

Simulation Facilitator Training for Healthcare Professionals

PROGRAMME DESCRIPTION

This half-day workshop is designed for clinical educators seeking to build confidence and competence in simulation-based teaching, with a strong emphasis on facilitation and debriefing skills.

DURATION: 0.5 DAY

Participants will engage in running acute care-based simulation scenarios, gain hands-on experience in the control room, and practice conducting debriefs using structured, evidence-based models. The course is best suited for educators involved in acute care or simulation-based education where resuscitation scenarios are commonly used as platforms to support learning through debriefing.

PROGRAMME CONTENT

This programme comprises the following learning topics:

- Pre-workshop Quiz
- Introduction to Environment and SimMan
- Practical sessions:
 - Simulated Resuscitation Scenario
 - Post-Simulation Debrief
 - Debriefing the Debriefer
 - Summary and Evaluation

TARGET AUDIENCE

Doctors, Nurses, Allied health professional and clinical educators
