1. Heart disease
2. Cancer
3. Diabetes-related
4. Stroke
5. Injury

Chronic Disease Burden Among Adults

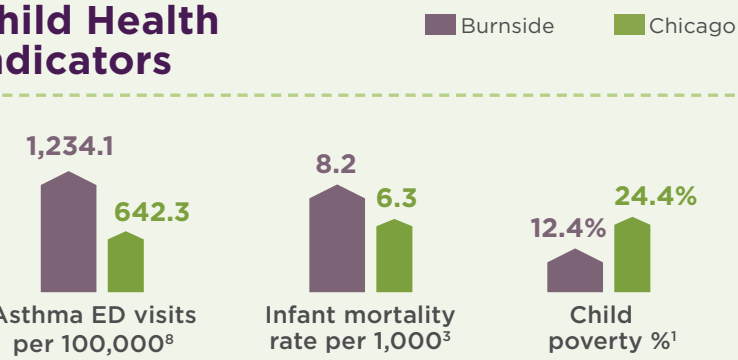
45% have high blood pressure[5]

45% are obese[6]

5.6% diagnosis rate of all cancers[7]

20% are diabetic[5]

Child Health Indicators



Having to go to the emergency department (ED) for asthma and/or living in poverty puts children at risk for long-term health problems and developmental challenges. In addition, many communities struggle with high infant mortality rates—the number of children who die before their first birthday per 1,000 live births.

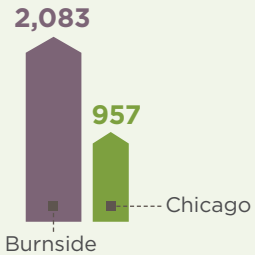
Safety and Mental Health

Physical Factors

57% of adults report feeling safe in their neighborhood "most or all of the time"[9]

Violent Crime Incidents[10]

Per 100,000 population



Burnside
