

NEXT - Native eCommerce Toolkit

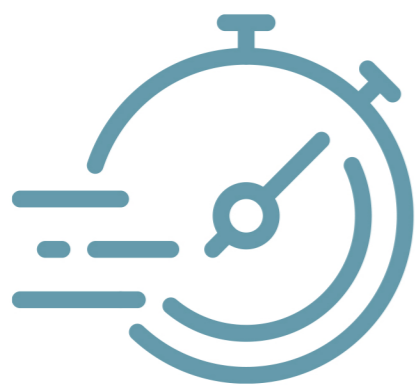

Extend Salesforce PWA toolkit to a native mobile application quickly. Grow your business and be at your customer's fingertips faster and in real-time. XCentium's NEXT, powered by Salesforce Commerce Cloud, provides enhanced flexibility and unique commerce experiences over mobile.

NEXT is a Native mobile application framework that has pre-packaged functionality that includes several key functional modules that are required to develop and publish native mobile applications on App Store(TM) and Play Store (TM).

With NEXT, you can increase conversion rates, and build customer loyalty using a sophisticated commerce application engine.

Platform Overview

Headless commerce API built with Salesforce Commerce PWA Kit & Managed Runtime, APIs, and Engine. Allow your customers to take your business wherever they go, at any point in time. NEXT provides lightning-fast performance, increased customer engagement, and enhanced front-end performance and freedom to customize.

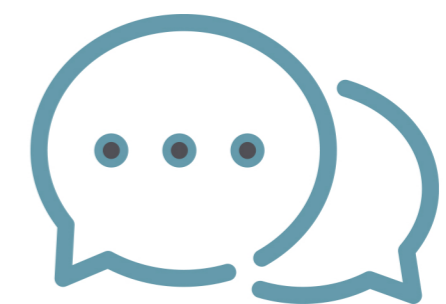

Quick Time to Value
