

## DB Schenker ensures your goods are delivered easily and worry-free to your exhibition stand.

### On-time delivery

In cooperation with DB Schenker, RAI Amsterdam is dedicated to ensuring that your goods will be delivered at the time you desire at your exhibition stand. You deliver your goods at the Advanced Logistics Center (ALC)\* and collect them again at this location after dismantling. It is also possible to deliver the goods to a location of your choice. This way, you can focus on your participation in the event.

\*At least 5 working days before the start of the exhibition.

### Efficient transport and handling

The ALC is located near the highways and Schiphol Airport. Loading and unloading your truck is done in a short time at the dock locations. Besides, multiple partial loads can be brought to your exhibition stand as one delivery. You won't have to worry about the limited time slots and/or possible waiting times at the RAI. A great advantage for efficiently including the delivery or collection of your goods in the transport planning.

### Sustainable and eco-friendly

The ALC is a sustainable and environmentally friendly solution. You avoid the environmental zones and the traffic around the RAI, while your goods are transported in emission-free vehicles. This approach not only benefits the environment but also minimizes transport movements to the exhibition building. Together we make a positive and sustainable impact!

## BENEFITS AT A GLANCE

### 1. Worry-free

You won't have to worry about delivery times; we handle everything for you.

### 2. Flexibility

We offer the option to transport goods back to the warehouse or another location at your desired time.

### 3. Efficiency

A fixed delivery location close to highways and the airport accelerates the process.

### 4. Sustainable

Our clean vehicles minimize your ecological footprint and help avoid traffic congestion in the city.
