

# Using pedestrian crossing with traffic lights

**Wait for the green man signal.**

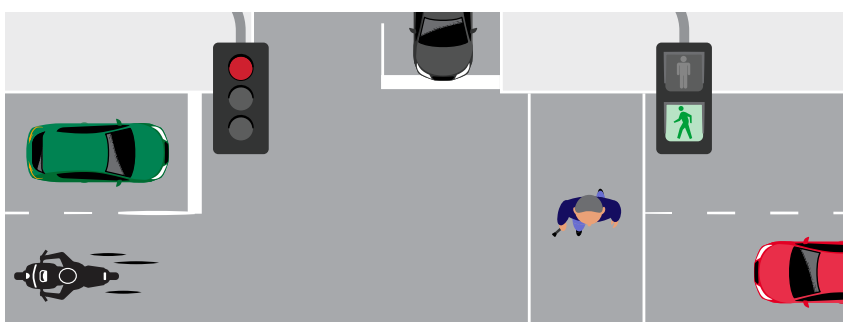

Only walk when the green man appears before crossing.

Make sure **all traffic** is stopped before you start to cross.

**Stay alert**

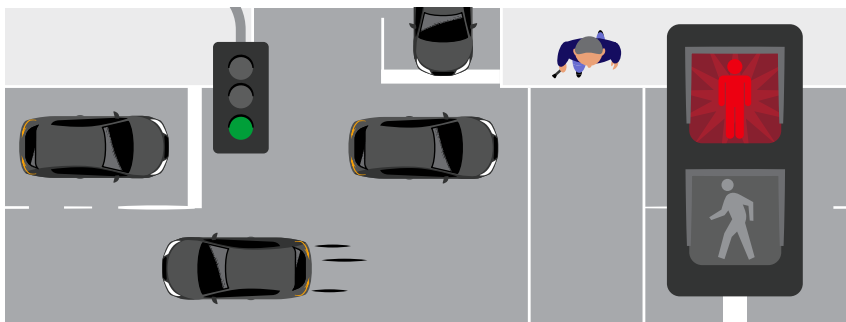

Look and listen for traffic as you cross.

Always obey the pedestrian crossing signals.

Do not start to cross on the **red man signal** even if it is flashing.

If the red flashing man appears while you're already crossing, don't worry, you still have time to finish. Just keep walking carefully.

### Look out for drivers and riders who may not see you

At intersections, even with traffic lights, it is important to always look out for turning vehicles. Drivers must give way to pedestrians, but sometimes they may not see them.

At intersections always look out for turning vehicles. Check for vehicles turning right and left into the road being crossed.

#### Driver and riders at traffic lights

- Must stop when lights are red.
- Must not block the pedestrian crossing.

- When turning at an intersection drivers must give way to pedestrians crossing the road they are turning into – even if a pedestrian is crossing against a red pedestrian signal.
- Have a duty of care, as do all road users, to act safely to avoid a collision.

**Always look out** for turning vehicles at intersections.
