of the program Wetskills

What our exhibitors says

"The exhibition was very good, there was a lot of attendance, and it was much bigger than last year. The truth is that it was a very good experience, which allowed us to generate business opportunities."

Erika Carricart
Field Marketing Manager · **Xylem**

"The event was very good, much bigger than last year. Much more participation from companies. Mainly to make our company known, brand positioning for us, and be present at events of this type. We are also looking for the possibility of being closer to our suppliers, many of whom are here and talking with some companies to form alliances."

Ana Lilia Aguilar
LATAM Commercial Director · **Ticsa Grupo EPM**

"Aquatech Mexico is a complete event, considered a key point to be innovating in issues of the water industry, we as a company are very attached to what the water market demands and we seek to provide solutions to each project to guarantee better use of water."

Daniel Palacios
Head of Marketing · **PPG**

"Through this edition, the exhibitors established a greater number of commercial deals, thanks to the prestige that the event has acquired and the high influx of visitors. These types of events create commercial alliances with existing and potential clients from all industries with the latest technology in water treatment."

Diego Suárez
Commercial Director · **Bombas Suárez**
