Transforming beauty through innovation

Today's beauty consumers expect more than convenience – they want products that align with their values and deliver unique experiences. Sustainability, clean formulations, and personalized care are no longer trends; they're essential.

From eco-conscious ingredients to sensorial textures that elevate daily routines, the market is driving brands to innovate responsibly. Sasol Chemicals is helping formulators meet these expectations with products that combine performance, sustainability, and creativity.

Within this collection, you'll discover formulations designed to:

- **Create transformative textures** – like cream-to-powder deodorants or oil-to-foam cleansers for a light-feather feel.
- **Offer smart silicone alternatives** that maintain exceptional performance while supporting greener choices.
- **Deliver gentle cleansing** with ultra-mild biosurfactants that respect skin health.
- **Enhance protection and care** through products that combine UV defense with hydration.

Explore how Sasol Chemicals is enabling the next generation of personal care – where innovation meets conscious beauty.

HIGHLIGHT FORMULATION

No. 17382

Leave-in hair conditioner spray

Formulate with lightweight emollients that replace traditional silicones

The ingredients in this leave-in formulation create an ultra-light texture, that spreads effortlessly through the hair, noticeably enhancing combability. COSMACOL EMI improves silkiness and overall manageability of the hair. PARAFOL 10 RSPO-MB ensures exceptionally easy distribution, as this fast-spreading oil enables instant, even application without weighing the hair down. The added conditioning effect comes from PARAFOL 22 PF, which is specifically used as a replacement for traditional dimethicone – resulting in well-groomed, silky, shiny hair and a pleasant hair feel. At its core, the formula features CARINEX SL A, an ultra-mild, microbiome-friendly biosurfactant that gently cleanses while supporting scalp health.

Phase	Trade name	Supplier*	INCI name	Weight [%]	Function
A	CARINEX SL A	1	Glycolipids	2.0	Ultra-mild, multifunctional biosurfactant
	Demin. water		Aqua (EU) / Water (US)	Add to 100	
	Glycerin		Glycerin	1.0	Humectant
	Genamin CTAC 50	8	Cetrimonium Chloride	2.0	Quaternary conditioning agent
B	NAFOL 1618 H RSPO-MB	1	Cetearyl Alcohol	3.0	Co-emulsifier, consistency regulator
	COSMACOL EMI	1	Di-C12-13 Alkyl Malate	0.3	Moisturizing emollient
	PARAFOL 10 RSPO-MB NEW	1	Decane	1.0	Highly volatile, fast spreading emollient, replacement for Isododecane and Trisiloxane
	PARAFOL 22 PF	1	Docosane	0.5	Replacement for Dimethicone, secondary hair conditioning agent
	Argan oil	32	Argania Spinosa Kernel Oil	0.1	Emollient, skin conditioning
	Genamin BTLF	8	Behentrimonium Chloride	0.5	Quaternary conditioning agent
C	Hydrolite-5	93	Pentylene Glycol	4.0	Humectant
	Propylene Glycol		Propylene Glycol	3.0	
	Preservative			q.s.	
	Panthenol (w=0.75)		Panthenol	1.0	Active care agent

Preparation:

1. Heat phase (A) and (B) separately to 70°C.
2. Add phase (B) to (A) under stirring.
3. Cool to 35°C and add phase (C) and homogenize.
4. Adjust the pH-value.

Viscosity (Haake, RheoStress 1, 1 s⁻¹):

~ 2,000 mPas, 25°C, pH 5-6

Storage stability in terms of appearance:

Stable at room temperature, 5°C, 40°C, and 50°C for at least 3 months.

Appearance:

Opaque, off-white

Heat protectant hair oil

Blow-dry solution

Achieve superior heat protection in hair care formulations with our high-performance ingredients. This hair oil includes PARAFOL 10 RSPO-MB, a fast-spreading emollient for a weightless feel, and COSMACOL OE that ensures a light texture that doesn't weigh the hair down. COSMACOL EBL supports a very light touch, while PARAFOL 22 PF is a smart alternative to traditional silicones, providing extra conditioning and satin smoothness. Ideal for blow-drying, straightening, or curling, this oil leaves your hair healthy, radiant, and beautifully protected.

Phase	Trade name	Supplier*	INCI name	Weight [%]	Function
A	PARAFOL 10 RSPO-MB NEW	1	Decane	30.0	Highly volatile, fast spreading emollient, replacement for Isododecane and Trisiloxane
	COSMACOL OE	1	Dicaprylyl Ether	20.0	Very light, good spreading emollient
	COSMACOL EBL	1	C12-15 Alkyl Benzoate	26.0	Emollient with very light touch
	PARAFOL 22 PF	1	Docosane	1.0	Replacement for Dimethicone, secondary hair conditioning agent
	Argan oil	32	Argania Spinosa (Argan) Kernel Oil	1.0	Skin conditioning
	Perfume		Parfum (EU) / Fragrance (US)	1.0	Perfume
	Xiameter PMX-1503	75	Dimethicone (and) Dimethiconol	10.0	Film forming, long lasting
	Dowsil PMX-1507	75	Dimethicone (and) Dimethiconol	10.0	Dry combing
	Tocopherol	4	Tocopherol	1.0	Antioxidant

Preparation:

1. Dissolve phase (A) under stirring at RT.

Storage stability in terms of appearance:

Stable at room temperature, 5°C, and 40°C for at least 3 months.

Appearance:

Liquid, transparent

Shimmering face and body oil

Exceptional spreadability of silicone replacements for a smooth, non-greasy finish

Discover how Sasol's PARAFOL series, a natural alternative to silicones, brings exceptional spreadability and a feather-light feel to face and body formulations. These advanced emollients deliver instant, even application and silky-smooth coverage for a radiant, non-greasy glow. PARAFOL 10 RSPO-MB ensures effortless glide, PARAFOL 12 RSPO-MB replaces traditional cyclomethicone for enhanced softness, and PARAFOL 14 RSPO-MB ensures skin conditioning and replaces Isohexadecane. Complementing the series, COSMACOL OE adds a weightless touch, while COSMACOL EMI provides deep moisturization, helps reduce the appearance of fine lines, and optimizes shimmer dispersion for that dazzling glow.

Soft glow body lotion

Emulsifiers and emollients for a feather-light feel

Designed for those who crave radiant, moisturized skin with a delicate touch, this lotion blends high-performance ingredients for a luminous, healthy glow. NAFOL 1822 enhances consistency, while COSMACOL OE and PARAFOL 10 RSPO-MB provide light emollience and quick absorption for irresistibly smooth spreading and a barely-there feel. Traditional silicones are replaced by PARAFOL 22 PF, offering luxurious softness and protection. EMULDAC AS 25 acts as an advanced emulsifier that creates stable emulsions. COSMACOL EBL for pigment wetting and COSMACOL EMI provide lasting moisturization for a beautifully smooth finish.

Feather-light hydration powered by advanced emollients

Blush multi stick

Advanced emollients for smooth blending and lasting moisturization

Discover youthful radiance with the innovative blush multi stick – created for versatile application on cheeks, lips, and eyes. This formula harnesses fast-spreading PARAFOL 10 RSPO-MB and PARAFOL 12 RSPO-MB, which deliver an effortlessly smooth glide and seamless blending for an instant burst of colour, no matter where you apply.

For superior pigment wetting and moisturizing benefits, COSMACOL ELI and COSMACOL EMI ensure your skin feels comfortable and hydrated while enhancing colour intensity. The nourishing, skin-friendly blend helps support a fresh, dewy look, promoting a more youthful, glowing complexion.

The blush multi stick’s flexible texture makes it easy to blend and layer, allowing you to create anything from a natural flush to a bold, multi-dimensional look – perfect for those seeking multiple uses in one convenient product.

Seamless blending, effortless layering

Advanced emollients meet UV defense

HIGHLIGHT FORMULATION

No. 17323

Tinted mousse SPF 50

Weightless protection, effortless glow

How to achieve an innovative, ultra-airy texture that melts instantly into the skin and protects it from the sun? Try this high-performance blend of next-generation emollients and functional actives.

PARAFOL 10 RSPO-MB, a highly volatile, ultra-fast spreading emollient that delivers a feather-light texture and effortless glide, while PARAFOL 12 RSPO-MB, a fast-spreading emollient offers silky slip as a modern alternative to cyclomethicone. For stability and flawless colour dispersion, COSMACOL EBL acts as an efficient UV-filter solubilizer and pigment wetting agent while COSMACOL EMI completes the care with deep moisturization and wrinkle-softening benefits. A breathable, velvety tint with reliable SPF 50 defense – smooth, radiant, and beautifully weightless.

Gelled oil sunscreen SPF 50

Silicone-free sun care with a smooth, non-tacky finish

Experience the light, transparent feel of a gel enriched with nourishing oils. COSMACOL EBL as a skin-conditioning emollient with a very light touch acting as a powerful solubilizer for UV filters, ensuring maximum sun protection and a smooth, non-tacky feel. ISOFOL 20 spreads effortlessly, conditioning the skin, while COSMACOL ELI offers gentle moisturization. ISOFOL 16 enhances spreadability and delivers a velvety sensation, elevating the sensory profile. For a fast-spreading, volatile feel, PARAFOL 10 RSPO-MB helps the formula set within moments, creating instant radiance without residue: a smart alternative to heavier oils and silicones.

Phase	Trade name	Supplier*	INCI name	Weight [%]	Function
A	COSMACOL EBL	1	C12-15 Alkyl Benzoate	30.0	Solubilizer for UV-filter, pigment wetting
	ISOFOL 20	1	Octyldodecanol	20.0	Medium spreading emollient, skin conditioning
	Tinosorb S	16	Bis-Ethylhexylphenol Methoxyphenyl Triazine	10.0	UVA / UVB-filter
	Uvinul A Plus	16	Diethylamino Hydroxybenzoyl Hexyl Benzoate	10.0	UVA-filter
	Uvinul T 150	16	Ethylhexyl Triazone	3.5	UVB-filter
	Lexfilm Sun Natural MB	83	Capryloyl Glycerin/Sebacic Acid Copolymer	1.0	Film foamer, water resistance polymer
B	COSMACOL ELI	1	C12-13 Alkyl Lactate	5.0	Moisturizing emollient, pigment wetting
	ISOFOL 16	1	Hexyldecanol	13.1	Medium spreading emollient
	PARAFOL 10 RSPO-MB NEW	1	Decane	5.0	Highly volatile, fast spreading emollient, replacement for Isododecane and Trisiloxane
	Perfume		Parfum (EU) / Fragrance (US)	q.s.	Perfume
	Tocopherol	4	Tocopherol	q.s.	Antioxidant
C	Aerosil 200	3	Silica	2.0	Stabilizer, viscosity controlling

Preparation:

1. Heat phase (A) to 60°C under stirring.
2. Cool down to 40°C and add phase (B) under stirring.
3. Add phase (C) under stirring for a while.

Storage stability in terms of appearance:

Stable at room temperature, 5°C, and 40°C for at least 3 months.

Appearance:
Semi-solid, gel

Information:
SPF (ISO 24444): 52.0
Critical wavelength: 373 nm
Star rating: ****
UVA-PF/SPF (ISO 24443): 0.67

Scalp balance serum

Soothe and protect with multifunctional biosurfactants

Discover the power of CARINEX SL A, an ultra-mild multifunctional biosurfactant that supports the scalp's natural balance while delivering a fresh and pleasant sensation. This lightweight serum combines it with emollients like COSMACOL OE and PARAFOL 14 RSPO-MB for a fluid, silky texture. To complete the care, COSMACOL EMI and ISOFOL 20 provide deep moisturization, leaving the scalp soft, comfortable, and well-groomed.

Scalp comfort and anti-dandruff action with the biosurfactant CARINEX SL A

Phase	Trade name	Supplier*	INCI name	Weight [%]	Function
A	CARINEX SL A	1	Glycolipids	3.0	Ultra-mild, multifunctional biosurfactant
	Demin. water		Aqua (EU) / Water (US)	Add to 100	
	Carephos N	94	Sodium Polyphosphate	0.25	Chelating agent
	Bisabolol		Bisabolol	0.1	Active care agent
	Allantoin		Allantoin	0.1	Active care agent
	Preservative			q.s.	Preservative
	HYA-ACT M	64	Sodium Hyaluronate	0.1	Humectant
	HYA-ACT XS	64	Hydrolyzed Hyaluronic Acid	0.01	Humectant
	Amisoft HS-11P	98	Sodium Stearoyl Glutamate	1.0	Mild surfactant
	Solagum AX	70	Acai Senegal Gum (and) Xanthan Gum	0.6	Viscosity controlling
Amaze XT	59	Dehydroxanthan Gum	0.3	Thickening agent	
B	PARAFOL 14 RSPO-MB	1	Tetradecane	5.0	Good spreading emollient, replacement for Isohexadecane, skin conditioning
	COSMACOL EMI	1	Di-C12-13 Alkyl Malate	2.5	Wrinkle reduction, moisturizing emollient
	COSMACOL OE	1	Dicaprylyl Ether	5.0	Very light, good spreading emollient
	ISOFOL 20	1	Octyldodecanol	2.5	Medium spreading emollient, skin conditioning
	Lavender oil		Lavandula angustifolia oil	0.1	Essential oil
	Tocopherol		Tocopherol	0.5	Antioxidant
C	Perfume		Parfum (EU) / Fragrance (US)	q.s.	Perfume

Preparation:

1. Homogenize phase (A).
2. Add phase (B) to (A) under stirring.
3. Add phase (C) to (AB) under stirring.

Viscosity (Haake, RheoStress 1, 1 s⁻¹):
~ 10,000 mPas, 25°C, pH 5-6

Storage stability in terms of appearance:
Stable at room temperature, 5°C, 40°C, and 50°C for at least 3 months.

Appearance:
Liquid, opaque

Rinse-off hair conditioner

Silky, manageable hair without silicones

Discover the beauty of healthy, silky hair. This advanced formula combines smart emulsifiers and innovative emollients to deliver instant smoothness, manageability, and a luxurious feel – every time you use it.

GALENOL 1618 AE RSPO-MB works as a powerful emulsifier, while NAFOL 1618 H RSPO-MB acts as co-emulsifier, ensuring the cream blends perfectly and spreads effortlessly for maximum conditioning. For lightweight, fast-absorbing care, PARAFOL 10 RSPO-MB serves as a highly volatile, quick-spreading emollient, offering a modern alternative to heavier silicones. PARAFOL 22 PF further boosts softness, replacing Dimethicone as a secondary conditioning agent for radiant, healthy hair.

Phase	Trade name	Supplier*	INCI name	Weight [%]	Function
A	Demin. water		Aqua (EU) / Water (US)	Add to 100	
	Genamin CTAC 50	8	Cetrimonium Chloride	2.0	Quaternary conditioning agent
B	GALENOL 1618 AE RSPO-MB	1	Cetearyl Alcohol (and) Ceteareth-20	3.0	Emulsifier
	NAFOL 1618 H RSPO-MB	1	Cetearyl Alcohol	1.0	Co-emulsifier, consistency regulator
	PARAFOL 10 RSPO-MB NEW	1	Decane	0.75	Highly volatile, fast spreading emollient, replacement for Isododecane and Trisiloxane
	PARAFOL 22 PF	1	Docosane	0.75	Replacement for Dimethicone, secondary hair conditioning agent
	Genamin BTLF	8	Behentrimonium Chloride	1.0	Quaternary conditioning agent
C	Tocopherol		Tocopherol	1.0	Antioxidant
	Glucadin WLM Benz	16	Hydrolyzed Wheat Protein	1.0	Conditioning agent
D	Preservative			q.s.	
	Perfume		Parfum (EU) / Fragrance (US)	q.s.	Perfume

Preparation:

1. Heat phase (A) and (B) separately to 70°C.
2. Add phase (B) to (A) under stirring.
3. Cool to 35°C and add phase (C) and homogenize.
4. Adjust the pH-value.

Viscosity (Haake, RheoStress 1, 1 s⁻¹):

~ 8,000 mPas, 25°C, pH 4-5

Storage stability in terms of appearance:

Stable at room temperature, 5°C, 40°C, and 50°C for at least 3 months.

Appearance:

Opaque, off-white

Radiant hair, feather-light feel: the silicone-free innovation

Next-gen
cleansing:
oil care meets
foaming power

No. 17271

Oil-to-foam cleanser

Innovative surfactant and emollients
for clean and soft skin

Discover the next generation of cleansing innovation with our oil-to-foam technology, designed to elevate your formulations with high-performance ingredients. The silky oil base melts away dirt, makeup, and excess sebum before transforming into a lush, creamy foam for a purified, refreshed complexion. At its core, MARLINAT 242/90 MC RSPO-MB is a versatile base surfactant renowned for its high foaming power: create an ultra-foaming sensation that gently removes impurities. The nonionic surfactant MARLOSOL PK 9040 ensures optimal emulsification, and PARAFOL 10 RSPO-MB provides a silky glide that rinses clean without residue. Together, these ingredients transform oil into a rich foam for a purified, refreshed complexion.

Phase	Trade Name	Supplier*	INCI name	Weight [%]	Function
A	MARLINAT 242/90 MC RSPO-MB	1	MIPA Laureth Sulfate (and) Propylene Glycol	12.0	Base surfactant, high foaming power
	MARLOSOL PK 9040	1	Laureth-4	1.0	Nonionic surfactant, emulsifier
	PARAFOL 10 RSPO-MB NEW	1	Decane	1.0	Highly volatile, fast spreading emollient, replacement for Isododecane and Trisiloxane
	Jojoba oil	32	Simmondsia Chinensis (Jojoba) Seed Oil	0.5	Skin conditioning
B	NaCl		Sodium Chloride	1.5	
	Demin. water		Aqua (EU) / Water (US)	25.0	
C	LIPOXOL 400 MED	1	PEG-8	2.0	Moisturizing agent
	Glycerine		Glycerin	1.0	Humectant
	Ketrol CG T	5	Xanthan Gum	0.5	Thickening agent
	Demin. water		Aqua (EU) / Water (US)	Add to 100	
D	Preservative			q.s.	Preservative
	Perfume		Parfum (EU) / Fragrance (US)	q.s.	Perfume

Preparation:

1. Homogenize phase (A), (B) and (C) separately at room temperature.
2. Add phase (B) to (A) under stirring.
3. Add phase (C) to (AB) under stirring.
4. Adjust the pH-value.
5. Add phase (D) to (ABC) and homogenize.

Viscosity (Haake, RheoStress 1, 1 s⁻¹):
~ 1,000 - 4,000 mPas, 20°C, pH 5.5-7.0

Storage stability in terms of appearance:
Stable at room temperature, 5°C, and 40°C for at least 3 months.

Appearance:
Fluid

Hydrating skin lotion

Advanced emollients and glycolipids for moisturization and balance

Experience the next level of skin hydration with Sasol's high-performance ingredients, used to create a Japanese-inspired formulation that blends tradition with innovation. This combines cutting-edge ingredients to deliver visible results and luxurious moisture, all while keeping your skin soft, youthful, and radiant. COSMACOL EMI provides deep moisturization and helps reduce the appearance of wrinkles for a smoother, more youthful look. COSMACOL ELI enhances moisturization, while the glycolipid CARINEX SL A supports the skin's natural balance and offers gently cleansing. Ideal for sensitive complexions.

W/O flawless satin foundation

Emollients for formulations light as air, smooth as silk

Elevate your foundation formulations with high-performance emollients for a silky, satin finish that feels weightless and looks naturally radiant. PARAFOL 10 RSPO-MB delivers ultra-light, fast-spreading application, while COSMACOL OE ensures effortless glide. For moisturizing effect and anti-wrinkle benefits, COSMACOL EMI enhances pigment wetting for flawless coverage. COSMACOL ECL controls viscosity and optimizes pigment dispersion for a stable, uniform satin finish.

Smooth application, even coverage, and a flawless satin glow that lasts all day. Create foundations that combine superior performance with a luxurious skin feel!

Phase	Trade name	Supplier*	INCI name	Weight [%]	Function
A	PARAFOL 10 RSPO-MB NEW	1	Decane	11.5	Highly volatile, fast spreading emollient, replacement for Isododecane and Trisiloxane
	COSMACOL OE	1	Dicaprylyl Ether	1.0	Very light, good spreading emollient

Balm-to-powder formulation without silicone, with PARAFOL 10 RSPO-MB

No. 17367

Balm-to-powder deodorant

Advanced emollients and silicone alternatives for lasting comfort

Step into a new era of freshness and comfort with a transformative that starts as a balm and finishes as a soft powder. This innovation is powered by NACOL 22-98 and NACOL 18-98, that ensure the perfect viscosity. Advanced emollients like ISOFOL 20 and COSMACOL OE create a silky, non-sticky feel, while COSMACOL ELI and EMI provide deep skin conditioning for lasting comfort. Innovative components, including PARAFOL 10 RSPO-MB and ISOCARB 12, provide a lightweight, fast-spreading protection with a powdery soft finish.

Phase	Trade name	Supplier*	INCI name	Weight [%]	Function
A	NACOL 22-98	1	Behenyl Alcohol	6.0	Viscosity controlling
	NACOL 18-98 PF	1	Stearyl Alcohol	6.0	Viscosity controlling
	ISOFOL 20	1	Octyldodecanol	6.0	Medium spreading emollient, skin conditioning
	COSMACOL OE	1	Dicaprylyl Ether	4.0	Very light, good spreading emollient
	Shea butter	32	Butyrospermum Parkii (Shea) Butter	10.0	Skin conditioning
B	PARAFOL 10 RSPO-MB NEW	1	Decane	10.0	Highly volatile, fast spreading emollient, replacement for Isododecane and Trisiloxane
	ISOCARB 12	1	Butyloctanoic Acid	2.0	Medium spreading, pleasant and non-sticky emollient, biomimetic performance booster
	COSMACOL ELI	1	C12-13 Alkyl Lactate	2.0	Moisturizing emollient, body odour reduction
	COSMACOL EMI	1	Di-C12-13 Alkyl Malate	2.0	Moisturizing emollient
	Sensidin DO	84	Propylene Glycol (and) Ethylhexylglycerin (and) Octenidine HCl	0.5	Antimicrobial
	Perfume		Parfum (EU) / Fragrance (US)	1.0	Perfume
	Tocopherol	4	Tocopherol	0.5	Antioxidant
C	Z-Cote	16	Zinc Oxide	5.0	Bulking
	Maisita 21.001	91	Zea Mays (Corn) Starch	45.0	Absorbent, viscosity controlling

Preparation:

1. Heat phase A to 70° C under stirring.
2. Add phase (B) to (A) under stirring.
3. Add phase (C) to (AB) under stirring. Cool down to RT.

Storage stability in terms of appearance:

Stable at room temperature, 5°C, and 40°C for at least 3 months.

Appearance:

Semi-solid, off-white
