NON-GAAP FINANCIAL MEASURES

In addition to GAAP financial measures, management uses Adjusted Revenues as a non-GAAP financial measure. This non-GAAP financial measure should not be considered a substitute for, nor superior to, financial results and measures determined or calculated in accordance with GAAP. This non-GAAP financial measure is not calculated in the same manner by all companies and, accordingly, may not be an appropriate measure of comparing performance among different companies. We define Adjusted Revenues as revenues excluding tax gross-ups related to gaming taxes which PENN Interactive pays on behalf of, and is reimbursed by, its third-party online sports betting and iCasino operator partners that PENN provides market access to in various states in the U.S. We believe Adjusted Revenues is useful as a supplemental measure in evaluating the performance of our Interactive segment results of operations. Adjusted Revenues is a measure used by management to evaluate total revenues exclusive of tax gross-ups which are not indicative of ongoing operations that could impact period-to-period comparison. A reconciliation of GAAP revenues to Adjusted Revenues for our Interactive segment is included in the financial schedules in this investor deck.
