### **Letter of Confirmation for PFAS in Sasol products**

Dear customer,

We hereby confirm that, based on our knowledge of the manufacturing processes as well as the raw materials, Sasol's products are not expected to contain Per- and polyfluoroalkyl substances (PFAS). PFAS are not intentionally added during our manufacturing processes. Therefore, a test to determine their presence is not conducted. That said, since many PFAS materials are commonly used in industrial process equipment, we cannot preclude the possibility of PFAS traces being unintentionally present from manufacturing and process equipment.

Please also note that by this declaration we do not assume any liability additional to the liabilities stipulated in the sales contract or our general business conditions.

Kind regards,

Sasol Chemicals GmbH
