

Beyond Desktop Review

The goal to deliver a safe and successful start-up and to operate sustainably for many years to come, is no easy feat to accomplish.

Meeting one of the leaders behind the AICE Team, En Zuraimi M Idris when asked on the challenges faced, smiled before answering this question.

"I have been in PETRONAS for 30 years and a third of my career life has been in RAPID project since the feasibility study back in 2011. My intention is to ensure that this project runs smoothly and safely. I believe everyone has the same objective.

"Identifying the unknown is always the challenge. I would say this is the biggest challenge. To date, we have found anomalies on 33 joints out of more than 600 joints and a detailed review is currently being carried out." He explained in an interview recently.

Asked on whether we can meet the May deadline, En Zuraimi said he is proud to have a great team that works hard to ensure that the findings can be rectified and closed within the stipulated timeline.

"Another challenge is also in not knowing the unknown. This is a tall order and there is a high expectation on us to deliver the project by the deadline. Rest assured, there is haste in escalating any findings or anomalies to avoid surprises," he added.

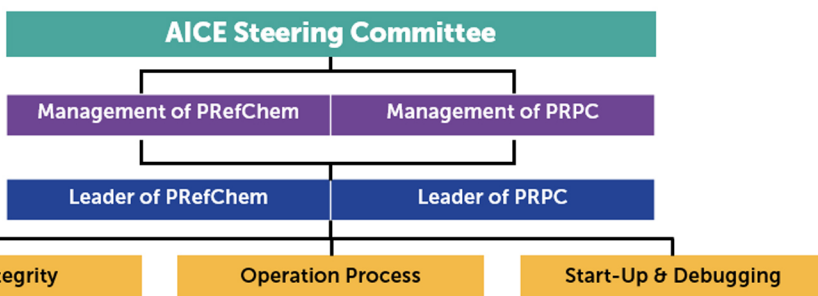

AICE 101 Detailed Forensics Investigation

With more than 500 personnel and contractors on board, this is the most concerted effort by PRefChem, PRPC and contractors to date. AICE was formed to provide reasonable confidence enhancement focusing on Asset Integrity, Operation and Process Excellence and Debugging.

What's different this time?

There were many assurance programmes that were set in place previously. However, this is the first time that the assurance goes deeper than the documentation review and undergo more thorough checking processes. Physical and additional testings such as hardness test, replica, ultrasonic tests are also being carried out.

LEADER'S QUOTE

“Together, let's put our mind and heart into fulfilling this Amanah or Trust bestowed upon us. With extra effort and push, In Shaa Allah we will be able to safely restart-up the complex and sustain stable operations for years to come.”

En Zuraimi M Idris
Leader, Asset Integrity Confidence Enhancement (AICE) Team, PRefChem

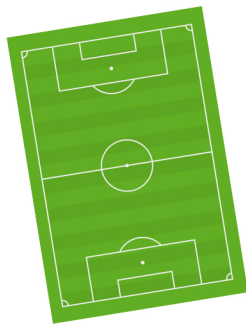

Tazkirah

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

Perasaan Hasad Dengki (PHD) adalah dilarang oleh agama. Rasulullah SAW pernah sebut bahawa hasad dengki akan menghapuskan segala kebaikan (pahala) sebagaimana api memamah hangus kayu-kayu. Sewajarnya, kita mesti hidup bersaudara secara aman antara satu-sama lain dan menjauhkan daripada sikap jatuh-menjatuhkan. Antara cara merawat penyakit ini adalah reda atas ketentuan Allah dan bersikap Zuhud (rendah diri) dalam perkara dunia.

Ustaz Muhammad Faiz Lee bin Adi Johan Lee

PIC is 6,242 acres in size and equivalent to 3,500 football fields.

What's Good in Pengerang?

Teluk Ramunia is a village located in the Pengerang district, facing the South China sea. It is a well-known bauxite mining town in the early days of Malaysia. Located 10 kilometer south of Desaru, Teluk Ramunia offers excellent stretch of pristine beach. Warung Bunian in Teluk Ramunia is also a popular eating place worth trying. Located deep inside a beautiful local village, this eating place which only opens at night serves various huge portion of seafood meals.
