

Human Resources Deputy Minister Visits PIC

The Malaysian Human Resources Ministry visited Pengerang Integrated Complex (PIC) on 3rd March 2022. A delegation, led by the Deputy Minister Datuk Awang Hashim, were received by SVP and CEO PETRONAS Refinery and Petrochemical Corporation (PRPC), Encik Kamal Bahrin Ahmad and other PRPC Leadership Team (LT) members.

The delegation were shown around the Small Package Camp (SPC) to see up close the excellent worker accommodation and facilities, including F&B, convenience and recreation amenities.

Encik Kamal said, "As we prepare ourselves for operations phase, we have taken all the necessary steps to ensure safety and a conducive working environment for our employees and partners. We provide safe accommodation and facilities, including proper grievance channels. In addition, we have many initiatives towards employee development and enhancement."

PRPC, as Park Manager, is fully committed to provide a safe and conducive working environment in PIC for workers and partners, guided by the Code of Conduct and Business Ethics (CoBE) and PETRONAS' Human Rights Commitment.

AICE: Operational Readiness for PIC Start-up

The Asset Integrity Confidence Enhancement (AICE) is a collaboration between PRefChem and PETRONAS with the core objective of enhancing the operational readiness of the plant start-up in Pengerang Integrated Complex (PIC). Undertaken by an Integrated Assurance Team jointly led by PRefChem Technical Discipline Support GM En. Zuraimi Idris and PRPC Asset Integrity and Start-up Readiness SGM Datuk Nur Iskandar, the team is divided into three major workstreams; **Asset Integrity**, **Operation & Process** and **Start-up & Debugging**.

The Asset Integrity (AI) workstream focuses on analysing critical equipment by utilising Oil and Gas screening best practices. Through this, project packages that have equipment failure history will be scrutinised and preventive measures will be carried out. Inspections and testings will also be conducted based on multiple disciplines including electrical and mechanical.

Under the Operation & Process workstream, the team will review and verify the effectiveness of the preservation exercise. The previous operation practices which include the Safe Operating Limits (SOL), Management of Change (MOC) are carefully reviewed whereby lessons learnt from the industry are incorporated.

In the Start-up & Debugging workstream, the team is responsible to introduce a debugging regime during the initial start-up phase and to undertake inspections and rectification works on any abnormality found during the observation period. The Operation Manual or Standard Operating Procedure (SOP) will be enhanced based on the debugging findings.

AICE reports to the AICE Steering Committee chaired by En. Hanafi Dewa, CEO of PRefChem and co-chaired by En. Kamal Bahrin B Ahmad, SVP and CEO of PRPC. In the spirit of 'One Team One Goal' and 'Winning Together', the team will continue to work tirelessly with the support from across PIC towards achieving its completion and mission success.

Activities

Folding bike cyclists at the PIC can now show up **every Tuesday, 8pm** at The HIVE Club House to meet others who love cycling so they can ride on regular basis every week. The cycling route will be inside the PIC covering the non-process area, the beach and up to Tanjung Pengelih and it will be a return trip (approximately 20km in total). Sometimes, it's beyond that. To Kampong Lepau or Sungai Rengit. Let's meet up and ride!

Tazkirah

What's Good in Pengerang?

"Pre-covid, I used to sell more than 1000 pieces of **apam balik** and **kuih pukis** (it's not a misspelling)", said Wilda who has been selling the traditional snack in Sungai Rengit for more than 40 years. Located in front of her old shop next to Sungai Rengit Marrybrown, Wilda said, Singaporeans who arrived in Pengerang via Tanjung Pengelih will always stop by to buy. "They will stop by again to buy bags of them before they return to Singapore", reminisced Wilda on the good days before the covid pandemic. "They jokingly text me if I can ship these snacks to Singapore". Wilda added, "We are keeping it traditional. No cheese, chocolate or peanut butter, please. Plain and simple but delicious"
