

Beyond the Sea – Booth number: 05.254

Beyond the Sea develops and markets kites, which can be used on all types of ships (from leisure boats to Merchant or Military vessels).

These kites allow the use of wind power in addition to the ship's engine. By taking advantage of the wind, we reduce the energy needs of ships, while proportionally reducing their greenhouse gas emissions. These kites also provide additional safety for sailors, as they can be used as emergency propulsion.

Our latest news :

- ***Beyond the Sea's first participation at Metstrade in Amsterdam.***

Beyond the Sea is delighted to be able to present its kite-powered ship traction solutions on an international scale!

- ***Partnership signed with Les Abeilles and the French Navy.***

We are proud to announce that we have signed a partnership with Les Abeilles (French tugboat) and the French Navy to equip one of their vessels with the SeaKite® system.

- ***Assises de l'Économie de la mer***

A huge success at the Assises de l'Économie de la mer in Bordeaux, with a visit to our SeaKite demonstrator in the presence of a host of VIPs and shipowners.

- ***Caledonian Energy Agency***

Second big announcement: we're going to be working with the Caledonian energy agency to equip a new buoy tender with the SeaKite® system.
