

Sunshine Avenue Intersection Upgrade

OCTOBER 2026

Sunshine Avenue intersections.

We're upgrading two intersections along Sunshine Avenue in Taylors Lakes, to improve safety and traffic flow.

Background

The Melton Highway and Old Calder Highway intersections on Sunshine Avenue experience large traffic volumes in the morning and afternoon peaks which often causes delays for drivers.

A large number of vehicles move through the area everyday, including:

- **37,000** vehicles on Melton Highway
- **21,000** vehicles on Sunshine Avenue
- **7,700** vehicles on Old Calder Highway

What we're doing Planning Update

Following further planning and design work in 2026, the final design for the Sunshine Avenue Intersection Upgrades has been confirmed.

The final design will replace both roundabouts with new signalised intersections, providing the best overall outcome for safety, traffic flow and connectivity.

The Sunshine Avenue Intersection Upgrade will:

- replace two roundabouts on Sunshine Avenue at Melton Highway and Old Calder Highway with traffic lights

- add additional lanes at the two new intersections
- remove existing pedestrian crossings and add new signalised pedestrian crossings at the traffic lights
- construct new walking and cycling paths along Melton Highway and Sunshine Avenue
- relocate the bus stop from the north side of Melton Highway to a new position on the east side of Sunshine Avenue
- install new street lighting.

Benefits

Once complete, the project will deliver benefits including:

- improved road safety
- improved traffic flow
- improved connectivity for pedestrians, cyclists and businesses.

What's next

Planning work is progressing as the upgrades move towards construction in 2027.

We're continuing with on-site investigations to test ground conditions and identify services throughout October.

From mid-late October, crews will be working around Sunshine Avenue and Old Calder Highway.

These works will occur between **7am and 6pm, Monday to Friday** and will take place under temporary lane closures and reduced speeds along Sunshine Avenue and Old Calder Highway.

There will be some nights of nightworks during this period. We'll let you know in advance when these works are being scheduled.

Funding

This project is part of the Victorian Government's \$117 million investment in the Metropolitan Road and Intersections Upgrade Program.
