4. RSG ACCESS CONTROL TOOLS

The access control tools described below are available if you feel your gameplay may have become, or is at risk of becoming, problematic (see “What is Problem Gameplay in section 7.4”).

4.1. Taking a Break (TaB)

Accessible through the ‘Responsible Social Gameplay’ menu > [Access Restrictions](#)

Allows you to take a short break away from gameplay. During this break you will not be able to access your account.

- (a) Available options are 1 day, 3 days, 7 days, 14 days, or 30 days.
- (b) It will not be possible to reactivate your account until the chosen break period ends.
- (c) Take a Break (Tab) applies only to the site it was requested on and not any sister sites associated with VGW. Should you wish to activate a TaB in other website associated with VGW, please contact Customer Support for more information.

4.2. Self-Exclusion

Accessible through the ‘Responsible Social Gameplay’ menu > [Access Restrictions](#)

A self-exclusion allows you to suspend your account for a longer period. During this exclusion period you will not be able to access your account.

- (a) Available period options are finite (6 months, 1 year, 3 years, 5 years), and indefinite.
- (b) You will be unsubscribed from receiving any marketing communications.
- (c) It will not be possible to reactivate your account until the chosen period ends.
- (d) Where a defined self-exclusion is in effect, your account will automatically reactivate once the chosen period has lapsed.
- (e) Where an indefinite self-exclusion is in effect, a minimum of 6 months must pass before the account can be reactivated.
- (f) Where an indefinite self-exclusion is in effect, a 7-day cooling period will apply before the account is reactivated.
- (g) **IMPORTANT:** Sweeps Coins expire after 60 days. We strongly recommend you redeem any redeemable balance in your account before setting a self-exclusion on your account. If your account has been verified, we will use reasonable endeavors to arrange for any Sweeps Coins remaining in your account that have met our playthrough requirements and minimum redemption threshold to be redeemed.
- (h) **IMPORTANT:** Self-Exclusion applies only to the site it was requested on and not any sister sites associated with VGW. Should you wish to activate self-exclusion across all VGW websites, please contact player support.

4.3. Permanent Closure

Please contact customer support

- (a) You may choose to permanently close your account. If you wish to do so, send an email to Customer Support via this [form](#) requesting a “Close my Account” and state the reason for the closure. Please note that, unlike an indefinite self-exclusion, a permanent closure is irreversible and cannot be reactivated under any circumstances.

- (b) You will be required to provide a "confirmation of understanding" to permanently close your account.
- (c) If you do not provide a 'confirmation of understanding' and the reason for closure is related to issues with gameplay control, an indefinite self-exclusion will be applied.

5. SELF-ASSESSMENT

If you think your social gameplay is becoming problematic, then it may be handy to consider the self-assessment questions available [here](#).

7. EDUCATION INFORMATION ON RESPONSIBLE SOCIAL GAMEPLAY

7.1. Principles of Gameplay

- (a) Randomness: Remember that game-round outcomes are completely random. Results cannot be predicted and are independent of past or future outcomes.
- (b) Return to Player (RTP): This is the average return on the winnings and prizes over the lifetime of a slot-type game. I.e., if a slot type has an 8% advantage, then the average RTP will be 92%.
- (c) Advantage: All casino-type games are designed with a slight advantage that favors the operator.

7.2. Common Misconceptions

- (a) "I'm due for a win" - You cannot predict when you're going to win. All outcomes are random.
- (b) "I always win with my lucky charm and pre-game ritual" - Although they might be fun, charms and rituals don't affect your chances of winning. All outcomes are random.
- (c) "The longer I play, the more chance I'll win" - Time spent has no effect on your chances of winning. All outcomes are random.
- (d) "These Games have been rigged" - The Random Number Generator (RNG) used in all Chumba Casino games has been independently certified by iTechLabs and Gaming Associates, who confirmed that the RNG uses a well-known algorithm to generate random numbers. The numbers generated by the RNG have passed Marsaglia's "diehard" tests for statistical randomness. iTechLabs and Gaming Associates have found that number sequences are unpredictable, non-repeatable, and uniformly distributed.

7.3. **Tips for Safe Gameplay**

- (a) Avoid gameplay while upset or emotional.
- (b) Take frequent breaks during your gameplay sessions.
- (c) Avoid gameplay while intoxicated.
- (d) Avoid canceling redemptions.
- (e) Remember that gameplay is only a form of entertainment, it should not be seen as a source of income or an escape from reality.
- (f) Purchase only with money that you can afford to spend.
- (g) Set a budget and don't go over it.
- (h) Set a time limit before playing.
- (i) Understand how games work before playing and remember that the results are random.
- (j) Never let gameplay affect your employment, relationships, health or commitments.
