

Thank You, Avengers!

When they first came on board, some were skeptical but to many of us, it was hopefulness that came to mind. After almost two years, we needed to Start-up the plant, fast. Alhamdulillah, with the Asset Integrity and Confidence Enhancement (AICE) team working together with PRefChem team, we achieved our first milestone on May 6.

In the span of five months, the AICE programme was 100% completed for early start-up units with no major findings. As at 24 April, the overall completion was at 85.5%. Risk Assessment conducted on the remaining 15% of the AICE scope for uninspected static equipment and piping resulted in medium risk rating which will be mitigated accordingly.

Although it is too early to celebrate, it is still and will always be a win in our book of achievements. With the start-up, we hope to achieve many more milestones, together as a team. It is time to capitalise on our strengths and reignite our purpose: To become THE Regional Petrochemical Park.

BAKIP Ramadan 2022 Donation Drive

Badan Kebajikan Islam PETRONAS (BAKIP) Infaq Ramadan collected more than RM222,000 in donations as contributed by employees. This amount surpassed last year's collection of RM218,000. The donation was distributed to help families in within the vicinity of PIC and also Bandar Penawar.

Here at PIC, we believe in giving back to society. As such, should you have the extra resources to pay it forward, we welcome more donations to 01135010027845 (Bank Islam) until 30 May 2022 to reach our RM250,000 donation drive goal for this year.

Tazkirah

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

The Prophet SAW was asked: "Which charity is best?"

He replied: "That which you give while your fear poverty."

What's Good in Pengerang?

Built in 1939 to protect the Malay Peninsular from the Japanese attacks during the World War II, the Pengerang Battery has a superior strategic position with its main observation post located on top of Bukit Pengerang's 600ft hill and hiking further up the hill, you can discover a spot to take in the mesmerising view of the Johor Straits. Pengerang Battery is rumoured to have extensive tunnel network and underground bunkers surrounding Bukit Pengerang. For guided tours that offer better understanding of the history and functions of many structures of battery, contact local tour guide, Khairul Akmal at 0137155567.

Quote of the Week

“While we acknowledge that we have faced setbacks in the plant start up, we should also acknowledge that success is developed from overcoming the setbacks. Setbacks are one of the stepping stones to success. Setbacks is a lesson learned. Success is a lesson applied.”

PIC Park Rules 3rd Edition Insights

PIC PARK RULES was first established by PRPC as a directive and regulation formulated to govern the movement, conduct and day-to-day operations of all parties in PIC. It also sets down the principles and guidance on the standards of behavior expected within the PIC. Compliance will then lead to a safe, secure, orderly and sustainable business environment within the PIC and its surrounding areas.

In order to accommodate the dynamics of PIC transition into full operations, enhancement in certain elements of PIC Park Rules is deemed necessary. Apart from other requirements that need to be embedded into following the introduction of new PETRONAS standards and guidelines.

Aspires from THE Regional Petrochemicals Park tagline, PIC Park Rules content must remain relevant and proactively enhanced from time to time. Inputs and identified gaps collated from various avenues undergone a thorough deliberation process to ensure positive impacts to all parties.

In this 3rd Revision, the enhancement among others involves rearrangement of content sequence for a more ease of reading, redefined several section titles to emphasize the respective scope, amendment of PRPC roles in emergency and crisis management, inclusion of new sections in traffic management, waste Management and PIC Sustainability Agenda and revision of consequence management procedure.

Park Governance team is committed to ensure that PIC Park Rules remain as key reference to all parties and be able to bridge identified gaps, as PIC progresses ahead.
