## Our sustainability

For us, at Sodexo, the company's growth only makes sense if it generates a positive impact on society and the environment, aiming to raise awareness among the millions of people we serve every day.

We are a company striving for increasingly sustainable practices, aiming to fulfill our commitments as an organization, being responsible in our business, always promoting nutrition, healthiness, well-being, local community development, and environmental preservation.

We are very proud to present the first edition of the virtual comic book "The Guardians of Sustainability," a project developed by us with the goal of creating a positive legacy in the school communities where we operate.

Students will have in their hands a playful material about sustainable eating, proper waste disposal, and food waste. **We want to ensure a better tomorrow for everyone, and we count on you in this journey.**

Scan the QR Code and learn more about our positive impact on individuals, communities, and the environment in Sodexo's Sustainability Report.
