are calculated using a systematic sample drawn from the eligible population.*
*** ECDS Measures: ECDS Measures are calculated using claims and encounter data as well as supplemental data sources such as Health Information Exchanges, Immunization Registries, and Data Aggregator vendors.*
^ Survey Measures: CAHPS survey responses are collected by member survey between February - May 2023 for the CAHPS measures included in the MY2024 HPA.
 # Before MY2024, the GSD measure was referred to as Hemoglobin A1c Poor Control for Patients with Diabetes (HBD).
Plan All-Cause Readmissions (PCR) is a ratio, and a lower ratio indicates higher performance.
Note: The Follow-Up After Hospitalization for Mental Illness— 7 days (FUH) weighted HEDIS measure has been designated a "Not a Benefit" (NB) measure for Partnership by NCQA and removed from Partnership's NCQA HPA measure set in MY2024.

** Hybrid Measures: Measure rates are calculated using a systematic sample drawn from the eligible population.*
*** ECDS Measures: ECDS Measures are calculated using claims and encounter data as well as supplemental data sources such as Health Information Exchanges, Immunization Registries, and Data Aggregator vendors.*
^ Survey Measures: CAHPS survey responses are collected by member survey between February - May 2023 for the CAHPS measures included in the MY2024 HPA.
 # Before MY2024, the GSD measure was referred to as Hemoglobin A1c Poor Control for Patients with Diabetes (HBD).
Plan All-Cause Readmissions (PCR) is a ratio, and a lower ratio indicates higher performance.
Note: The Follow-Up After Hospitalization for Mental Illness— 7 days (FUH) weighted HEDIS measure has been designated a "Not a Benefit" (NB) measure for Partnership by NCQA and removed from Partnership's NCQA HPA measure set in MY2024.

Appendix

Demographics
Data Information

- **Who does this report represent**?
  - Partnership members are Medi-Cal members assigned to Partnership by various criteria and eligibility status.
- **What do these measures mean?**
  - Partnership member enrollment (count) by various categories
    - Partnership member demographic information is provided determined by individuals during registration by the State of California or their County. The final Partnership member demographics, including race, is determined by California's Department of Health Care Services (DHCS).
- **Where are the locations represented in these datasets?**
  - Data is for all Partnership counties.
- **When were these datasets collected?**
  - Enrollment from 2022-2025
  - Current enrollment as of February 2026
  - Enrollment fluctuations by month from April 2024 to February 2026
  - Homeless population as of December 2025
  - Maternal population by delivery from 2016-2025
- **Why does partnership keep track of this data**?
  - As a Medi-Cal Managed Care Plan, Partnership is responsible for monitoring the performance of its work, providers, and other delegates to quantify its performance and the health of its members.
- **How does Partnership serve its members?**
  - Partnership offers various healthcare services and benefits to its members, including routine and preventive care, and other medically necessary services. Other healthcare services are carved out to the State, such as pharmacy and dental services, or to counties, such as serious mental health and certain substance use treatment services.
- **Which datasets were used?**
  - Demographics data was sourced from various datasets from DHCS, including:
    - Current Enrollment from DHCS Partnership Enrollment Dataset.
    - Partnership's Health Analytics team utilizes DHCS enrollment and claims data to support population insights. This includes identifying members experiencing homelessness, defined as individuals with

address fields containing keywords associated with homelessness, as well as those with claims that include diagnoses codes related to homelessness, housing instability, inadequate housing, or residential living challenges.

- Of note, homelessness rate are not based on point-in-time homeless count surveys implemented by counties. Chronic homelessness is defined as homelessness lasting more than 180 consecutive days.
- Maternal Population by Delivery are derived from Partnership Delivery Claims Data and data reported by hospitals to HCAI to California Hospital Compare.

Child Welfare Demographics

Data Information

Definitions

- Partnership considers Child Welfare members a special population with benefits and services.

  There are 3 categories of Child Welfare and one related adult category:
  - Children under age 21 currently in foster care
  - Children under age 21 and adopted
  - Children under age 21 who received foster care within the last 12 months
  - Young Adults who are currently 18-26 and aged out of foster care after 18

  Other Related Categories of Special Population tracked include:
  - Adults age 27 and older who have been in foster care at some point in time are also tracked within these systems
  - Relatives/Caregivers (non-parents) who also have Medi-Cal qualifying for certain Medi-Cal benefits or services
  - School Based Children: Members between 5 and 19 years old during the reporting period within the last 12 months
  - First 5: Children under 6 years old or Members under 71 months old during the reporting period

<u>Measures</u>

- Number of Special Population/Child Welfare (Count)
- Number Served (Count): Number of Distinct Child Welfare Population Receiving Services
- Number of Paid Claims: Number of Paid Claims per Service Type
- Number of Unique Services (Count): Number of Distinct services
- % of Child Welfare: Child Welfare as a Percentage (%) of Partnership Member by County
- % of Child Welfare: Child Welfare as a Percentage (%) of Partnership Member by Age
- **When were these datasets collected?**
  - Enrollment and Services from 2021-2025
  - Current Enrollment and Services as of December 2025
- **Which datasets were used?**
  - Demographic data was sourced from various DHCS datasets including:

        - Current Enrollment from DHCS Partnership Enrollment Dataset by the following Medi-Cal Aid Codes used to classify Child Welfare special populations.
    - Services were captured using Claims data:
        - Partnership Paid Claims for Primary Care, Hospital, Specialist encounters and related services
    - CalAIM: Paid claims for Community Health Workers as Certified Providers, Community Support Services and Enhanced Care Management Services
    - Carelon Claims for Behavioral Health Services
    - DHCS Medical Claims for Behavioral Health Services

Obstetric/Maternal Demographics and Conditions

Data Information

- **Who does this report section represent**?
  - The following data represents all Partnership members who delivered, plan-wide and specific to Sonoma. The final Partnership member demographics, including race, are determined by California's Department of Health Care Services (DHCS).
- **What do these measures mean?**
  - Partnership member maternal deliveries (count) by various categories.
    - Partnership Member Maternal Delivery information is determined by individual deliveries during a given year or period. Each delivery is counted once in each category of maternal characteristic.
- **When were these datasets collected?**
  - Maternal Population by Delivery from 2021-2025.

Note: This section is about the Partnership Maternal Population whose deliveries were paid for by Partnership

Chronic Conditions
Data Information

- **What do these measures mean?**
    - Partnership member chronic disease has been divided into two categories, adult and child.
        - Partnership member chronic disease information is determined by algorithms from the Chronic Conditions List from the Centers for Medicare & Medicaid Services (CMS) and Health Effectiveness Data and Information Set (HEDIS) specifications. The criteria used to define the different chronic conditions was based on the presence of diagnoses, procedures, or standard therapeutic classification Service Type Codes (STC) in those data sources during a look-back period that varies depending on the disease, usually one year.
    - Prevalence is the number of members with a given condition in a given year divided by the average membership during the same year, multiplied per 1000. That is, prevalence is the number of members with a condition per 1000 Partnership members.
- **When were these datasets collected?**
    - Chronic conditions from Claims data from 2021-2025
- **Which datasets were used?**

  Chronic Disease data was sourced from various datasets including:
    - Partnership Claims data from DHCS Claims Data
    - Pharmacy Data
    - County Mental Health (for Mental Health related Chronic Conditions)

Access to Dental Services

Data Information

- **What do these measures mean?**
  - Partnership Member Dental Services in various categories
  - Dental data has been divided into two categories, dental services and dental members served.
  - Partnership Member Dental Service information is determined by algorithms from the American Dental Association code on Dental Procedures and Nomenclature, called Dental codes (D-Codes) and the International Classification of Disease, 10th Revision (ICD10 Codes) in medical claims.
  - Dental categories were determined from the American Dental Association code on Dental Procedures and Nomenclature, 2022 and include: Diagnostic Services; Preventive Services; Specialized Services; Adjective Services; Unclassified Services

    For the purpose of this publication, Dental categories have been simplified into three categories below:
    - **Prevention & Early Detection**: Preventive Diagnostic & Preventive
    - **Treatment & Intervention**: Restorative & Specialized
    - **Support / Other**: Adjunctive General & Uncategorized
- **When were these datasets collected?**
  - Dental data from DHCS Dental Claims data were from October 2024-2025
- **Which datasets were used?**

  Dental data was sourced from various datasets including:
  - Partnership Member, Medical Claims data and DHCS Medical and Dental Claims File
  - Data was also collected by the Partnership Dental Liaison on all Partnership member dental facilities and service providers by Partnership County including:
    - Number of Dentists and Number of Dental Hygienists
    - Number of Dental Chairs
    - Monthly Volume of Patients
    - Calculated Ratio Number of Dentists: Number of Member Population
    - Calculated Ratio Number of Hygienists: Number of Member Population

Substance Use Disorder
Data Information

- **What do these measures mean?**
  Substance Use Disorders (SUDs) are measured by:
  - Member Count: Unique Partnership member count utilizing services with claims in the diagnosis and location of service.
  - Paid Claims: Number of substance use services provided.
  - Claims PMPY*1,000: The rate calculated from the number of Claims per Member per Year (12 months) per 1,000 Partnership Members. This is calculated so for every 1,000 Partnership members with any diagnosis, in any service location, and any county, rates can be compared in the same way per 1,000 Partnership members per Member per Year.

  The treatment of the following most frequently occurring substances are monitored using the International Classification of Disease, 10th Revision for medical claims based on diagnosis (ICD10 Codes):
  - Alcohol
  - Opioids
  - Stimulants
  - Cannabis
  - Sedatives
  - Drug Abuse including nonspecific diagnosis of drug abuse and dependance
  - Other, including Psychodysleptic/Hallucinogenic drugs, Lysergic Acid Diethylamide (LSD), Barbiturate, and Methylphenidates

  The substances treated are monitored in the following Centers for Medicare and Medicaid Services (CMS) Place of Service Code Set, defining the location of Service:
  - Office Visit
  - Outpatient
  - Emergency Department (ED)
  - Inpatient Hospital
  - Substance Use Facility
  - Nursing Facility
  - Mental Health Treatment Facility
  - Transportation Services

  Maternal SUD is also monitored for all pregnant and/or mothers within a year after delivery.
  Note: Unique members can have multi-drug SUD and have claims from several

service locations within the same year; hence, these members are not mutually exclusive between category of diagnosis and location of service.
Tobacco screening and referral to treatment is measured in Percentage (%) by:

- Division into adults (over 21 years of age) and children (ages less than 21 years).
- Count of distinct members who received at least one tobacco screening and referral (numerator)/Count of distinct eligible members in the calendar year (denominator) X 100.
- The Paid Claims Current Procedural Terminology (CPT) codes considered include 99406, 99407, 4004F – Tobacco Cessation Intervention Counselling, or 1036F – Current Tobacco non-user.
  - Included only members who are assigned or capitated to a PCP site.
  - Excluded members who are partial/full duals, wellness and recovery only members, newborns, Kaiser members, deceased members.

- **When were these datasets collected?**
  - Medical claims, MedImpact Pharmacy claims, State Pharmacy (Rx) claims, Carelon Healthcare Services claims, and membership data are from 2020.
  - For the purpose of this report, the data is reported from 2021-2025.

  Note: In 2024, Partnership expanded from 14 to 24 counties, adding Butte, Colusa, Glenn, Nevada, Placer, Plumas, Sierra, Sutter, Tehama, and Yuba. Data from the 10 expansion counties became available to Partnership in 2024-2025, so these years may appear larger than other years monitored.
- **Which datasets were used?**
  SUD data was sourced from various datasets including:
  - Medical claims, MedImpact Pharmacy claims, State Pharmacy (Rx) claims, Carelon Healthcare Services claims, Membership data, and DHCS claims

  Note: for the purpose of serving our members, Partnership offers Behavioral Healthcare Services through contracts with Carelon Healthcare Services and so monitors these services as Carelon claims. Carelon divides SUD visits into the following categories:
  - Therapy Service
  - Medical Management
  - Other, which includes visits that are neither for therapy or medical management

Utilization
Data Information

- **What do these measures mean?**
  For Partnership healthcare service Utilization, places of service are defined by the CMS Place of Service Code Set. Explanations of services and metrics follow:

  Note: Rates per member per month -PMPM and per member per year -PMPY are calculated so Partnership members with any type of visit or diagnosis, in any service location and any county, rates can be compared in the same way per 1,000 Partnership members.

  Medicated Assisted Treatment (MAT)
  MAT services are licensed alcoholism and drug abuse recovery or treatment facilities and certified programs ensuring members have access to medications for the treatment of substance use disorders.
    - **Member Count:** Unique Partnership member count utilizing Pharmacy Medication (Rx) services
    - **MAT PMPM*1,000:** Rate calculated from the number of members utilizing MAT per Member per Month (member months) per 1,000 Partnership members.. MAT PMPM*1,000: [sum(MAT) / sum(member months)] per 1,000 Partnership members.

  Emergency Department Visits
    - **Member Count:** Unique count of Partnership members utilizing services
    - **Utilizing Members:** Unique Members who have an ED visit claim in the Partnership medical claims dataset.
    - **Visit Rate:** Total number of ED visits / Total Utilizing Members
    - **Visit PMPY*1,000:** Rate calculated from the number of Visit Claims per Member per Year (12 months) per 1,000 Partnership Members.
    - **Percent (%) Homeless:** Unique members who have an ED visit claim in the Partnership medical claims dataset, with physical address containing keywords indicating homelessness and claims data with diagnosis codes containing the following keywords: homeless, housing instability, inadequate housing, problems related to housing or living in residential institution.
    - **Percent (%) Maternal:** Unique Pregnant Members and/or Mothers within a year after delivery who have an ED visit claim in the Partnership medical claims dataset.

Note: These include only Fee for Service and Capitated Members

Mental Health Services

Mental Health Service Provider claims sources include:

- Medical claims
- Carelon Healthcare Services claims
- County Mental Health data
- Pharmacy (Rx) claims

Each Mental health service provider source is assessed for the following indicators:

- **Claims Count:** Distinct visit counts to mental health providers, defined as a distinct combination of member, service date, and provider.
- **Utilizing Members:** Unique Members who utilize services from the Mental Health Service Provider claims sources
  Note: From 2022, all pharmacy data (Carved In/Out) comes from Magellan datasets called Carved Out (excluding Carved In data).
- **Utilizing Member Visit PMPY*1,000:** is the rate calculated from the number of Utilizing Member per Member per Year (12 months) per 1,000 Partnership Members. Utilizing Member PMPY*1,000: [sum(Utilizing Member) / sum(member months)] * 12 per 1,000 Partnership members.

Behavioral Health Services

Partnership contracts with Carelon Behavioral Health to offer mild to moderate Behavioral Health services, and monitors them through Carelon claims.

- **Utilizing Member Count:** Unique Members who utilize behavioral health services provided by Carelon.
- **Penetration Rate (%):** DHCS treats penetration rate as the percentage of Medi-Cal Members utilizing Health services divided by the number of Medi-Cal eligible members for that county. Partnership defines the measure as a rolling sum of unique members in the first month of measurement period plus unique new members in each of the following months: The sum of (new members receiving service over the span of 12 months)/(member months) X 100.

Hospital Admissions: Acute Inpatient Utilization

- **Acute Inpatient Utilization or Admissions:** Acute inpatient episodes include both acute and administrative days (prescheduled admissions) measures reported as “inpatient” over last two years look back. Transfers to a different facility during an episode are counted as two episodes. Episodes remain

active until a discharge date is received from any one of the data sources with evidence of the member receiving non-inpatient care after admission.

- Episodes are excluded if:
  - The Length of Stay (LOS) is over 180 days.
  - Multiple active episodes for a member occur at the same time – only one episode is kept.
  - There are overlapping admission or discharge dates with other episodes of the same source or across data sources – only one episode is kept.
- Note:
  - Data Sources are combined: Claims data. All have some gaps, but when combined we estimate accuracy to be 99%.
  - The majority of Medicare Part A and Kaiser members are counted under Kaiser.
- **Length of Stay (LOS):** Also known as Hospital Length of Stay, LOS is the number of days between admission and discharge dates for completed episodes and between admission and the last ran date for ongoing episodes. These include admin days (scheduled admissions) and will be counted as a 1-day stay if less than 24 hours.
- **Admits PMPM*1,000:** The rate calculated from the number of utilizing Members Admitted per Member per Month (member months) per 1,000 Partnership Members. Admits PMPM*1,000: [sum(Admits) / sum(member months)] per 1,000 Partnership members.

Primary Care Provider (PCP)

- PCP Office Visits are defined by applying the following criteria to Partnership medical claims data:
  - Places of service (Location Code defined by the CMS Place of Service Code Set is an Office Visit code. Classified as Office Visit in Medical Claim
  - Current Procedure Terminology (CPT) Code maintained by the American Medical Association/American Academy of Professional Coders includes Office Visit (i.e., 992, 993, 994, or CH01)
  - Treatment Type AA or AB (Office Visits)
- **PCP Office Visit PMPY*1,000:** is the rate calculated from the number of Visit Claims per Member per Year (12 months) per 1,000 Partnership Members. PCP Office Visit PMPY*1,000: [sum(office visits) / sum(member months)] * 12 per 1,000 Partnership members.
  - Note: Medicare Part A and Kaiser members are excluded.

Telehealth

- **Telehealth Visits** are defined by:
  - Location Code 02, 10 as defined by the CMS Place of Service Code Set.
  - CMS Telemedicine and Remote Monitoring
  - Modifier Code 1: 'GQ', 'GT', '95', '93'
    - Procedure Code 1: '99451', 'G0071', 'G2012', '92250', '92227', '99444'
- **Percentage (%) of Telehealth (Primary Care Provider -PCP) Visits:** Number of Telehealth PCP Visits/Total number of PCP Visits X 100
- **Telehealth Visit PMPY*1,000:** is the rate calculated from the number of Telehealth Visit Claims per Member per Year (12 months) per 1,000 Partnership Members
- Telehealth Visit PMPY*1,000: [sum(Telehealth visits) / sum(member months)] * 12 per 1,000 Partnership members

- **When can we say these datasets were collected?**
  - Membership data from 2020
  - Medical claims
    - Emergency Department data from 2022
  - Carelon Healthcare Services claims from 2018
  - County Mental Health data from 2017
  - Pharmacy (Rx) claims from 2017
  - For the purpose of this report, the data is reported from 2021-2025

  Note: In 2024, Partnership expanded from 14 to 24 counties, adding Butte, Colusa, Glenn, Nevada, Placer, Plumas, Sierra, Sutter, Tehama, and Yuba. Data from the 10 expansion counties became available to Partnership in 2024-2025, so these years may appear larger than other years monitored.
- **Which datasets were used?**

  Substance Use Disorder data was sourced from various datasets including:
  - Membership data
  - Medical claims
    - Emergency Department data
    - Acute Inpatient Care (including PointClickCare/Collective Medi-Cal)
  - Carelon Healthcare Services claims
  - County Mental Health data
  - Pharmacy (Rx) claims

ACEs Screenings
Data Information

- **What do these measures mean?**
  The Adverse Childhood Experiences (ACEs) screening tool is used to assess the likelihood of having increased risk of an adverse response to toxic stress, due to trauma experienced in the past from birth to 18 years old, such as abuse, neglect, or household dysfunction. Toxic stress can affect both physical and mental health, and manifest in violence, drug abuse, self-harm, and other issues.

  Children under the age of 20 are usually assessed in various ways, and different methods attempt to reduce the risk of toxic stress by intervention, preventing adverse physical and mental health outcomes. Adults ages 20-64 are assessed less frequently to determine past exposures and tailor appropriate intervention.

  For the purpose of this report, children are categorized as ages 0-18, while adults are categorized as age 19+. Both children and adults are allowed one billable ACEs screening assessment per year by Managed Health Plan providers.

- **Which datasets were used?**
  Data is collected from Medical Claims using Healthcare Common Procedure Coding System (HCPCS) codes:
    - G9919 – Positive or High Risk (ACEs Screening Score 4 or greater)
    - G9920 – Negative or Low Risk (ACEs Screening Score 0-3)

  Medical Claims (Amisys) and Membership Eligibility data used for ACEs Screenings exclude:
    - All Kaiser (in 2024, Kaiser became its own health plan), Medi-Medi, deceased, newborns, and Wellness & Recovery members.
    - All Carelon Healthcare Services ACEs Screenings are excluded from the data.
    - Membership data as of last record of eligibility on file in each year (i.e., December of each year).

Measures:

- Number of ACEs Screenings (Count)
- ACEs Screenings PMPY x 1,000: is the rate calculated from the number of ACEs Screening Claims per Member per Year (12 months) per 1,000 Partnership Members.

- ACEs Screening PMPY*1,000: [sum (ACEs Screening) / sum (member months)] * 12 per 1,000 Partnership members

Transportation Services
Data Information

- **What do these measures mean?**
  Transportation is divided into:
  - NMT: Non-Medical Transportation helps members who do not have any other way of getting to their appointments and back to their residence. NMT includes passenger cars, taxis, buses, trains, or other public transportation.
  - NEMT: Non-Emergency Medical Transportation helps members who need door-to-door service – help with getting in and out of the home, vehicle, and medical office. NEMT may include non-emergency ambulances, gurney vans, wheelchair vans, or medical air transport.

  Key Performance Indicators (KPI) follow standards set by Centers for Medicare and Medicaid Services (CMS) and DHCS for NMT and NEMT services booked and used by members, including:
  - **Scheduled Trip**: The total of all trips that were placed in the scheduling system
  - **Completed Trip**: Trip status of Completed, Assignment Exported
  - **Non-Completed Trip**: Trip status of Requester Cancelled/Patient Cancelled, No Show, Provider Cancellation/Denied
  - **Resolved Trip**: Trip status of Completed, Requester Cancelled, Patient Cancelled, No Show, Denied, Approval Denied, Assignment Exported
  - **Unresolved Trip**: Trip status of Approval Pending, Assignment Accepted, Assignment Dispatched, Assignment Pending, En Route, Expired, Ready to Assign
  - **Member Cancellation**: All Member Cancellation classifications are defined as user caused
  - **Member No Show**: All Member No Show classifications are defined as user caused
  - **Provider Cancellation**: All Provider Cancellation classifications are defined as provider caused
  - **Date of Service** is defined as the Scheduled Trip Pick Up Date

  Transportation measures are Key Performance Indicators (KPI):
  - Number of Scheduled Trips
  - Average Distance Traveled (miles)
  - Average Duration of Trip (minutes)
  - Median Distance Traveled (miles)
  - Shortest Distance of Trip (miles)

- Longest Distance of Trip (miles)
- Percent (%) Completed Trip
- Percent (%) Member No Show
- Percent (%) Member Cancellation
- Percent (%) Provider Cancellation

The following Measures are also tracked in percentage (%) and rate:

- Percent (%) Utilizing Members: Number of unique Partnership members who schedule and complete trips within a given period (e.g., calendar year 2025). Unique Members Completing Trip/Total Partnership Population X100
- Trip Rate PMPM per 1,000: NMT/NEMT services are also tracked per member per month (PMPM) per 1,000 Partnership Member: Completed Trips per Month/Total Partnership Population per Month per Month per 1,000 Partnership Members.

- **When were these datasets collected?**
  - Transportation data collection began in June 2024. NMT/NEMT data is arranged in a monthly fashion. All trips scheduled will be counted as occurring on the NMT/NEMT data arranged at the monthly level, and all trips for the month will show as occurring on the first of each appropriate month.
  - This report uses NMT/NEMT data reported from January to December 2025.

  Note: Data for the newer Partnership Counties (Butte, Colusa, Glenn, Nevada, Placer, Plumas, Sierra, Sutter, Tehama, and Yuba) were only collected from 2024-2025, so these years may appear larger than other years monitored. In 2024, Partnership expanded its services from 14 to 24 counties.
- **Which datasets were used?**
  - Transportation trip information is tracked by the Partnership Transportation Department
  - Member and Trip details including demographics and eligibility by month come from datasets received from Kinetic Transportation Data
  - Member Database

Health Disparities
Data Information

- **What do these measures mean?**
  Partnership recently received the National Committee for Quality Assurance (NCQA) Health Equity Accreditation (HEA), June 2025. In order to continue to improve health disparities, certain Healthcare Effectiveness Data and Information Set (HEDIS®), Managed Care Accountability Set (MCAS) measures are selected by the Partnership Quality Improvement Health Equity Committee (QIHEC) which oversees the Quality Improvement and Health Equity Transformation Program (QIHETP), charged to develop, implement, monitor, and maintain a health equity transformation system to address improvements in the quality of care delivered by all its providers in any setting, and take appropriate action to improve upon the health equity and health care delivered to Partnership members. Annual Performance Measures and Reports are submitted to the state DHCS for continued HEA.

  Benchmarks and Targets are set by:
  - MPL: means the minimum performance level (MPL) based on the NCQA's quality compass, 50th national Medicaid percentile. Measures can be -Below MPL- (below target)
  - HPL: means the high performance level (HPL) based on the NCQA's quality compass 90th national Medicaid percentile. Measures can be -Above HPL- (above target)

HEDIS Measures Selected:

- Breast Cancer Screenings (BCS-E): The percentage of women 52–74 years of age who had a mammogram to screen for breast cancer as of December 31 of the measurement year.
- Cervical Cancer Screening (CCS): The percentage of women 21–64 years of age who were screened for cervical cancer using either of the following criteria:
  - Women 21–64 years of age who had cervical cytology performed within the last 3 years
  - Women 30–64 years of age who had cervical high-risk human papillomavirus (hrHPV) testing performed within the last 5 years
  - Women 30–64 years of age who had cervical cytology/high-risk human papillomavirus (hrHPV) cotesting within the last 5 years

- Diabetes Mellitus Poor Control (HbA1c poor control: A1c >9%) for Patients with Diabetes (HBD): The percentage of members 18–75 years of age with diabetes (type 1 and type 2) who had each of the Measure Indicators performed.
    - HbA1c poor control (>9.0%). The most recent HbA1c level is >9.0% or is missing a result, or if an HbA1c test was not done during the measurement year.
- Controlling Blood Pressure (CBP): The percentage of members 18–85 years of age who had a diagnosis of hypertension (HTN) and whose BP was adequately controlled.
- Well-Care Visits (WCV): The percentage of members 3–21 years of age who had at least one comprehensive well-care visit with a PCP or an OB/GYN practitioner during the measurement year.
    - Total: The sum of the age stratifications (ages 3–21) as of December 31 of the measurement year.
    - Colorectal Cancer Screenings (COL-E) The percentage of members 45–75 years of age who had appropriate screening for colorectal cancer from January 1- December 31 of the measurement year.

- **When were these datasets collected?**
  Health Disparities is reported to DHCS via the MCAS data reports with data from the year before:
    - Measure Year (MY) is the data collection year (i.e., MY 2024)
    - Report Year (RY) (i.e., RY 2025)

- **Which datasets were used?**
  Health Disparities are measured using HEDIS measures are from various DHCS claims datasets for data completeness purposes and to overcome limitations of data collected. Data collected could be divided into:
    - Administrative from DHCS Medical claims data ONLY
    - Hybrid from DHCS Medical claims data and Data Abstraction from case notes

Note: Categories for which there are no known codes are not shown.

HEDIS
Data Information

- **What do these measures mean?**
  Partnership's Quality Improvement (QI) Program continues to focus on improving quality measures defined by the National Committee for Quality Assurance (NCQA and the Department of Health Care Services (DHCS) Managed Care Accountability Set (MCAS). Partnership received Health Plan Accreditation (HPA) from National Committee for Quality Assurance (NCQA) in 2019. NCQA Health Plan Accreditation (HPA) and Consumer Assessment of Healthcare Providers and Systems (CAHPS®) surveys both used to generate Partnership's Health Plan Rating using the NCQA Five-Star rating methodology. Partnership's 2025 Health Plan Rating (HPR) is Three out of Five Stars: ★★★.

  Measures: Healthcare Effectiveness Data and Information Set (HEDIS®) measures and Consumer Assessment of Healthcare Providers and Systems (CAHPS®) survey results.

- **When were these datasets collected?**
  Measure stratifications by race and ethnicity, which are used to identify health disparities, are reported to NCQA and DHCS via MCAS measure reporting with results from the measurement:
  - Measure Year (MY) is the data collection year (i.e., MY 2025)
  - Reporting Year (RY) (i.e., RY 2026)

- **Which datasets were used?**
  HEDIS measure rates, including race and ethnicity stratifications, ~~s~~ are generated from various data sources, including claims and encounters, immunization registries, lab vendor data, Health Information Exchanges, and Electronic Clinical Data Systems (ECDS) data. Most HEDIS measures generate rates using these data sources applied to the entire eligible population for the measure. A subset of HEDIS measures generate rates using the hybrid methodology, which relies on Medical Record Review of a systematic sample of medical records as well as the data sources listed above.

HEDIS Data Collection Methods:

- Administrative Measures: data is collected from claims and encounters (transaction data)

- Hybrid Measures: data is collected from clinical medical record data using a systematic sample of the eligible population to supplement the administrative data collected.
- Electronic Clinical Data Systems (ECDS) measures: data is collected through provider's EHRs, health information exchanges (HIEs) or clinical registries, case management systems, and administrative data.

Note: Partnership also use HEDIS-like measures for Quality Incentive Programs using measure specifications that are closely aligned with the NCQA Technical Specifications.

HEDIS Managed Care Accountability Set (MCAS) Measure

Partnership HealthPlan of California
Measurement Year 2024 / Reporting Year 2025

9.0 Measurement Year 2024 Managed Care Accountability Site (MCAS) Measurement Set Descriptions-Accountable Measures

HEDIS Measure	Measure Indicator	Measure Definition
*Asthma Medication Ratio (AMR)	• Total	• The percentage of members 5–64 years of age who were identified as having persistent asthma and had a ratio of controller medications to total asthma medications of 0.50 or greater during the measurement year.
*Breast Cancer Screening (BCS-E)	• Non-Medicare Total	• The percentage of women 52–74 years of age who had a mammogram to screen for breast cancer as of December 31 of the measurement year.
Cervical Cancer Screening (CCS)	• Total	• The percentage of women 21–64 years of age who were screened for cervical cancer using either of the following criteria: ○ Women 21–64 years of age who had cervical cytology performed within the last 3 years ○ Women 30–64 years of age who had cervical high-risk human papillomavirus (hrHPV) testing performed within the last 5 years • Women 30–64 years of age who had cervical cytology/high-risk human papillomavirus (hrHPV) cotesting within the last 5 years
*Child and Adolescent Well-Care Visits (WCV)	• Total	• The percentage of members 3–21 years of age who had at least one comprehensive well-care visit with a PCP or an OB/GYN practitioner during the measurement year. • Total. The sum of the age stratifications (ages 3–21) as of December 31 of the measurement year.

Measurement Year 2024 / Reporting Year 2025

HEDIS Measure	Measure Indicator	Measure Definition
Childhood Immunization Status (CIS)	• Combination 10	• The percentage of children 2 years of age who had four diphtheria, tetanus and acellular pertussis (DTaP); three polio (IPV); one measles, mumps and rubella (MMR); three haemophilus influenza type B (HiB); three hepatitis B (HepB), one chicken pox (VZV); four pneumococcal conjugate (PCV); one hepatitis A (HepA); two or three rotavirus (RV); and two influenza (flu) vaccines by their second birthday. The measure calculates a rate for each vaccine and three combination rates.
*Chlamydia Screening in Women (CHL)	• Total	• The percentage of women 16–24 years of age who were identified as sexually active and who had at least one test for chlamydia during the measurement year. ○ Total: the sum of the age stratifications.
Controlling High Blood Pressure (CBP)	• Total	• The percentage of members 18–85 years of age who had a diagnosis of hypertension (HTN) and whose BP was adequately controlled (<140/90 mm Hg) during the measurement year.
*Developmental Screening in the First Three Years of Life (DEV_CH)	• Total All Ages	• Percentage of children screened for risk of developmental, behavioral, and social delays using a standardized screening tool in the 12 months preceding or on their first, second, or third birthday. • This measure is a CMS FFY 2023 Child Core Set Measure, held to the DHCS designated MPL.
*Follow-Up After ED Visit for Mental Illness – 30 days (FUM)	• Total	• The percentage of emergency department (ED) visits for members 6 years of age and older with a principal diagnosis of mental illness or intentional self-harm, who had a follow-up visit for mental illness. • The percentage of ED visits for which the member received follow-up within 30 days of the ED visit (31 total days).

HEDIS Measure	Measure Indicator	Measure Definition
*Follow-Up After ED Visit for Substance Abuse – 30 days (FUA)	• Total	• The percentage of emergency department (ED) visits among members age 13 years and older with a principal diagnosis of substance use disorder (SUD), or any diagnosis of drug overdose, for which there was follow-up. • The percentage of ED visits for which the member received follow-up within 30 days of the ED visit (31 total days).
Immunizations for Adolescents (IMA)	• Combination 2	• The percentage of adolescents 13 years of age who had one dose of meningococcal vaccine, one tetanus, diphtheria toxoids and acellular pertussis (Tdap) vaccine, and have completed the human papillomavirus (HPV) vaccine series by their 13th birthday. The measure calculates a rate for each vaccine and two combination rates. • Combination 2. Adolescents who have had all three indicators (meningococcal, Tdap and HPV).
Hemoglobin A1c Control for Patients With Diabetes (HBD)	• HbA1c poor control (>9.0%)	• The percentage of members 18–75 years of age with diabetes (type 1 and type 2) who had each of the Measure Indicators performed. ○ HbA1c poor control (>9.0%). The most recent HbA1c level is >9.0% or is missing a result, or if an HbA1c test was not done during the measurement year.
Lead Screening in Children (LSC)	• Total	• The percentage of children 2 years of age who had one or more capillary or venous lead blood test for lead poisoning by their second birthday. • At least one lead capillary or venous blood test (Lead Tests Value Set) on or before the child's second birthday.

HEDIS Measure	Measure Indicator	Measure Definition
Prenatal and Postpartum Care (PPC)	• Timeliness of Prenatal Care • Postpartum Care	• The percentage of deliveries of live births on or between October 8 of the year prior to the measurement year and October 7 of the measurement year. For these women, the measure assesses the following facets of prenatal and postpartum care. ○ Timeliness of Prenatal Care. The percentage of deliveries that received a prenatal care visit in the first trimester, on or before the enrollment start date or within 42 days of enrollment in the organization. ○ Postpartum Care. The percentage of deliveries that had a postpartum visit on or between 7 and 84 days after delivery.
*Topical Fluoride for Children (TFL-CH)	• Total ages 1 through 20	• Percentage of enrolled children ages 1 through 20 who received at least two topical fluoride applications as: (1) dental or oral health services, (2) dental services, and (3) oral health services within the measurement year. • This measure is a CMS FFY 2023 Child Core Set Measure, held to the DHCS designated MPL.
*Well-Child Visits in the First 30 Months of Life (W30)	• Well-Child Visits in the First 15 Months • Well-Child Visits for Age 15 Months–30 Months.	• The percentage of members who had the following number of well-child visits with a PCP during the last 15 months. The following rates are reported: • Well-Child Visits in the First 15 Months. Children who turned 15 months old during the measurement year: Six or more well-child visits. • Well-Child Visits for Age 15 Months–30 Months. Children who turned 30 months old during the measurement year: Two or more well-child visits.

**-Administrative Measures. The entire eligible population is used in calculating performance (versus a systematic sample drawn from the eligible population for the hybrid measures*
