

## PRPC celebrates loyal employees

The Majlis Sekalung Budi 2022 (MSB) was a special occasion as a token of gratitude to publicly thank the staff for the many years of service they have devoted to the industry. It was also held to acknowledge their loyalty, commitment and dedication over all these years.

SVP & CEO of PRPC Encik Kamal Bahrin Ahmad took a moment during his speech to personally congratulate the celebrated employees for accomplishing this memorable milestone, which marks a significant episode in their career with PETRONAS. The event was attended by 100 MSB participants who proudly gathered to celebrate the event.

"You have continued to develop your potential and grow alongside PETRONAS by projecting an innovative, dynamic and courageous persona that helped drive our organisation's progress. So, for all that, I say thank you, well done and continue to keep up the excellent work," said En Kamal.

He also added a personal note in his speech to thank the family members of these employees for their unwavering support and patience extended to these warriors of PETRONAS who relentlessly pursued their mission to deliver the best results at work.

"Like a circle, the pursuit of excellence has no end. I hope you will remember this and continue to uphold and demonstrate the PETRONAS Shared Values and Culture Beliefs that have kept us going. Let's all continue to set new benchmarks for ourselves and help the company grow," he added.

## PRefChem lends a hand to fishermen community

PRefChem introduced its first Bubu programme to the fishermen community of Kampung Lepau as part of its CSR to continuously improve and impact the lives of others especially the communities who are closest to us.

Bubu is a piece of fishing equipment traditionally made of bamboo frame with rattan rings, widely used by fishermen at uneven seabed terrains with coral reefs. Now, bubu is mostly made from galvanised netting and iron metal of various shapes and sizes which traps the fish from escaping.

One of the recipients Encik Mohamad Zakuan Yacob said, "I am grateful that PRefChem truly lives up to their mission to care for the community and enrich our lives. I strongly believe this contribution will lift the spirit of our fishermen community and we would be able to help increase the number of fishes and sea creatures that will be caught."

The fishing equipment was handed over to 16 fishermen from Kampung Lepau whose livelihood is primarily dependent on fishing. Each fisherman received fishing materials which included galvanised hexagonal wire netting as well as 10 kg of metal rod wire. Also present was Head of Manufacturing, Datuk Hashim Majid.

## PIC launches

## myRegister, myPIC, myPRPC

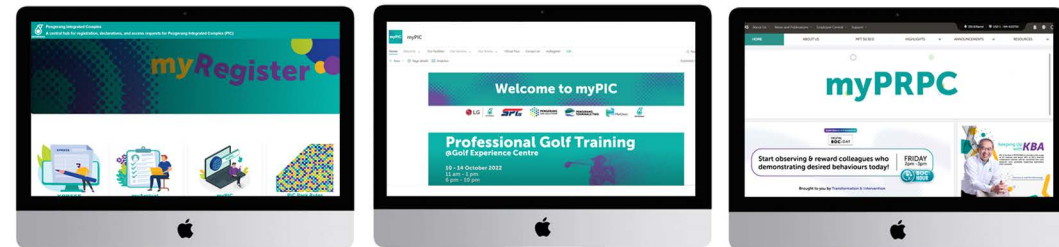

In line with PIC's digitalization aspiration, three digital platforms were launched yesterday - myRegister, myPIC, and myPRPC. The platforms were launched to address pressing matters and pain points heard from staff, contractors, and visitors of PIC.

As part of our drive to achieve the PIC Vision, myPIC will promote PRPC's image as PIC Park Manager via a single platform for access to Park Rules as well as services and communications with staff of companies and contractors working in PIC. It will also feature information on common facilities and links to request for services and promotions, weekly publication of stories behind the scenes such as PIC Weekly and FACES behind the Start-up, Park Rules, HSSE Awareness tips as well as PIC Sustainability Agenda.

The myRegister was developed through the collaborative effort from PRPC and PETRONAS Digital Sdn Bhd to resolve the issues plaguing entry registration into PIC at pace, such as lengthy processing time, multiple separated touch points and a massive paper trail. The introduction of myRegister will replace the Visitor Management System and issue the PIC Security Access Card (PSAC) which will be digitised, centralised and streamlined. This also applies to visitors coming in.

On the other hand, the myPRPC will cater for PRPC and its GoCs' staff. Developed as a secured internal communication tool, employees now have access to a one-stop centre and depository platform for all PRPC related information and materials. It is also expected to help in reducing email clutter as information can be communicated in an improvised and digitized way instead of sending and receiving an enormous amounts of email blasts on a daily basis.

A big thank you to representatives of respective entities who attended the event including CEO of PRefChem Joost Emmen, CEO of PT2SB Aqeel Hussain, CEO of PGSSB Pang Ling Hiew, LGPC CEO Lee Dong Cheol, PC INA CEO Ahmad Zaki Daud and CEFS CEO Mohd Ali Azlan.

### Tazkirah

Orang-orang yang bertanggungjawab mengurus anak yatim, baik dari keluarga sendiri atau tidak, maka aku dan dia seperti dua jari ini di syurga kelak." Dan baginda memberi isyarat dengan merapatkan jari telunjuk dan jari tengah (ertinya berdekatan).

Hadis Riwayat Imam Bukhari

### Quote of the Week

**"Your current situation doesn't need to be your final destination. It's never too late and you're never too old to become better."**

**Fazilawati @ Fajrina Binti Zawawi**

Cost Controller,  
Project Management

### What's Good in Pengerang?

#### Tanjung Balau

Tanjung Balau is a popular beach that has a fishing village nearby with the same name. Apart from beach and village fishing village, there is also a fisherman museum nearby which is open to public. The beach has an area with a wide expanse of grass for playing ball games or having picnics. Kite flying is a popular activity on this beach. There's also a jetty with extended branching concrete bridges that let visitors wander near the shore. Tanjung Balau is one of the best places to go on weekend. If you are a sunrise enthusiast, this is among the best places to observe it. On a clear day, you will be able to see sun rising from the east.
