28 acute care facilities

Sutter Health

Putting Patients First

Sutter's service line approach organizes the care we deliver so patients can **easily access and navigate the care they need,** including:

- Programs and partnerships for chronic disease prevention, and whole person-focused strategies to stay well
- Evidence-based treatments and technologies
- Research and clinical trials
- Improved diagnostic tests
- More precise surgical procedures and state-of-the-art imaging technologies
- Digitally connected, exceptional and data-driven care
- Resources to aid recovery at home after in-hospital care

The Sutter Health Approach: Fostering Collaboration and Connectivity

Sutter's service lines consistently deliver a high-caliber experience that **maximizes patients' health and well-being** today and tomorrow.

We provide this **high-quality care** through a coordinated system that exceeds national benchmarks in patient outcomes.

- **Our advanced service lines regularly earn top recognitions and awards.**

- The specialized care we deliver has been **accredited by leading U.S. organizations and programs that set standards in health care** including the American College of Radiology, Commission on Cancer, Quality Oncology Practice Initiative, American Heart Association/ American Stroke Association ("Get With The Guidelines™" recognition), Leapfrog Group ("A" grades for safety), The Joint Commission (advanced stroke, heart & vascular and orthopedics certifications) and Blue Distinction® specialty care for hip and knee replacement and spine surgery (BlueCross/BlueShield).

Our physicians and care teams work across geographies, specialties and medical groups to **align in purpose, share knowledge, broaden access** and **streamline referrals to specialized care.**

We want every patient at Sutter to **seamlessly receive the same level of exceptional care,** regardless of where they access treatment. To realize our mission that puts patients first, our clinical service lines **support physicians and care teams** with:

- Care pathways and tools that support consistently delivered, elite care
- Channels to share and scale evidence-based, clinical best practices that drive continuous improvement
- Access to continuing medical education and specialized training that hone clinical knowledge and skills
- Opportunities to conduct and learn from Sutter research and clinical trials
