

STAY HEALTHY WITH SCREENING AND VACCINATION

Why is Screening Important?

It is important to get screened early and regularly, even if you feel healthy. Detecting problems early and getting treatment sooner reduces the risk of serious complications and improves your overall health.

Find out which health screenings are applicable to you and get screened today.

SCREEN FOR LIFE*

Helps detect chronic conditions and cancers early

PROJECT SILVER SCREEN*

Helps detect age-related decline in seniors' vision, hearing and oral health

FALL RISK SCREENING^

Helps assess risk for falls (assess lower limb strength, endurance and balance)

*Subsidies available for Pioneer Generation, Merdeka Generation and CHAS card holders

^ Fully subsidised

Why are Vaccinations Important?

Protect yourself and your loved ones from diseases like the flu and pneumococcal disease. Vaccines teach your body how to fight germs in case you are exposed to them. Strengthen your immune system and prevent infectious diseases by getting vaccinated today.
